Medienkriege Hans-Joachim Ruff-Stahl, 2011-11-19. Warum verlieren die hochgerüsteten Armeen des Westens seit Jahrzehnten quasi jeden Krieg? Hans-Joachim Ruff-Stahl untersucht das militärische Scheitern anhand dreier Fallstudien: der Strategie des Netcentric Warfare, der Effektbasierten Operationen sowie den Counterinsurgency Operations oder des Comprehensive Approach. Das Scheitern so wird argumentiert, liegt im Faktor Mensch begründet am missverstandenen Wesen des Medienkrieges.

Macht und Machtverschiebung Hendrik W. Ohnesorge, 2022-10-24. Die Festschrift zu Ehren des 65. Geburtstages von Professor Xuewu Gu versammelt Beiträge zu zwei eng miteinander verwobenen Schlüsselphänomenen in den internationalen Beziehungen: Macht und Machtverschiebungen. Verschiedene Erscheinungsformen der Macht werden dabei ebenso berücksichtigt wie jüngste geopolitische Entwicklungen. Folglich wird theoretische Grundlagenforschung mit empirischen Untersuchungen zu einflussreichen Akteuren auf der internationalen Bühne kombiniert, insbesondere der Volksrepublik China, Russland, der Europäischen Union und den Vereinigten Staaten von Amerika. Der Band, der sich gleichermaßen an Studierende, Forschende und Praktiker:innen internationaler Politik richtet, bietet damit einen fundierten Einblick in das Werk des Jubilars und stellt gleichzeitig einen wichtigen und hochaktuellen Beitrag zur Machtforschung dar. From a Multiethnic Empire to a Nation of Nations Annemarie Steidl, Wladimir Fischer-Nebmaier, James W. Oberly, 2017-02-27. A Transatlantic Experience. The book describes the transatlantic experience of migrants from Imperial Austria and the Kingdom of Hungary who arrived in the US from the middle of the nineteenth century up to the outbreak of WWI. Traditional assumptions of mass migration, such as the rapid and easy Americanization of newly arriving Europeans as well as their strong desire of retaining as much of native culture as possible, have been challenged by recent historical studies. Multiethnic Groups. The socio-economic, demographic and cultural analyses presented in this book offer a much more differentiated picture of the migrants who struggled for new living space amidst hostile industrial environments. This study breaks new ground by examining migration broadly between the Habsburg Monarchy and North America and return migration to Central Europe, including the study of a variety of ethnic and religious groups who originated in different regions. This book offers a scientific investigation of the circumstances under which Austro-Hungarians migrated to the United States in order to find new opportunities while trying to keep up their traditional values.

China-India Economics Amitendu Palit, 2017-07-05. A review of the existing literature on the China-India comparative

theme conveys the distinct impression that the literature largely projects China and India as intrinsically competitive entities. While much has been written on where and why China and India are contesting particularly from a political sense, very little attention has been devoted to mutual collaboration, whether existing or potential. Such possibilities are at their greatest in economics, which will dominate the future China-India relationship. This book explores Sino-Indian ties from a comparative economic perspective and argues that it is erroneous to visualise the ties either from exclusively competitive or collaborative perspectives. The future relationship between the two countries will be characterised simultaneously by two C's: competition and collaboration, which are both linked to common challenges facing them. Arguing that while competition in the economic sphere is inevitable given their size and aspirations, the book contends that negative externalities from competition will encourage both countries to collaborate and expand the scope of such collaboration. The book's refreshing angle makes it a must-read for those interested in Sino-Indian relationship.

Global Environmental Politics Pamela S. Chasek, 2018-05-04

For more than twenty years *Global Environmental Politics* has provided an up-to-date, accurate and unbiased introduction to the world's most pressing environmental issues. This new edition continues this tradition while covering critical new developments in the field. Through case studies on key issues such as climate change, toxic chemicals and biodiversity loss, the authors detail the development of major environmental regimes. With new material on the adoption of global Sustainable Development Goals and the 2030 Agenda for Sustainable Development, the December 2015 Paris Climate Change conference and recent meetings of major conventions on desertification, biological diversity and more, the authors present a comprehensive overview of contemporary international environmental politics. *Global Environmental Politics* is vital reading for any student wishing to understand the current state of the field and to make informed decisions about which policies might best safeguard our environment for the future.

