History of Technology Volume 29 Ian Inkster, 2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather educated gents practitioners instrument makers craftsfolk and technicians of all kinds intermingled both socially and in terms of the recognition of technical problems as well as in the assemblage of the mental commercial and cognitive resources required to pursue innovative production projects

Wisdom's Odyssey Peter A. Redpath, 2021-11-01 This book establishes that the ancient Greeks had a prevailing method of doing philosophy which was rooted in philosophical realism Through extensive historical and philosophical analysis it demonstrates that this method was challenged in ancient times by an apocryphal notion of philosophy which eventually became confused with philosophical reasoning and was passed on to posterity through the work of Christian theologians until it was called into question by leading thinkers of the thirteenth century It shows how this thirteenth century challenge influenced the growth of the Renaissance humanist movement and how this movement in turn passed on to modernity the same apocryphal notion of philosophy as a rhetorical theology of allegorical prefiguration

The Lost Promise of Patriotism Jonathan M. Hansen,2010-03-15 During the years leading up to World War I America experienced a crisis of civic identity How could a country founded on liberal principles and composed of increasingly diverse cultures unite to safeguard individuals and promote social justice In this book Jonathan Hansen tells the story of a group of American intellectuals who believed the solution to this crisis lay in rethinking the meaning of liberalism Intellectuals such as William James John Dewey Jane Addams Eugene V Debs and W E B Du Bois repudiated liberalism's association with acquisitive individualism and laissez faire economics advocating a model of liberal citizenship whose virtues and commitments amount to what Hansen calls cosmopolitan patriotism Rooted not in war but in dedication to social equity cosmopolitan patriotism favored the fight against sexism racism and political corruption in the United States over battles against foreign foes Its adherents held the domestic and foreign policy of the United States to its own democratic ideals and maintained that promoting democracy universally constituted the ultimate form of self defense Perhaps most important the cosmopolitan patriots regarded critical engagement with one's country as the essence of patriotism thereby justifying scrutiny of American militarism in wartime

Royalists, Radicals, and les Misérables Eric Martone,2014-10-02 The year of 1832 marked a turning point in France as the country struggled to find its way in the wake of the French Revolution Following the Revolution of 1830 Legitimists supporters of the recently ousted Bourbon dynasty's claim to the throne continued to plot against King Louis Philippe and his July Monarchy In

early 1832 after failing to launch a coup in Southern France Legitimists plotted an unsuccessful uprising in the Vendée a region in Western France that had supported the royalist cause during the French Revolution The Duchesse de Berry led the rebellion in the hopes of placing her son the Bourbon heir on the French throne The revolt marked the last attempt by the Bourbons to retake the throne by force and helped solidify the end of the Bourbon dynasty During the cholera outbreak which also spread throughout France in 1832 lower income areas suffered higher losses to the disease for they were more likely to have contaminated water supplies The lower classes spread rumors that the outbreak was an elitist plot to subdue the masses and the epidemic exacerbated class tensions Meanwhile conditions in France continued to be characterized by violence during the early 1830s as Louis Philippe attempted to establish his regime's authority The most significant of these uprisings was the republican dominated June Revolution of 1832 Victor Hugo and other contemporaries perceived the barricades of June as natural extensions of the cholera epidemic or the political continuation of a biological crisis The sad fate of the uprising however prompted republicans to regroup and develop new strategies for success As a whole then 1832 helped solidify the end of the Bourbon monarchy and class identities and was a crucial moment in the reorganization and growing solidification of French republicanism that paved the way for the Revolution of 1848 This edited collection examines these three pivotal events in French history in 1832 a royal Legitimist uprising led by the Duchesse de Berry the cholera epidemic and the June Revolution featured in the climax of Hugo's novel *Les Misérables* within the context of the legacy of the French Revolution While the events of 1832 are significant they have been relatively ignored because scholars have been distracted by the Revolutions of 1830 and 1848 This collection is the first piece of scholarship to examine these three events in an interconnected pattern to better examine France as it transitioned from a monarchy to a republic As a result this collection will be of value to both historians and academics studying diverse subfields within French and European studies

