Why Everyone Else Is A Hypocrite Evolution And The Modular Mind Robert Kurzban:

Why Everyone (Else) Is a Hypocrite Robert O. Kurzban, 2011-01-03 The evolutionary psychology behind human inconsistency We are all hypocrites Why Hypocrisy is the natural state of the human mind Robert Kurzban shows us that the key to understanding our behavioral inconsistencies lies in understanding the mind's design The human mind consists of many specialized units designed by the process of evolution by natural selection While these modules sometimes work together seamlessly they don't always resulting in impossibly contradictory beliefs vacillations between patience and impulsiveness violations of our supposed moral principles and overinflated views of ourselves This modular evolutionary psychological view of the mind undermines deeply held intuitions about ourselves as well as a range of scientific theories that require a self with consistent beliefs and preferences Modularity suggests that there is no I Instead each of us is a contentious we a collection of discrete but interacting systems whose constant conflicts shape our interactions with one another and our experience of the world In clear language full of wit and rich in examples Kurzban explains the roots and implications of our inconsistent minds and why it is perfectly natural to believe that everyone else is a hypocrite

Manorial Capitalism, Enslavement, and the Logic of Dividuation

Raphael Sassower,2025-03-31 Manorial Capitalism Enslavement and the Logic of Dividuation proffers three perspectives on the plantation slave economy of the Antebellum South The first explores the paternal function as exemplified in the structural authority of the lord of the manor both symbolically and operationally This figure of masculine authority persisted from the Medieval period to orchestrate what is called here Manorial Capitalism The second examines the exploitation and alienation that epitomize the logic of capitalism from the plantation economy to the present And the third deploys retroactively the logic of dividuation to the plantation a logic that draws its inspiration from neoliberal financial capitalism as well as from anthropological accounts which distinguish the dividual from the Cartesian Kantian individual This book argues that reducing individuals to dividuated components continues to enable a dehumanizing capitalist mindset to fixate on abstracted labor power rather than seeing laboring individuals

Disagreeing Virtuously Vainio, Olli-Pekka,2017 Disagreement is inevitable particularly in our current context marked by the close coexistence of conflicting values and perspectives in politics religion and ethics How can we deal with disagreement ethically and constructively in our pluralistic world In Disagreeing Virtuously Olli Pekka Vainio presents a valuable interdisciplinary approach to that question drawing on insights from intellectual history the cognitive sciences philosophy of religion and virtue theory After mapping the current discussion on disagreement among various disciplines Vainio offers fresh ways to understand the complicated nature of human disagreement and recommends ways to manage our interpersonal and intercommunal conflicts in ethically sustainable ways

The Specter of Hypocrisy Raphael Sassower,2020-11-16 Raphael Sassower examines the concept of hypocrisy for its strategic potential as a means of personal protection and social cohesion Given the contemporary context of post truth the examination of degrees or kinds of hypocrisy moves from the Greek etymology of masks worn on the theater stage to the Hebrew etymology of the color adjustment of chameleons to their environment Canonical presuppositions about the uniformity of the mind and the relation between intention and behavior that warrant the charge of hypocrisy are critically

reconsidered in order to appreciate both inherent inconsistencies in personal conduct and the different contexts where the hypocrisy appears Sassower considers the limits of analytic moral and political discourses that at times overlook the conditions under which putative hypocritical behavior is existentially required and where compromises yield positive results When used among friends the charge of hypocrisy is a useful tool with which to build trust and communities

Metacinema David LaRocca,2021-07-27 When a work of art shows an interest in its own status as a work of art either by reference to itself or to other works we have become accustomed to calling this move meta While scholars and critics have for decades acknowledged reflexivity in films it is only in Metacinema for the first time that a group of leading and emerging film theorists join to enthusiastically debate the meanings and implications of the meta for cinema In new essays on generative films including Rear Window 8 1 2 Holy Motors Funny Games Fight Club and Clouds of Sils Maria contributors chart explore and advance the ways in which metacinema is at once a mode of filmmaking and a heuristic for studying cinematic attributes What results is not just an engagement with certain practices and concepts in widespread use in the movies from Hollywood to global cinema from documentary to the experimental and avant garde but also the development of a veritable and vital new genre of film studies With more and more films expressing reflexivity recursion reference to other films mise en ab me seriality and exhibiting related intertextual and intermedial traits the time is overdue for the kind of capacious yet nuanced critical study found in Metacinema

