Basic Horticulture Jitendra Singh, 2014      *Production Technology of Fruits and Plantation Crops* Ankur Sharma, Prabhat Kumar, V. K. Tripathi, 2024-12-06 Based on the 5th Dean's committee of ICAR and NEP 2020 this book provides an overview of the important aspects of fruit crops. It covers all important fruit crops including tropical, subtropical, temperate and arid fruits. The subject matter in this book also discusses the importance and scope of fruit and plantation crop industry in India and the importance of rootstocks. Print edition not for sale in South Asia, India, Sri Lanka, Nepal, Bangladesh, Pakistan or Bhutan.      **Horticulture Based Integrated Farming Systems** A.K. Shukla, D.K. Gupta, B.L. Jangid, Keerthika A., N.B. Noor Mohamed, R.S. Mehta, 2021-11-23 The content of this book provides information on advanced knowledge in the sphere of importance and scope of horticulture in India, horticulture based integrated farming systems, integration of livestock in horticulture based farming systems, emerging issues, natural resource management, disease and pest management, organic farming and certification, post harvest measures and value addition in arid fruits and vegetables, marketing aspects, status and export promotion measures and procedures. Note: T F does not sell or distribute the hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka. This title is co-published with NIPA.      *Precision Farming In Horticulture* Jitendar Singh, 2013-01-01 Climatic variations often tend to have adverse effect on the yield and production of crops. Efforts have therefore been on for harnessing this natural resource through artificial means for increasing crop productivity. One such technology is protected cultivation. This technique is well adopted in Europe and USA and now China and Japan are leading in controlled sphere production of horticultural crops. In India the technology is making breakthrough in Karnataka and Maharashtra in protected cultivation of pepper, tomato, cucumber, muskmelon, baby corn etc. Precision farming is defined as the cultivation by adopting technologies which give maximum precision in production of a superior crop with a desired yield levels and quality at competitive production. These include use of genetically modified crop varieties, micropropagation, integrated nutrient water and pest managements, protected cultivation, organic farming, hi tech horticulture and post harvest technology. Post harvest sector needs lot of precision. Peels, rags etc go waste. Many times peels being rich in polyphenols, colouring pigment, nutrients etc are richer in antioxidant than what we actually eat. Here we need precision. Precision in management, precision in product diversification, precision in value addition are much sought after aspect.      Basic Horticulture Jatinder Singh, 2008-01-01      Agricultural Impacts of Climate Change [Volume 1] Rohitashw Kumar, Vijay P Singh, Deepak Jhajharia, Rasoul Mirabbasi, 2019-11-25 Conservation agriculture is a sustainable production model that not only optimizes crop yields but also reaps economic and environmental benefits as well. The adoption of successful conservation agriculture methods has resulted in energy savings, higher organic matter content and biotic activity in soil, increased crop water availability and thus resilience to drought, improved recharge of aquifers, less erosion and reduced impacts from the weather associated with climate change in general. *Agricultural Impacts of Climate Change* examines

several important aspects of crop production such as climate change soil management farm machinery and different methods for sustainable conservation agriculture It presents spatial distribution of a daily monthly and annual precipitation concentration indices Diffuse Reflectance Fourier Transform Infrared Spectroscopy for analyzing the organic matter in soil and adaptation strategies for climate related plant disease scenarios It also discusses solar energy based greenhouse modeling precision farming using remote sensing and GIS and various types of machinery used for conservation agriculture Features Examines the effects of climate change on agriculture and the related strategies for mitigation through practical real world examples Explores innovative on farm technology options to increase system efficiency resulting in improved water usage Presents examples of precision farming using climate resilient technologies Advances in Postharvest and Analytical Technology of Horticulture Crops Monika Thakur,Tarun Belwal,2024-11-21 This book discusses advances in postharvest and analytical technology for horticulture crops and challenges to meet future needs The horticulture crops fruits and vegetables need a systematic and scientific postharvest handling and management system for securing both physical and chemical attributes while prolonging their shelf life Postharvest technologies include storage drying packaging extraction of components and preparation of juice and wine from the collected fruits and vegetables All these postharvest technologies have emerged and evolved with time to provide meaningful solutions to minimize food loss maintain quality and provide fast processing of horticulture crops Parallel development of analytical techniques has also evolved to monitor the quality of fruits and vegetables during postharvest processing and thus provide a rapid and efficient method for delivering safer food products This book provides an overview of different postharvest technologies their mechanisms and their effect on the quality of horticulture crops It also emphasizes the assessment of each advanced technology including its limitations and advantages Overall this book provides techniques research mechanisms advances and challenges of postharvest and analytical technologies for horticulture crops along with recommendations for future research directions

