## **Philosophy In The Classroom By Matthew Lipman:**

*Philosophy in the Classroom* Frederick S. Oscanyan, Matthew Lipman, Ann Margaret Sharp, Philosophy Goes To School Matthew Lipman, 1988-05-10 Ten years ago *Philosophy in the Classroom* by Lipman Sharp and Oscanyan hailed the emergence of philosophy as a novel although in some ways highly traditional elementary school discipline In this sequel Matthew Lipman examines the impact that elementary school philosophy has had and may yet have upon the process of education Going beyond his earlier work to describe the contribution that training in philosophy can make in the teaching of values he shows the applications of ethics in civics education and the ways in which aesthetics can be incorporated into areas of the curriculum related to the development of creativity Making reference to the contemporary educational scene Lipman compares the K 12 Philosophy for Children curriculum to the many unsatisfactory solutions being offered in our current drive for educational excellence He addresses the relationship of elementary school philosophy to educational reform in the areas of science language social studies and writing And he shows how philosophy can be instrumental in the difficult task of teaching values to children while avoiding both ideological indoctrination and mindless relativism *Thinking in Education* Matthew Lipman, 2003-01-20 In our increasingly complex world the teaching of thinking has become imperative Yet evidence shows that our children are not learning how to think Matthew Lipman a leading educational theorist gets to the heart of our educational problems in *Thinking in Education* and makes profound and workable suggestions for solving those problems *Thinking in Education* describes procedures that must be put in place if students at all levels of education are to become more thoughtful more reasonable and more judicious It recommends that the classroom be converted into a community of inquiry and that the discipline of philosophy be redesigned so as to provide the concepts and values now missing from the curriculum These recommendations have now been carried out the community of inquiry is a recognized pedagogical strategy and traditional academic philosophy has been transformed into a discipline that offers a model of higher order thinking and an image of what all education can be Copyright Libri GmbH All rights reserved **Philosophers in the Classroom** Steven M. Cahn, Alexandra Bradner, Andrew P. Mills, 2018-09-15 In these essays 24 of our most celebrated professors of philosophy address the problem of how to teach philosophy today how to make philosophy interesting and relevant how to bring classic texts to life how to serve all students and how to align philosophy with more practical pursuits Selected and introduced by three leaders in the world of philosophical education the insights contained in this inspiring collection illuminate the challenges and possibilities of teaching the academy's oldest discipline Matthew Lipman and Ann Margaret Sharp Roberto Franzini Tibaldeo, 2023-03-14 This book explores the contribution to education contained in the theoretical work and teaching practice of Matthew Lipman 1923 2010 and Ann Margaret Sharp 1942 2010 Their long lasting cooperation gave rise to the well known Philosophy for Children P4C curriculum which is nowadays globally widespread P4C basically relies on the following innovations firstly the unprecedented connection between philosophy and childhood secondly

the reframing of philosophy in practical viz not reductively theoretical terms thirdly the employment of philosophy to foster democracy and moral capabilities through the development of children s thoughtfulness and autonomous thinking which would eventually result in empowering children s social abilities and increasing their self defence against consumerism propaganda and manipulation finally the stand against a strictly cognitivist approach to education More than just contextualizing these innovations in the coeval historical and social context the author shows that P4C s revolutionary stance on education relies on the fruitfulness of Lipman and Sharp s intellectual cooperation and on their manifold abilities as researchers teachers trainers communicators motivators and community builders The book analyzes their philosophical educational vision and the scholastic curriculum they developed jointly additionally it provides a critical appraisal of P4C s achievements as well as of its future perspectives

**Philosophy and the Study of Education** Tom Feldges, 2019-03-26 Combining contributions from international academics and practitioners this new text develops students ability to philosophise as well as learn about philosophy and education It considers issues concerned with the interface between education and wider society but goes beyond this to explore education and philosophy at a micro level the teacher learner relationship It challenges and empowers students to use philosophy as a tool within education as a set of theories to understand education and as a potential means to develop solutions to problems as they occur within practice Assuming no pre existing philosophical background *Philosophy and the Study of Education* explores complex topics including encouraging young people to criticise and challenge all authority the limits of a religious based education the desire for alternative facts or truths the second class status of vocational pursuits the inherent struggle in the teacher student relationship the relationship between emotion morality and autonomy in teaching Including discussion questions and further recommended reading this thought providing book will support and inspire all those on Education Studies Childhood Studies and Youth Studies courses in developing a critical perspective and understanding the true value of philosophy within education