The Palgrave Handbook of Society, Culture and Outer Space James S. Ormrod, Peter Dickens, 2017-09-11

Societies have always been formed in a relationship with the rest of the universe. With rapid developments in satellite communications and imaging, space exploration and tourism, military space technology and cosmology, itself, relationships with outer space are changing. These changes have inspired a wave of critical academic work in recent years re-examining the history, present and future of outer space and the place of humans within it. This handbook provides an in-depth exploration of major themes relating to society, culture and the universe and will inspire and cultivate debate in this exciting and burgeoning area of study for future researchers and theorists. Bringing together scholarship from a range of disciplines including geography, economics, history, political science, sociology, philosophy, science and technology studies, law, cultural astronomy, anthropology, media studies, literature, psychosocial studies and art, it closely examines how outer space is socially produced, experienced, perceived and imagined and the significance of this for terrestrial social life.

The Law and Politics of Sustainability Klaus Bosselmann, Daniel S. Fogel, J.B. Ruhl, Patricia Wouters, 2010-11-30

The *Law and Politics of Sustainability* explores efforts made to address pressing environmental concerns through legislation.

conventions directives treaties and protocols Articles explain the mechanics of environmental law the concepts that shape sustainable development case studies and rulings that have set precedents approaches to sustainable development taken by legal systems around the world and more Experts and scholars in the field raise provocative questions about the effectiveness of international law versus national law in protecting the environment and about the effect of current laws on future generations They analyze the successes and shortcomings of present legal instruments corporate and public policies social movements and conceptual strategies offering readers a preview of the steps necessary to develop laws and policies that will promote genuine sustainability

Self-Determination and Secession Natalija Shikova, 2023-08-28 This book offers a comprehensive summary of extant international law scholarship on the topics of self determination and secession and positions the concepts among present day theory and relevant practice illustrated through various ongoing cases and historical examples The right to self determination is among the least understood rights within international law Theoretical dilemmas as to whether there is a link between self determination and secession are nothing new In essence self determination is a much broader concept than secession and obtaining independent statehood Unilateral secession is not prohibited by international law but neither is it per se welcomed or accepted in practice Beyond the context of decolonization secession claims have long been viewed with disapproval in international law and lawyers have been extremely skeptical about the issue Although this is still the case there are also new trends and opportunities to explore situations in which secession can be accepted legitimized or even legally permissible The yardstick for this is the diplomatic response to secessionism and the growing involvement of the international community in mediation and conflict resolution Though finding solutions can be difficult within the existing frame the ongoing tension between the duty of every society to recognize pluralism and diversity on the one hand and the inherent desire of every culture whether majority minority or indigenous to protect its values and ensure conformity on the other must be resolved The practices and modalities that envisage the internal dimension of the right to self determination as a right that is exercised within the state borders can offer such opportunities The appropriate role of the state and the international community is to serve as mediators between competing forces and to set parameters that can transform destructive conflicts into productive political models

Energie- und geopolitische Akteure im Südkaukasus Andranik Eduard Aslanyan, 2019-11-11 Andranik Eduard Aslanyan analysiert mit Blick auf Geographie Geschichte und Interessen die Macht und Energiepolitiken von Russland dem Iran der Türkei den USA sowie der EU als externe Akteure im Südkaukasus Es ist eine Region mit dem Strukturmuster von frozen conflicts Die nach dem Zusammenbruch der Sowjetunion hier gegründeten neuen kleinen Staaten versuchen ihre nur schmalen politischen Gestaltungsspielräume zu nutzen sich aus dem Griff von bloßen Objekten externer Mächte zu lösen um sich als politisch selbstbestimmte politische Subjekte zu behaupten