Biotechnological Utilization of Mangrove Resources Jayanta Kumar Patra,Rashmi Ranjan Mishra,Hrudayanath Thatoi,2020-04-17 Mangroves are typically tropical coastal ecosystems found in the inter tidal zones of river deltas and back water areas They represent highly dynamic and fragile ecosystems yet they are the most productive and biologically diversified habitats of various life forms including plants animals and microorganisms Mangroves are a resource of many different products including microorganisms that harbor a diverse group of industrially important enzymes antibiotics therapeutic proteins and vaccines timber resistant to rot and insects and medicinal plants Divided into three main parts Biotechnological Utilization of Mangrove Resources first provides a broad introduction into mangrove ecology Subsequent chapters discuss the biodiversity of mangroves including the diverse nature of the organisms within the mangroves themselves The final part pays special attention to biotechnological utilization of mangroves Topics such as antimicrobial activity of mangrove derived products anti oxidant activity of mangrove derived products and pharmaceutical applications

are covered in detail Biotechnological Utilization of Mangrove Resources brings the latest research and technologies in mangrove biology into one platform providing readers with an up to date view on the area This would serve as an excellent reference book for researchers and students in the field of marine biology especially interested in mangrove ecosystems Highlights the diversity of different life forms in the mangrove ecosystem including the importance of mangroves and mangrove derived products Focuses on biotechnological utilization of mangrove resources such as antimicrobial and antioxidant properties of microorganisms and industrial and pharmaceutical applications Discusses the different modern tools and techniques used for the study of mangrove resources

**A Comprehensive Exploration of Soil, Water, and Air Pollution in Agriculture** Dr. Atin Kumar Dr. Deepak Kumar Dr. Jitendra Singh Dr. Rohit Kumar, 2024-02-09 Dive into the intricate world of agricultural sustainability and environmental health with A Comprehensive Exploration of Soil Water and Air Pollution in Agriculture Edited by Atin Kumar Jitendra Singh Deepak Kumar and Rohit Kumar this illuminating volume brings together leading experts to unravel the complex web of challenges posed by agricultural practices on our planet From historical perspectives on the evolution of farming to innovative solutions for pollution reduction each chapter delves into a crucial aspect of the intricate relationship between agriculture and environmental well being Readers will embark on a journey through the types and sources of agricultural pollution the consequences of soil contamination and the far reaching impacts on air and water quality The book scrutinizes the health effects and ecological consequences providing a comprehensive understanding of the intricate connections between farming practices and the environment This thought provoking work doesn't just stop at identifying problems it offers a plethora of sustainable farming practices soil conservation strategies and cutting edge technologies for pollution reduction From nanotechnology for soil remediation to microbial solutions the book explores innovative pathways to address the environmental challenges posed by agriculture Future Directions guides readers towards a sustainable tomorrow outlining a roadmap for reducing pollution and fostering ecological health in agriculture Whether you are a researcher policymaker or environmentally conscious reader this book is an essential guide to navigating the intersection of agriculture and environmental stewardship A Comprehensive Exploration of Soil Water and Air Pollution in Agriculture is a beacon for those committed to a greener more sustainable future

*Organic Farming for Sustainable Horticulture* P. Parvatha Reddy, 2012-06-01 Horticulture is fast emerging as a major commercial venture because of higher remuneration per unit area and the realization that consumption of fruits and vegetables is essential for health and nutrition In the last one decade export potential of horticultural crops has significantly increased attracting even multinationals into floriculture processing and value added products Since the horticultural produce especially fruits and vegetables are consumed afresh consumers expect residue free produce In modern society where consumers are becoming increasingly health conscious and environmentally aware a major market for organic foods has developed The organic sector in particular has sprung back into life to become one of the most dynamic sectors in the

international food market The present book is an attempt which comprehensively deals with both principles and practices It is divided into two parts The first part deals with the principles of organic farming covering aspects such as enrichment of soil with organic matter cropping systems bio fertilizers weed management and pest management The second part of the book deals with package of practice for organic farming in fruits vegetables ornamentals medicinal aromatic plantation spice and tuber crops Three aspects namely nutrient management weed management and pest management are dealt with separately for each crop An entire chapter is devoted for sources of critical inputs used for organic farming which would be very much useful to the organic farmers to procure the same This book is a practical guide to practicing organic farmers of horticulture crops Further it is a useful reference to policy makers research workers and students The material can also be used for teaching undergraduate and post graduate courses

Underutilized and Underexploited Horticultural Crops: Vol.04 K.V. This volume examines the transitions in Indian agriculture since the 1980s and emphasizes upon the role of neoliberal policies and their impact The essays presented here deal with a range of pertinent and contemporary issues including global food security livelihoods of agricultural labourers and public and private investment These weave together glimpses of the impasse faced by petty commodity producers marginal and small farmers and their subsequent economic distress and social exclusion Comprehensive in analysis this book will be useful to scholars and researchers of agricultural economics political economy political science and public policy **From Classical Breeding to Modern Biotechnological Advancement in Horticultural Crops - Trait Improvement and Stress Resilience, volume II** Mohammad Irfan,Pankaj Kumar

