Red Sea Alasdair J. Edwards, 2013-10-22 The Red Sea is a unique and fragile environment All but landlocked between Africa and Arabia its peculiar oceanographic conditions its geographical position and its geological history all conspire to make it particularly vulnerable to the side effects of human civilization In places it is already a key environment under threat What makes the Red Sea unique What are the threats to this environment Where should future research be directed These are just three of the major questions addressed by the scientists contributing to this book

Historical Dictionary of Ancient and Medieval Nubia Richard A. Lobban, 2003-12-09 The Historical Dictionary of Ancient and Medieval Nubia covers the period from the Paleolithic all the periods of ancient Nubia Predynastic Kerma Dynasty XXV Napatan Meroitic Post Meroitic and to the end of medieval Christianity in Nubia Sudan This resource focuses on Nubian history through a Nubian perspective rather than on the more common Egyptocentrism perspective and the coverage is based on the latest and best archaeological and epigraphic evidence Newly created maps of the general area and its specific regions and place names and a photospread showing important related features of the region are included A detailed chronology provides a timeline of historical events and an introductory narrative shapes the overall history and leads to the main body of the work in the form of a cross referenced dictionary The descriptive entries cover the main features of the region in the various periods that are key not only to Nubian events but also to the important interactions they had with Egypt to the north Nine appendices and an extensive bibliography conclude this work Lobban has been teaching Nubian studies in undergraduate classrooms for thirty years and this book is a product of his hands on experiences as well as extensive anthropological fieldwork and travel in Sudanese and Egyptian Nubia

The Nile Henri J. Dumont, 2009-05-06 What have we learnt about the Nile since the mid 1970s the moment when Julian Ryska decided that the time had come to publish a comprehensive volume about the biology and the geological and cultural history of that great river And what changes have meanwhile occurred in the basin The human population has more than doubled especially in Egypt but also in East Africa Locally industrial development has taken place and the Aswan High Dam was clearly not the last major infrastructure work that was carried out More dams have been

built and some water diversions like the Toshka lakes have created new expanses of water in the middle of the Sahara desert What are the effects of all this on the ecology and economy of the Basin That is what the present book sets out to explore 33 years after the publication of *The Nile Biology of an Ancient River* Thirty seven authors have taken up the challenge and have written the new book They come from 13 different countries and 15 among them represent the largest Nilotic states Egypt Sudan Ethiopia Uganda and Kenya Julian Ryska died in 1984 and most of the authors of his book have now either disappeared or retired from research Only Jack Talling and Samir Ghabbour were still available to participate again