The Politics of Canadian Foreign Policy, Fourth Edition Kim Richard Nossal, Stéphane Roussel, Stéphane Paquin, 2015-12-07 The fourth edition of this widely used text includes updates

about the many changes that have occurred in Canadian foreign policy under Stephen Harper and the Conservatives between 2006 and 2015. Subjects discussed include the fading emphasis on internationalism, the rise of a new foreign policy agenda that is increasingly shaped by domestic political imperatives and the changing organization of Canada's foreign policy bureaucracy. As in previous editions, this volume analyzes the deeply political context of how foreign policy is made in Canada. Taking a broad historical perspective, Kim Nossal, Stéphane Roussel, and Stéphane Paquin provide readers with the key foundations for the study of Canadian foreign policy. They argue that foreign policy is forged in the nexus of politics at three levels: the global, the domestic, and the governmental, and that to understand how and why Canadian foreign policy looks the way it does, one must look at the interplay of all three.

[The Globalization of World Politics](#) John Baylis, Steve Smith, Patricia Owens, 2011. Now in its fifth edition, this title has been fully revised and updated in the light of recent developments in world politics with new chapters on the changing nature of war, human security, and international ethics.

The Politics of the Environment Neil Carter, 2018-08-09. Environmental problems are firmly on the political agenda. The stark threat to the planet from climate change, biodiversity loss, and pollution can no longer be ignored by governments, political parties, businesses, or individuals. Responding to the considerable developments of the last decade, Neil Carter has updated his popular textbook thoroughly while retaining the existing structure of previous editions. *The Politics of the Environment* continues to analyse the relationship between green ideas and other political doctrines, the development of green parties, and public policymaking and environmental issues at international, national, and local levels. It provides students with a comprehensive comparative introduction to ideas, activism, and policy. New to this edition are discussions on climate justice, climate legislation, and recent environmental struggles such as demonstrations against fracking. It employs a variety of global examples and includes pedagogical features such as boxes, a glossary, and guides to further study.

Emerging Technologies and International Security Reuben Steff, Joe Burton, Simona R. Soare, 2020-11-25. This book offers a multidisciplinary analysis of emerging technologies and their impact on the new international security environment across three levels of analysis. While recent technological developments such as Artificial Intelligence, AI, robotics, and automation have the potential to transform international relations in positive ways, they also pose challenges to peace and security and raise new ethical, legal, and political questions about the use of power and the role of humans in war and conflict. This book makes a contribution to these debates by considering emerging technologies across three levels of analysis: 1. the international system/systemic level, including the balance of power; 2. the state and its role in international affairs, and how these technologies are redefining and challenging the state's traditional roles; and 3. the relationship between the state and society, including how these technologies affect individuals and non-state actors. This provides specific insights at each of these levels and generates a better understanding of the connections between the international and the local when it comes to technological advance across time and space. The chapters examine the implications of these technologies for the balance

of power examining the strategies of the US Russia and China to harness AI robotics and automation and how their militaries and private corporations are responding how smaller and less powerful states and non state actors are adjusting the political ethical and legal implications of AI and automation what these technologies mean for how war and power is understood and utilized in the 21st century and how these technologies diffuse power away from the state to society individuals and non state actors This volume will be of much interest to students of international security science and technology studies law philosophy and international relations *Gender, Race, and Power* Joyce P. Kaufman, Kristen P. Williams, 2024-10-02

Kaufman and Williams present critical issues in international relations through an intersectional approach that examines race gender class ethnicity and power to arrive at better explanations for such core IR issues as war and peace security human rights development and international political economy and the global environment Their approach builds on early calls amongst feminist IR theorists imploring Where are the women It is only fairly recently that students of IR have broadened the approach to the field to incorporate the dimensions of race ethnicity and class as well as gender Kaufman and Williams help guide readers exploring questions like How does gender matter for understanding war and peace How does race matter Where are the men What is intersectionality in IR How does an intersectional approach change or broaden our understanding of international relations
