an opportunity to understand how to manage their businesses via the Baldrige framework defines methods that they can use to improve operations and ensures that those methods are appropriate and aligned to meet their needs The tools in this book are proven and practical but innovative methods developed by internal teams are even better International Case Studies in Food Tourism Aise Kim,Gürhan Aktaş,Metin Kozak,2025-05-08 This international case study book provides 28 expertly curated case studies on the topic of food tourism each with detailed implementation instructions for the instructor to maximise student participation and learning Embellished with questions diagrams and data throughout these case studies have been developed by academic and industry experts with the aim of creating a more interactive teaching experience focused on real world scenarios within food tourism Each case study is logically structured and includes an aim and objectives expected learning outcomes required background knowledge steps of implementation in class or online as well as suggestions for further reading resources Topics covered range from locally oriented gastronomy identity to innovation and sustainability with the aim of preparing future professionals and equipping them with the necessary skills and competencies to succeed within the industry Easy to use and international in scope this volume is an ideal study resource for use in higher and vocational education and its unique teaching led approach positions it as a vital study tool for instructors and students alike Basic Strategy in Context Neil Thomson,Charles Baden-Fuller,2010-06-01 Basic Strategy in Context centres on real world firms and managers by giving each chapter s cases a higher weighting in importance and explanation than is normal Given this emphasis on real world as opposed to theoretical treatment the book enables the solving of practical business problems like those below This emphasis on reality is cemented by the book s treatment of diversity as being the norm highlighted through European business cases from different countries Giving example answers and links from case to theory rams home further the expected usefulness of the book to students about to enter industry Often theory and cases are treated as different and separated topics we believe that our integrated didactic treatment is quite unique Finally we use the basic theories of strategy and then show how these mainly simple concepts can be extended to solve tricky business problems anywhere in any industry Here is a sample of specific practical problems to which this book can show solutions Why are resources important and how are they leveraged Using the case of a British failure Railtrack we show the fatal consequences of neglecting existing resources and then in a completely different country and industry Carlo Gavazzi Space in Italy how resources can be utilised from outside the firm to achieve leverage Given our emphasis on diversity we highlight successful change in a foreign and inflexible environment Japan and Carlos Ghosn But can change be planned Sometimes events or luck sabotage the best intentions as shown in the Samsung case The book differentiates itself from the competition in four ways Cases form the highlight of the book Taking European and some international cases as the starting point the objective is to link themes or topics to a description of their effect on the firm The linkage will occur at the relevant point in the case not in a separate section or in another book The author team has used several longitudinal cases spread over a 15 20 year period

The longitudinal cases are supported by some new non longitudinal cases selected from award winning cases associated with the LRP Journal and the Gate2Growth Academic Network We feel such an emphasis on cases is a novel feature The theory is explained using a range of modern didactic methods not usually found in competitive offerings Examples include colour coded and highlighted links from the theory to the case questions inside each theory section with model answers and unanswered questions to test the student s grasp of the concepts The book features a mixture of cases from short specific to academically challenging ones Too often superficial cases are placed at the end of chapters in strategy theory books They are picked to emphasize the topics of the preceding chapters The result is spoon feeding with little need or motivation to provoke individual thought or learning The cases in this book are comprehensive approximately 20 pages in length with ample quantitative and qualitative data thus forcing a modicum of effort from the student Shorter cases are also included for ease of understanding and instructor flexibility Another differentiating feature is the emphasis on diversity hence the use of European as opposed to US based cases
