Handbook Of Applied Investment Research John B Guerard Jr, William T Ziemba, 2020-10-02

This book introduces the readers to the rapidly growing literature and latest results on financial fundamental and seasonal anomalies stock selection modeling and portfolio management Fifty years ago finance professors taught the Efficient Markets Hypothesis which states that the average investor could not outperform the stock market based on technical seasonal and fundamental data Many if not most faculty and investors no longer share that opinion In this book the authors report original empirical evidence that applied investment research can produce statistically significant stock selection and excess portfolio returns in the US and larger excess returns in international and emerging markets

Global Momentum MSCI. Inc., 2009

This is the fourth in a series of research bulletins marking the launch of the new and enhanced Barra Global Equity Model GEM2 In this piece we focus on characteristics of the global momentum factor Under varying market conditions the

performance of the momentum factor will be examined especially in bull versus bear markets In addition the global diversification benefits for this strategy will be analyzed We also consider the implied country and sector tilts in a momentum strategy as well as the interaction between momentum and other style factors such as value and growth *Optimizing Environmental, Social and Governance Factors in Portfolio Construction* Zoltán Nagy,2013 Institutional investors wanting to integrate Environmental Social and Governance ESG factors in their investment strategies need the right tools to measure portfolio risk characteristics and performance MSCI s BarraOne and Barra Portfolio Manager can provide this utility with Intangible Value Assessment IVA ratings from MSCI ESG Research In this study we examine the use of IVA ratings with the Barra Global Equity Model GEM3 to build optimized portfolios with improved ESG ratings while keeping risk performance country industry and style characteristics similar to conventional benchmarks such as the MSCI World Index The currently available dataset of IVA scores allowed us to compare three strategies during the period between February 2008 and December 2012 using current IVA ratings methodology Of the three strategies we found the best active returns during this period were achieved by overweighting firms whose IVA ratings improved over the recent time period showing ESG momentum Underweighting assets with low ESG ratings also raised portfolio performance during this period The highest ESG rated assets had more uneven performance they generally did better in periods of limited risk appetite during this volatile market cycle **Global Equity Selection Strategies** Ross Paul Bruner,1998 The text seamlessly blends fundamental and qualitative approaches to global equity selection BOOK JACKET The Third Quarter Ends with a Blast MSCI. Inc.,2014 The US equity markets showed their strongest gains for any September on record in the 40 year history of the MSCI USA Index Here we highlight a few main observations through the lens of the Barra US Equity Model The Growth story was really a Technology story The Small Cap story was partially a real small cap effect but in fact had an important Volatility story behind it i e small caps benefited from being high beta and high volatility Certain sectors like Health Care and Financial benefited indexes across the board
