Economic Efficiency Ben Van Rompuy,2012-08-01 Over the past decade we have witnessed an apparent convergence of views among competition agency officials in the European Union and the United States on the appropriate goals of competition law enforcement Antitrust policy it is now suggested should focus on enhancing economic efficiency which we are to believe will promote consumer welfare Recent EU Commission Guidelines on the application of Article 101 TFEU appear to banish considerations that cannot be construed as having an economic efficiency value such as the environment cultural policy employment public health and consumer protection from the application of Article 101 TFEU Arguing that the professed adoption of an exclusive efficiency approach to Article 101 TFEU does not preclude but rather obfuscates the role of non efficiency considerations the author of this timely contribution accomplishes the following objectives traces the genesis of the shift to an efficiency orientation in EU and US antitrust policy and dispels several ingrained misconceptions that underpin it demonstrates the close interrelationship between evolving images of the purpose of antitrust the development of related enforcement norms and enforcement output provides in depth analyses of a number of analytically rich cases in the audiovisual sector and particularly those related to sports rights and explores what the role of non efficiency considerations in the application of Article 101 TFEU could and should be under the modernized enforcement regime

Regulation in Israel Eyal Tevet,Varda Shiffer,Itzhak Galnoor,2020-12-14 This book examines de facto regulation frameworks and methods in a variety of areas such as banking transportation cyberspace the

non profit sector and more. Authored by experts in the field this book deals with the big questions about the idea of regulation. It reveals the tentativeness of current regulatory schemes, the difficulties in balancing between the shared objective of protecting the public interest and other interests such as market stability and promoting competition. The case studies point to the need for better planning and for more coherent policies. This collection offers to students of public policy management and law, policy makers and practitioners a broad spectrum of insights, theoretical and practical, and contributes to the ongoing deliberations on the ways that regulatory arrangements could serve the public interest more efficiently. **Third Party**

Funding Gian Marco Solas, 2019-09-26 Looks at legal, economic and policy issues related to third party funding in common law, civil law jurisdictions and international contexts. *Development Economics* Julie Schaffner, 2013-10-07 Development Economics Theory: Empirical Research and Policy Analysis by Julie Schaffner teaches students to think about development in a way that is disciplined by economic theory informed by cutting edge empirical research and connected in a practical way to contemporary development efforts. It lays out a framework for the study of developing economies that is built on microeconomic foundations and that highlights the importance in development studies of transaction and transportation costs, risk, information problems, institutional rules and norms, and insights from behavioral economics. It then presents a systematic approach to policy analysis and applies the approach to policies from around the world in the areas of targeted transfers, workfare, agricultural markets, infrastructure, education, agricultural technology, microfinance and health. *The Right(s) to Water* Pierre Thielbörger, 2013-09-30 Politicians and diplomats have for many years proclaimed a human right to water as a solution to the global water crisis, most recently in the 2010 UN General Assembly Resolution. The human right to water and sanitation: To what extent, however, can a right to water legally and philosophically exist and what difference to international law and politics can it make? This question lies at the heart of this book. The book's answer is to argue that a right to water exists under international law but in a more differentiated and multi level manner than previously recognised. Rather than existing as a singular and comprehensive right, the right to water should be understood as a composite right of different layers, both deriving from separate rights to health, life and an adequate standard of living and supported by an array of regional and national rights. The author also examines the right at a conceptual level. After disproving some of the theoretical objections to the category of socio-economic rights generally and the concept of a right to water more specifically, the manuscript develops an innovative approach towards the interplay of different rights to water among different legal orders. The book argues for an approach to human rights including the right to water as international minimum standards, using the right to water as a model case to demonstrate how multilevel human rights protection can function effectively. The book also addresses a crucial last question: how does one make an international right to water meaningful in practice? The manuscript identifies three crucial criteria in order to strengthen such a composite derived right in practice: independent monitoring, enforcement towards the private sector and international realization. The author examines to what extent these

criteria are currently adhered to and suggests practical ways of how they could be better met in the future

Generic Top-Level Domains Tobias Mahler, 2019 This topical book examines the regulatory framework for introducing generic Top Level Domains on the Internet Drawn up by the Internet Corporation for Assigned Names and Numbers ICANN these rules form part of a growing body of transnational private regulation complementing national and international law The book elucidates and discusses how ICANN has tackled a diverse set of economic and regulatory issues including competition consumer protection property rights procedural fairness and the resolution of disputes
