without even realizing it all of which is happening when the stakes are high and you're under pressure as you try to ensure the company's success. Being an entrepreneur requires taking risks as I'm sure you were aware when you signed up. And in this critical infant stage of your business you know that if it doesn't work out you may never recover from the loss of resources and self-esteem. This scenario is stressful and frustrating enough. Add a partner's expectations and differences of opinion and it can have disastrous results. Now consider if that partner is a close friend or even a spouse. Don't get me wrong I'm certainly not suggesting that you should go it alone. Having a business partner can be incredibly advantageous since that means you're sharing risk, responsibility and financial investments. Considering these types of assets, having a partner may even be the difference between being able to start a company vs. falling short of having the resources you'd need to even begin. However, with that said, there are certain aspects of the partnership arrangement that you need to think about, talk about with your partner, and formalize in writing, yes even if they're your spouse. This book will lead you through the 9 specific components of business partnership that for the sake of your company, your own personal finances, and your peace of mind must be formalized in writing. It doesn't matter how well you think you know the person you are considering going into business with. The items covered in this book are absolutely crucial to the successful start and end of a partnership and may well be just what helps protect the relationship you had together before starting the business. If you are considering starting a business with a partner or if you are already in the process of doing so, then this book is a must read.