Imagined Civilizations Roger Hart, 2013-08-15 Roger Hart debunks the long held belief that linear algebra developed independently in the West Accounts of the seventeenth century Jesuit Mission to China have often celebrated it as the great encounter of two civilizations The Jesuits portrayed themselves as wise men from the West who used mathematics and science in service of their mission Chinese literati official Xu Guangqi 1562-1633 who collaborated with the Italian Jesuit Matteo Ricci 1552-1610 to translate Euclid's *Elements* into Chinese reportedly recognized the superiority of Western mathematics and science and converted to Christianity Most narratives relegate Xu and the Chinese to subsidiary roles as the Jesuits translators followers and converts *Imagined Civilizations* tells the story from the Chinese point of view Using

Chinese primary sources Roger Hart focuses in particular on Xu who was in a position of considerable power over Ricci The result is a perspective startlingly different from that found in previous studies Hart analyzes Chinese mathematical treatises of the period revealing that Xu and his collaborators could not have believed their declaration of the superiority of Western mathematics Imagined Civilizations explains how Xu's West served as a crucial resource While the Jesuits claimed Xu as a convert he presented the Jesuits as men from afar who had traveled from the West to China to serve the emperor

Sufism and the Scriptures Fitzroy Morrissey, 2020-12-10 The Sufi thinker Abd al Karim al Jili d 1408 is best known for his treatment of the idea of the Perfect Human yet his masterpiece al Insan al kamil The Perfect Human is in fact a wide ranging compendium of Sufi metaphysical thought in the Ibn Arabian tradition One of the major topics treated in that work is sacred history the story of God's revelation of the truth to humanity through His prophets and scriptures Fitzroy Morrissey provides here the first in depth study of this important section of al Jili's major work and the key ideas contained within it Through a translation and analysis of the key passages on the Qur'an Torah Psalms and Gospel it shows how al Jili's view of sacred history is conditioned by his Ibn Arabian Sufi metaphysics whereby the phenomenal world is viewed as a manifestation of God and the prophets and scriptures as special places where the divine attributes appear more completely It also looks at how this idea influences al Jili's understanding of the hierarchy of prophets scriptures and religions The book argues that contrary to common assumptions al Jili's Sufi metaphysical view of sacred history is in keeping with the common medieval Muslim view of sacred history whereby the Qur'an is viewed as the best of scriptures Muhammad as the best of prophets and Islam as the best religion The book therefore not only gives an insight into a key text within medieval Sufi thought but also has ramifications for our understanding of medieval Sufi views on the relationship between Islam and other religions

The Executive Decisionmaking Process Ralph Sanders, 1999-09-30 Decisionmaking literature which has emphasized the act of solving problems has long neglected the need to identify problems as precisely as possible This book examines the nature of problems and decisionmaking and their impact on people who direct an organization It further focuses on how executives respond to take action at the upper levels of their organizations The book stresses problem identification which executives frequently ignore because of their preoccupation with problem solving It looks at the need to avoid viewing solutions as remedies achieved at predetermined milestones It examines options other than solutions such as accommodation and coping and it looks at the executive environment associated with outcomes along a spectrum ranging from perfection to progress to failure The author argues that executives should abandon the attempt to predetermine objectives over time and adopt a Problem Exchange Ratio PER concept The executive then compares the status of problems over time creating a ratio The PER approach considers the problems that solutions themselves trigger It then allows executives to see where they stand and suggests ways of ameliorating unwanted conditions The author provides illustrative cases and episodes from both the public and private sectors Combining theory and practical aspects of executive decisionmaking this book gives the reader a fuller

between East Central Europe the rest of the continent and beyond Including 15 original chapters from an interdisciplinary team of contributors this collection begins by posing the question What is East Central Europe with three specialists offering different interpretations and presenting new conclusions The book is then grouped into five parts which examine political practice religion urban experience and art and literature The contributors question and explain the reasons for similarities and differences in governance and strategies for handling allies enemies or subjects in particular ways They point out themes and structures from town planning to religious orders that did not function according to political boundaries and for which the inclusion of East Central European territories was systemic The volume offers a new interpretation of medieval East Central Europe beyond its traditional limits in space and time and beyond the established conceptual schemes It will be essential reading for students and scholars of medieval East Central Europe **Bookseller and the Stationery Trades'**
