Mad about Physics Christopher Jargodzki, Franklin Potter, 2002-02-28 Why is there eight times more ice in Antarctica than in the Arctic Why can you warm your hands by blowing gently and cool your hands by blowing hard Why would a pitcher scuff a baseball Which weighs more a pound of feathers or a pound of iron Let science experts Christopher Jargodzki and Franklin Potter guide you through the curiosities of physics and you'll find the answers to these and hundreds of other quirky conundrums You'll discover why sounds carry well over water especially in the summer how a mouse can be levitated in a magnetic field why backspin is so important when shooting a basketball and whether women are indeed as strong as men With nearly 400 questions and answers on everything from race cars to jumping fleas to vanishing elephants Mad about Physics presents a comprehensive collection of braintwisters and paradoxes that will challenge and entertain even the brainiest of science lovers Whether you're a physicist by trade or just want to give your brain a power workout this collection of intriguing and unusual physics challenges will send you on a highly entertaining ride that reveals the relevance of physics in our everyday lives

Science Matters Maria Burguete, Lui Lam, 2008 All earnest and honest human quests for

knowledge are efforts to understand Nature which includes both human and nonhuman systems the objects of study in science Thus broadly speaking all these quests are in the science domain The methods and tools used may be different for example the literary people use mainly their bodily sensors and their brain as the information processor while natural scientists may use in addition measuring instruments and computers Yet all these activities could be viewed in a unified perspective they are scientific developments at varying stages of maturity and have a lot to learn from each other That everything in Nature is part of science was well recognized by Aristotle da Vinci and many others Yet it is only recently with the advent of modern science and experiences gathered in the study of statistical physics complex systems and other disciplines that we know how the human related disciplines can be studied scientifically Science Matters is about all human dependent knowledge wherein humans the material system of Homo sapiens are studied scientifically from the perspective of complex systems It includes all the topics covered in the humanities and social sciences Containing contributions from knowledgeable humanists social scientists and physicists the book is intended for those from artists to scientists who are curious about the world and are interested in understanding it with a unified perspective *The Science Files* Richard Zurawski,2013-08-02T00:00:00Z Conventional wisdom has it that science is boring The Science Files an hourly radio call in talk show about science is anything but boring and certainly none of the listeners emailers or tweeters who participate in the call in radio talk show think science is boring either Richard Zurawski has been hosting The Science Files for eight years and has fielded literally thousands of questions This book The Science Files is about the questions that listeners have been asking about science and the way the world nature and the universe works Compiled by Zurawski the questions and answers in this book are lively engaging and interesting discussions about a wide range of topics Present throughout is Zurawski s passion for learning and his genuine fascination with the natural world Furthermore The Science Files is a dialogue that encourages readers and participants alike to continue to learn and to ask questions **Uncle John's Legendary Lost Bathroom**
