*Night Ride And Sunrise* Stanley Schmidt,2017-05-01 The Last Thing They Expected Was First Contact It s long ago been settled that humanity is all alone in the universe All the centuries of searches for extra terrestrial intelligence have turned up exactly nothing at all And when humanity s first and only colony in another star system was recently invaded it was by unwanted human interlopers from Earth interlopers calling themselves The Fruitful who are sure that God himself is guiding them The new arrivals caused trouble enough that many of the original settlers have packed up and moved elsewhere on the planet only to discover some very alarming signs that the first settlers aren t quite so alone as

they thought Phil Bertrand and Hazel Castagna had striven for years to reach and settle their new world only to find themselves on different sides when the Fruitful arrived and forced hard choices on everyone Now without quite intending it they have become allies again as well as the half unwilling leaders of a group that must find a way to protect humans from aliens and perhaps aliens from humans But exactly who and what are the aliens *Faint Echoes, Distant Stars* Ben Bova, 2009-10-13 Our neighboring planets may have the answer to this question Scientists have already identified ice caps on Mars and what appear to be enormous oceans underneath the ice of Jupiter's moons The atmosphere on Venus appeared harsh and insupportable of life composed of a toxic atmosphere and oceans of acid until scientists concluded that Earth's atmosphere was eerily similar billions of years ago An extraterrestrial colony in some form may already exist just awaiting discovery But the greatest impediment to such an important scientific discovery may not be technological but political No scientific endeavor can be launched without a budget and matters of money are within the arena of politicians Dr Ben Bova explores some of the key players and the arguments waged in a debate of both scientific and cultural priorities showing the emotions the controversy and the egos involved in arguably the most important scientific pursuit ever begun **Practices of Speculation** Jeanne Cortiel, Christine Hanke, Jan Simon Hutter, Colin Milburn, 2020-12-07 This volume offers innovative ways to think about speculation at a time when anticipation of catastrophe in an apocalyptic mode is the order of the day and shapes public discourse on a global scale It maps an interdisciplinary field of investigation the chapters interrogate hegemonic ways of shaping the present through investments in the future while also looking at speculative practices that reveal transformative potential The twelve contributions explore concrete instances of envisioning the open unknown and affirmative speculative potentials in history literature comics computer games mold research ecosystem science and artistic practice **To Crush the Moon** Wil McCarthy, 2005-05-31 In the conclusion to this epic interstellar adventure by Nebula Award nominee Wil McCarthy humanity stands at a crossroads as the heroes who fashioned a man made heaven must rescue their descendants from eternal damnation TO CRUSH THE MOON Once the Queendom of Sol was a glowing monument to humankind's loftiest dreams Ageless and immortal its citizens lived in peaceful splendor But as Sol buckled under the swell of an immorbid population space itself literally ran out Conrad Mursk has returned to Sol on the crippled starship Newhope His crew are the frozen refugees of a failed colony known as Barnard's Star A thousand years older Mursk finds Sol on the brink of rebellion while a fanatic necro cult is reviving death itself Now Mursk and his lover Captain Xiomara Xmary Li Weng are sent on a final desperate mission by King Bruno de Towaji one of the greatest terraformers of the ages to literally crush the moon If they succeed they'll save billions of lost souls If they fail they'll strand humanity between death and something unimaginably worse From the Paperback edition
