Resources in Education , 1999-04 Geography, Culture and Education Rod Gerber, M. Williams, 2013-04-17 An important challenge for our world is to understand how cultural understanding and geographical education can be linked and used to improve the global society We readily accept that our world is constituted by numerous groups of people who are organised by committees tribes regions nations or continental entities How these groups interact show concern for each others well being and progress is still an unpredictable activity Intercultural tensions racial conflicts and religious clashes have all led to the challenges for enacting a constructive world Fundamental perspectives challenge moderate ones and the resulting tensions produce elements of fear doubt and distrust The extremist views of terrorist groups exaggerate these tensions to the extent that some different cultural groups do not prefer to live in peace with their neighbours Deep seated intercultural tensions predominate over peaceful co existence Such challenges may easily dominate the interaction between racial groups tribes indigenous peoples and colonisers However we know that through the sound practice of intercultural

understanding cultural groups in different contexts around the world can interact and co exist successfully and productively In fact they can work together to seek to improve their society This does not mean that one group will dominate the other Rather it means that both groups work together to improve their collective lives Education has played an important role in the long term achievement of such harmony This volume has been developed to demonstrate that geographical education can be a potent force in the development of cultural understanding in different societies Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina,Balcerzak, Phyllis,O'Brien, Kathryn,2021-05-07 The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education There were questions surrounding the effectiveness of online trainings for teachers online teaching practices the motivation and engagement of students and the quality of learning and education in these times Action research emerged to address these concerns being a systematic process of inquiry using reflection within a cyclical model of planning acting implementing evaluating and continuous reflection This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences Using collaboration social advocacy and action research there is the opportunity to advance teaching for students families and communities without a physical context involved The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms This book showcases educational professionals action research for solutions in advancing teaching and learning the practical benefits of action research recommendations for improving online teaching and learning and a focus on professional growth as well as social justice advocacy It highlights important topics including student learning teacher collaboration authentic learning advocacy and action research in both K 12 and higher education settings This book is ideal for inservice and preservice teachers administrators teacher educators practitioners researchers academicians and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education

How Educational Ideologies Are Shaping Global Society Joel Spring,2014-04-08 In this book Joel Spring explores three major international educational ideologies that are shaping global society neo liberal educational ideology human rights education and environmentalism Neo liberal ideology reflects a rethinking of nationalist forms of education as the nation state slowly erodes under the power of a growing global civil society Traditional nationalist education attempts to mold loyal and patriotic citizens who are emotionally attached to symbols of the state whereas the goal of neo liberal educational ideology is to change nationalist education to serve the needs of the global economy These changes are fueling a clash between the ideas of free market and consumer based neo liberals and those of human rights and environmental educators Human rights education is concerned with creating activist global citizens It is rooted in the idea that inherent in human rights doctrines is a collective responsibility to ensure the rights of all people Environmentalism is the most radical of the ideologies because it rejects the industrial and consumerist paradigm that has dominated most economic thought including capitalism and communism Spring synthesizes and analyzes the effect of these educational ideologies on shaping the future of the global society In the concluding section he compares the effect of these ideologies on global society with the possibility of a world divided between conflicting civilizations *How Educational Ideologies Are Shaping Global Society* Intergovernmental Organizations NGOs and the Decline of the Nation State features a critical exploration of the transition of schooling from a function of the nation state to a globalized economic and political system a discussion of the major organizations and trading blocs shaping the future globalization of educational policies an analysis of the major competing global ideologies of education including national and corporate models that emphasize training workers for a competitive global free market the worldwide network of human rights and peace educators who are teaching a global set of ethics and the environmental movement s efforts to create a common set of educational standards for sustainable development and sustainable consumption and an exploration of the possible future of global educational policy and school organizations By integrating a wide range of previously scattered information within a bold new framework for understanding educational

ideologies and their impact on the global society Spring raises important questions for researchers professionals and students in history and philosophy of education educational policy educational studies comparative education multicultural education curriculum studies critical media studies global studies human rights education and related areas **The Other**

World Joseph N. Weatherby, Craig Arceneaux, Emmitt B. Evans, Dianne Long, Ira Reed, Olga D. Carter, 2016-01-08 The Other World combines a thematic and area studies approach to explore contemporary global issues in the developing world Accessible and interdisciplinary this text offers political economic social and historical analysis plus case studies on Latin America Sub Saharan Africa North Africa and the Middle East Central Asia and the Southern Near Abroad and Asia Highlighting similarities and differences among these regions and focusing on enduring problems The Other World is a practical look at the issues affecting the majority of the world's population **Directory of Distance Learning**

Opportunities Modoc Press, Inc., 2003-02-28 This book provides an overview of current K 12 courses and programs offered in the United States as correspondence study or via such electronic delivery systems as satellite cable or the Internet The Directory includes over 6 000 courses offered by 154 institutions or distance learning consortium members Following an introduction that describes existing practices and delivery methods the Directory offers three indexes Subject Index of Courses Offered by Level Course Level Index Geographic Index All information was supplied by the institutions Entries include current contact information a description of the institution and the courses offered grade level and admission information tuition and fee information enrollment periods delivery information equipment requirements credit and grading information library services and accreditation *Introducing Cultural Studies* Elaine Baldwin, 2004 Cultural studies is a new way of engaging in the study of culture which has emerged from the overlapping interests of other disciplines most notably anthropology history literary studies and sociology This is an introductory text *Global Perspectives in the Geography Curriculum* Alex Standish, 2008-10-07 For geographers across the globe this book provides the arguments for a return to the teaching of geography and why they should reject the politicisation of the subject by education policy makers and politicians Standish's careful critique shows the necessity of a depoliticised geography curriculum the irony of which would be that it would ensure that every child could point to Iraq Iran and Afghanistan on a map Prof Dennis Hayes Oxford Brookes University UK A prescient and critical analysis of the changing face of geography teaching This book deserves to be widely read and debated Alex Standish's book puts current trends in geography teaching in historical and critical context It comprises a forthright and timely defence of geographical education for its own sake Dr Jim Butcher FRSA Department of Sport Science Tourism and Leisure Canterbury Christ Church University Since the early 1990s educational policy makers and some subject leaders have been seeking to fundamentally change the teaching of geography in UK and US schools from a subject which encourages students to explore spatial concepts ideas and skills to a more ethics based subject concerned with the promotion of environmentalism cultural diversity and social justice In this book the new approach is critically examined

within a historical and ideological context addressing a number of fundamental questions Should geography be used as a tool for the delivery of citizenship ideals How does this affect the intellectual and moral value of geographical education for young people If the state and teachers are taking more responsibility for the values attitudes and emotional responses of students how will they learn to develop these qualities for themselves If global perspectives shift the focus of education from learning about the outside world to learning about the self what is its vision of social progress and conception of social change This book advocates a return to liberal models of education arguing that the new approach to geography currently being promoted for schools fundamentally undermines the educational value of the subject and the freedom of young people to shape the world in which they live A vital resource for teachers and student teachers alike Global Perspectives in the Geography Curriculum makes a significant contribution to the growing debate about the future direction of the discipline itself Teaching English Learners in Inclusive Classrooms Elva Durán,2006