,Mohammed Wasim Siddiqui,2025-04-29 Horticultural crops such as fruits vegetables medicinal aromatic and ornamental plants are used to diversify the human diet improve health and enhance our living environment Horticultural crops particularly fruits and vegetables are excellent sources of antioxidants minerals vitamins fibers carbohydrates and organic acids required for the human diet whereas ornamentals are worth of aesthetic nature Pre and post harvest quantitative and qualitative losses in horticulture crops have always been a concern for farmers and consumers The yield and nutritional quality of horticultural crops are significantly limited by abiotic and biotic stresses Furthermore the perishable nature of horticultural produce results in huge post harvest loss of fruits and vegetables particularly in developing countries Therefore developing approaches and tools for improving pre and post harvest quality attributes and stress resilience is critical for sustainable crop production and diversification *Recent Advancement in White Biotechnology Through Fungi* Ajar Nath Yadav,Sangram Singh,Shashank Mishra,Arti Gupta,2019-04-24 White biotechnology is industrial biotechnology dealing with various biotech products through applications of microbes The main application of white biotechnology is commercial production of various useful organic substances such as acetic acid citric acid acetone glycerine etc and antibiotics like penicillin streptomycin mitomycin etc and value added product through the use of microorganisms especially fungi and bacteria The value added products included bioactive compounds secondary metabolites pigments and industrially important enzymes for potential applications in agriculture pharmaceuticals medicine and allied sectors for human welfare In the 21st century techniques were developed to harness fungi to protect human health through antibiotics antimicrobial immunosuppressive agents value added products etc which led to industrial scale production of enzymes alkaloids detergents acids biosurfactants The first large scale industrial applications of modern biotechnology have been made in the areas of food and animal feed production agricultural green biotechnology and pharmaceuticals medical red biotechnology In contrast the production of bio active compounds through fermentation or enzymatic conversion is known industrial or white biotechnology The beneficial fungal strains may play important role in agriculture industry and the medical sectors The beneficial fungi play

a significance role in plant growth promotion and soil fertility using both direct solubilization of phosphorus potassium and zinc production of indole acetic acid gibberellic acid cytokinin and siderophores and indirect production of hydrolytic enzymes siderophores ammonia hydrogen cyanides and antibiotics mechanisms of plant growth promotion for sustainable agriculture The fungal strains and their products enzymes bio active compounds and secondary metabolites are very useful for industry The discovery of antibiotics is a milestone in the development of white biotechnology Since then white biotechnology has steadily developed and now plays a key role in several industrial sectors providing both high valued nutraceuticals and pharmaceutical products The fungal strains and bio active compounds also play important role in the environmental cleaning This volume covers the latest research developments related to value added products in white biotechnology through fungi

*Handbook of Spices in India: 75 Years of Research and Development* P N Ravindran,K Sivaraman,S Devasahayam,K Nirmal Babu,2024-06-24 This compendium presents comprehensive information on more than 25 important spice crops commercially grown in India and traded globally apart from over 40 spices that have the potential to be popularized In 70 chapters the book covers the achievements in research and development made in India for the past 75 years in various organizations including research institutes agricultural universities and private sector laboratories Spices are natural products of plant origin used primarily for flavouring and seasoning or for adding pungency and flavour to foods and beverages The flavour and fragrance of Indian spices had a magic spell on human culture since very ancient days The importance of spices in Indian life and its contribution to the economy are substantial India as the world s leading producer of spices is also a significant stakeholder in spices export trade globally Indian spices being sources of many high value compounds are also gaining much importance for other diversified uses especially for their pharmaceutical and nutraceutical properties A wide variety of 52 spices are grown in India including black pepper chillies cardamom ginger turmeric cinnamon nutmeg garlic onion cumin coriander saffron and vanilla This book complies a comprehensive holistic review on the subject written by the best experts in the field in India representing diverse agencies This book is a single point reference book for all those involved in the research study teaching and use of spices in India and abroad

**Sustainable Management of Soil and Environment** Ram Swaroop Meena,Sandeep Kumar,Jitendra Singh Bohra,Mangi Lal Jat,2019-10-02 Fertilizers have been used extensively around the globe since the Green Revolution due to the high subsidies However extensive fertilizer use exacerbates soil degradation and causes yield stagnation and as a result threatens food security and soil sustainability especially in developing countries This means that sustainable soil and environmental management are vital to provide food and nutritional security for present and future generations This has led to the International Union of Soil Science IUSS declaring 2015 2024 the International Decade of Soils This book focuses on the impact of sustainable management of soil and environment on improving the functioning of soil ecosystems and agronomic productivity and also discusses food security nutrient cycling recent advances in INM technologies eco friendly cultivation agricultural practices to

reduce greenhouse gas GHG emissions as well as conservation agriculture and its effects and strategies for soil sustainability  
Offering a comprehensive overview of management in the context of the sustainability of soil and the agroecosystems that it
