Stuarts' Field Guide to National Parks & Game Reserves of East Africa Chris Stuart, Mathilde Stuart, 2018-10-30. East Africa is known for its diverse landscapes: expansive savannas, lakes and towering mountains, but also for its numerous protected areas, its parks and reserves that are the domain of the continent's most spectacular wildlife. These areas play a vital role in protecting both the environment and the animals it supports and annually play host to thousands of visitors who come to experience wild Africa. This guide to the parks and reserves of East Africa provides a valuable overview of some 58 protected areas across East Africa. The book is divided into the four East African countries: Tanzania, Kenya, Uganda and Rwanda, and for each park provides essential background on geology and landscape, climate, vegetation and wildlife, capturing the essence of what each area offers. It also covers the brief history of each park. Other features include numerous colour photographs of animal and plant life, detailed park maps indicating places of interest and best sites to view key species, text panels with highlights, facilities and activities, wildlife facts and important alerts, a photographic gallery of mammals, birds, amphibians, reptiles and trees for quick identification of common species. This must-have guide to the region's protected areas will prove indispensable to local and international visitors to the region and to all nature enthusiasts. Sales points: Key background on the character and features of each park, generously supported by full colour photographs and detailed maps; information boxes provide highlights at a glance; a concise gallery of animals and plants to aid identification.

Anthropology and Cryptozoology Samantha Hurn,2016-11-03 Cryptozoology is best understood as the study of animals which in the eyes of Western science are extinct unclassified or unrecognised In consequence and in part because of its selective methods and lack of epistemological rigour cryptozoology is often dismissed as a pseudo science However there is a growing recognition that social science can benefit from engaging with it for as social scientists are very well aware scientific categorisation and explanation represents just one of a myriad of systems used by humans to enable them to classify and make sense of the world around them In many cultural contexts myth folk classification and lived experience challenge the truth expounded by scientists With a reflexive anthropological approach and drawing on rich empirical and ethnographic studies from around the world this volume engages with the theoretical and methodological issues raised by reported sightings of unrecognised animals Bringing into sharp focus the anthropological value and challenges for methodology posed by beliefs about unclassified creatures Anthropology and Cryptozoology Exploring encounters with mysterious creatures will be of interest to anthropologists sociologists and geographers working in the fields of research methods anthrozoology mythology and folklore and human animal interaction

The Biology of

African Savannahs Bryan Shorrocks, William Bates, 2014-11-27 Savannah habitats comprise an ecologically important but ultimately fragile ecosystem. They constitute one of the largest biomes on Earth covering almost 20% of the land surface and can be simply described as tropical and subtropical grasslands with scattered bushes and trees. Most savannahs occur in Africa although smaller areas can be found in South America, India and Australia. They form a rich mosaic of diverse ecosystems and this book offers a concise but comprehensive introduction to their ecology, biodiversity and conservation. The *Biology of African Savannahs* describes the major plants, grasses and trees such as Acacia and animals, mainly large mammals that live in this habitat and examines the biological and ecological factors that influence their population size interactions such as predation and community composition. Conservation issues such as climate change, hunting and conflict between wildlife and domestic animals are also discussed. This new edition has been updated throughout with the latest research in the field and contains new technique boxes which introduce readers to some of the analytical methods used to study African savannahs. This accessible text is suitable for both senior undergraduate and graduate students taking courses in savannah and tropical ecology as part of a wider ecology and/or conservation biology degree programme. It will also be of relevance and use to the many professional ecologists and conservation practitioners requiring a concise but authoritative overview of the topic.

East African Wildlife Philip Briggs, Ariadne Van Zandbergen, 2024-11-22 The new extensively revised third edition of Bradt's *East African Wildlife* guide provides a user-friendly overview of East Africa's peerless wildlife, not only big game and other large mammals, but also birds, reptiles, amphibians and invertebrates. An alluring list that includes elephant, lion, leopard, giraffe, zebra, wildebeest, gorilla and chimpanzee. Excellent for independent travellers, it excels as a standalone guide combining both wildlife and visitor information and is also a perfect complement to traditional field guides or to Bradt travel guides to Tanzania, Uganda and Rwanda. From the snow-capped peaks of Kilimanjaro to the sultry Indian Ocean coastline with a range of habitats that span parched desert and vast transparent lakes, open savannah and tropical rainforest, East Africa is simply the world's finest wildlife viewing destination. Straddling the Equator and bisected by the magnificent Great Rift Valley, it is a true Mecca for wildlife enthusiasts. It harbours the continent's most popular safari locations including legendary reserves such as the Serengeti, Ngorongoro Crater, Maasai Mara, Samburu, Murchison Falls, Bwindi and Tsavo. Written by Philip Briggs, the world's foremost guidebook writer on Africa and a wildlife expert, *East African Wildlife* covers the fauna of Tanzania, Kenya, Uganda and Rwanda. Some 300 plus colour images by acclaimed photographer Ariadne Van Zandbergen illustrate many animals likely to be encountered while the engaging text extends beyond basic identification features to illuminate the natural history, habits, whereabouts and ecology of the species that visitors will encounter. To enable you to plan a safari that suits your interests, *East African Wildlife* offers top tips for optimising your wildlife experience, a where to go overview which outlines the key wildlife attractions at major sites within each country and advice on when to visit. There's even an engaging section about wildlife from your window for when you are staying in towns.

web lab report on acid base titration 1346 words 6 pages titration process is used in an acid base experiment in order to determine the concentrations of solutions of acids and bases through the titration process we are able to identify physical changes to the mixture such as the colour change to indicate the end point of the experiment

acid base titrations chemistry libretexts - Dec 08 2022

web aug 30 2022 acid base titrations are usually used to find the amount of a known acidic or basic substance through acid base reactions the analyte titrand is the solution with an unknown molarity the reagent titrant is the solution with a known molarity that will react with the analyte

acid base titrations conclusion docx conclusion the - Jul 03 2022

web conclusion the purpose of the experiment was to identify the unknown solid acid 17 by calculating its molar mass this was done by titration of the acid with sodium hydroxide in order to find the volume of sodium hydroxide required to reach the end point and that value was used in unit analysis to find the molar mass and identify the unknown solid acid

conclusion acid base titration lab - Sep 05 2022

web by utilizing the half equivalence point on the titration curve the pka of the acid analyte was determined to be 3.655 furthermore using the stoichiometric ratio between the naoh and the acid analyte 1:1 we could experimentally determine the number of moles of the acid in the solution to be 0.00731 moles making the experimental molar mass