A Sense of the Enemy Zachary Shore,2014-02-13 More than two thousand years ago the Chinese strategist Sun Tzu advised us to know our enemies The question has always been how In A Sense of the Enemy the historian Zachary Shore demonstrates that leaders can best understand an opponent not simply from his pattern of past behavior but from his behavior at pattern breaks Meaningful pattern breaks occur during dramatic deviations from the routine when the enemy imposes costs upon himself It s at these unexpected moments Shore explains that successful leaders can learn what makes their rivals truly tick Shore presents a uniquely revealing history of twentieth century conflict With vivid suspenseful prose he takes us into the minds of statesmen to see how they in turn tried to enter the minds of others In the process he shows how this type of mind reading which he calls strategic empathy shaped matters of war and peace Mahatma Gandhi for instance was an excellent strategic empath In the wake of a British massacre of unarmed Indian civilians how did Gandhi know that nonviolence could ever be effective And what of Gustav Stresemann the 21 year old Wunderkind Ph D who rose from lobbyist for chocolate makers to Chancellor of Germany How did he manage to resurrect his nation to great power status after its humiliating loss in World War One And then there is Le Duan the shadowy Marxist manipulator who was actually running North Vietnam during the 1960s as opposed to Ho Chi Minh How did this rigid ideologue so skillfully discern America s underlying constraints And armed with this awareness how did he construct a grand strategy to defeat the United States One key to all these leaders triumphs came from the enemy s behavior at pattern breaks Drawing on research from the cognitive sciences and tapping multilingual multinational sources Shore has crafted an

innovative history of the last century's most pivotal moments when lives and nations were on the line Through this curious study of strategic empathy we gain surprising insights into how great leaders think **Denial** Ajit Varki, Danny Brower, 2013-06-04 The history of science abounds with momentous theories that disrupted conventional wisdom and yet were eventually proven true Ajit Varki and Danny Brower's Mind over Reality theory is poised to be one such idea a concept that runs counter to commonly held notions about human evolution but that may hold the key to understanding why humans evolved as we did leaving all other related species far behind At a chance meeting in 2005 Brower a geneticist posed an unusual idea to Varki that he believed could explain the origins of human uniqueness among the world's species Why is there no humanlike elephant or humanlike dolphin despite millions of years of evolutionary opportunity Why is it that humans alone can understand the minds of others Haunted by their encounter Varki tried years later to contact Brower only to discover that he had died unexpectedly Inspired by an incomplete manuscript Brower left behind Denial presents a radical new theory on the origins of our species It was not the authors argue a biological leap that set humanity apart from other species but a psychological one namely the uniquely human ability to deny reality in the face of inarguable evidence including the willful ignorance of our own inevitable deaths The awareness of our own mortality could have caused anxieties that resulted in our avoiding the risks of competing to procreate an evolutionary dead end Humans therefore needed to evolve a mechanism for overcoming this hurdle the denial of reality As a consequence of this evolutionary quirk we now deny any aspects of reality that are not to our liking we smoke cigarettes eat unhealthy foods and avoid exercise knowing these habits are a prescription for an early death And so what has worked to establish our species could be our undoing if we continue to deny the consequences of unrealistic approaches to everything from personal health to financial risk taking to climate change On the other hand reality denial affords us many valuable attributes such as optimism confidence and courage in the face of long odds Presented in homage to Brower's original thinking Denial offers a powerful warning about the dangers inherent in our remarkable ability to ignore reality a gift that will either lead to our downfall or continue to be our greatest asset **Plastic Materialities** Brenna Bhandar, Jonathan Goldberg-Hiller, 2015-04-25 Catherine Malabou's concept of plasticity has influenced and inspired scholars from across disciplines The contributors to Plastic Materialities whose fields include political philosophy critical legal studies social theory literature and philosophy use Malabou's innovative combination of post structuralism and neuroscience to evaluate the political implications of her work They address among other things subjectivity science war the malleability of sexuality neoliberalism and economic theory indigenous and racial politics and the relationship between the human and non human Plastic Materialities also includes three essays by Malabou and an interview with her all of which bring her work into conversation with issues of sovereignty justice and social order for the first time Contributors Brenna Bhandar Silvana Carotenuto Jonathan Goldberg Hiller Jairus Victor Grove Catherine Kellogg Catherine Malabou Renisa Mawani Fred Moten Alain Pottage Michael J Shapiro Alberto Toscano Stolen Life Fred Moten, 2018-07-26

Taken as a trilogy consent not to be a single being is a monumental accomplishment a brilliant theoretical intervention that might be best described as a powerful case for blackness as a category of analysis Brent Hayes Edwards author of *Epistrophies Jazz and the Literary Imagination* In *Stolen Life* the second volume in his landmark trilogy consent not to be a single being Fred Moten undertakes an expansive exploration of blackness as it relates to black life and the collective refusal of social death The essays resist categorization moving from Moten's opening meditation on Kant Olaudah Equiano and the conditions of black thought through discussions of academic freedom writing and pedagogy non neurotypicality and uncritical notions of freedom Moten also models black study as a form of social life through an engagement with Fanon Hartman and Spillers and plumbs the distinction between blackness and black people in readings of Du Bois and Nahum Chandler The force and creativity of Moten's criticism resonate throughout reminding us not only of his importance as a thinker but of the continued necessity of interrogating blackness as a form of sociality

Foundations of Real-World Economics John Komlos, 2019-01-11 The 2008 financial crisis the rise of Trumpism and the other populist movements which have followed in their wake have grown out of the frustrations of those hurt by the economic policies advocated by conventional economists for generations Despite this textbooks continue to praise conventional policies such as deregulation and hyperglobalization This textbook demonstrates how misleading it can be to

apply oversimplified models of perfect competition to the real world The math works well on college blackboards but not so well on the Main Streets of America This volume explores the realities of oligopolies the real impact of the minimum wage the double edged sword of free trade and other ways in which powerful institutions cause distortions in the mainstream models Bringing together the work of key scholars such as Kahneman Minsky and Schumpeter this book demonstrates how we should take into account the inefficiencies that arise due to asymmetric information mental biases unequal distribution of wealth and power and the manipulation of demand This textbook offers students a valuable introductory text with insights into the workings of real markets not just imaginary ones formulated by blackboard economists A must have for students studying the principles of economics as well as micro and macroeconomics this textbook redresses the existing imbalance in economic teaching Instead of clinging to an ideology that only enriched the 1% Komlos sketches the outline of a capitalism with a human face an economy in which people live contented lives with dignity instead of focusing on GNP

The Sweet Spot Paul Bloom, 2021-11-04 What if experiencing a good life involves more than just pleasure Revealing the surprising roots of lasting happiness pre eminent psychologist Paul Bloom explains why suffering is an essential source of both pleasure and meaning in our lives It seems obvious that pleasure leads to happiness and pain does the opposite And yet we are irresistibly drawn to a host of experiences that truly hurt from the exhilarating fear of horror movies or extreme sport to the gruelling challenges of exercise work creativity and having a family Drawing on ground breaking findings pre eminent psychologist Paul Bloom explores the pleasures of suffering and reveals why the activities that provide the most satisfaction are often the ones that involve the greatest sacrifice Embracing this truth he shows is the key to a life well lived Paul Bloom can always be counted on to take your confident assumptions about humanity and turn them upside down Susan Cain author of Quiet An exhilarating antidote to toxic positivity this captivating book will challenge you to rethink your vision of a good life Adam Grant author of Think Again

What Every Economics Student Needs to Know and Doesn't Get in the Usual Principles Text John Komlos, 2015-07-17 This short book explores a core group of 40 topics that tend to go unexplored in an Introductory Economics course Though not a replacement for an introductory text the work is intended as a supplement to provoke further thought and discussion by juxtaposing blackboard models of the economy with empirical observations Each chapter starts with a short refresher of standard neoclassical economic modelling before getting into real world economic life Komlos shows how misleading it can be to mechanically apply the perfect competition model in an oligopolistic environment where only an insignificant share of economic activity takes place in perfectly competitive conditions Most economics texts introduce the notion of oligopoly and differentiate it from the perfect competition model with its focus on price takers Komlos contends that oligopolies are price makers like monopolies and cause consumers and economies nearly as much harm Likewise most textbook authors eschew any distortions of market pricing by government but there is usually little discussion of the real impact of minimum wages which Komlos corrects The book is an affordable supplement for all basic economics

courses or for anyone who wants to review the basic ideas of economics with clear eyes **Man darf sich nur nicht erwischen lassen** Matthias Nöllke, 2015-04-16 Ob im Privatleben oder im Beruf immer wieder erleben wir dass Menschen den inneren Schweinehund von der Leine lassen Sie schummeln sie l gen hintergehen andere und legen alles zu ihrem eigenen Vorteil aus Dabei gibt es klare Regeln Doch warum h lt sich niemand daran Die schockierende Wahrheit lautet Weil es Spa macht Es ist die Lust am bertritt die Freude die es uns bereitet wenn wir die Regeln f r uns selbst ein wenig ausdehnen oder uns einen kleinen Vorteil verschaffen Mit viel Humor geht der Autor den kleinen Sauereien auf den Grund und erkl rt warum wir manchmal winzige Sauereien f r unverzeihlich halten w hrend wir in schwerwiegenden F llen nachsichtiger sind Dabei zeigt er dass f r die kleinen Sauereien besonders diejenigen anf llig sind von denen wir es am allerwenigsten erwarten wir selbst **The Hidden Agenda of the Political Mind** Jason Weeden, Robert O.

Kurzban, 2016-09-06 Why your political views are more self serving than you think When it comes to politics we often perceive our own beliefs as fair and socially beneficial while seeing opposing views as merely self serving But in fact most political views are governed by self interest even if we usually don t realize it Challenging our fiercely held notions about what motivates us politically this book explores how self interest divides the public on a host of hot button issues from abortion and the legalization of marijuana to same sex marriage immigration affirmative action and income redistribution Expanding the notion of interests beyond simple economics Jason Weeden and Robert Kurzban look at how people s interests clash when it comes to their sex lives social status family and friends Drawing on a wealth of data they demonstrate how different groups form distinctive bundles of political positions that often stray far from what we typically think of as liberal or conservative They show how we engage in unconscious rationalization to justify our political positions portraying our own views as wise benevolent and principled while casting our opponents views as thoughtless and greedy While many books on politics seek to provide partisans with new ways to feel good about their own side The Hidden Agenda of the Political Mind illuminates the hidden drivers of our politics even if it s a picture neither side will find flattering **The Psychology of**
