representations in determining which issues receive attention and how public understanding of the virus is shaped South Africa is one of the countries in the world most affected by HIV AIDS and yet until recently the epidemic was barely visible in South African literature Much can be gained from approaching the South African epidemic through creative texts such as novels photographs films cartoons and murals because they produce and circulate meanings of HIV AIDS and its various facets such as its origin transmission routes and physical manifestations Other aspects explored are the denial of HIV AIDS its stigmatisation discriminatory practices modes of disclosure access to anti retroviral medication as well as the role of alternative treatment Creative texts which are open to different and possibly contradictory readings can serve as a starting point to increase the cultural visibility of the virus and to challenge dominant ideas about the epidemic The cultural constructions of HIV AIDS should be carefully examined because the meanings are pervasive and have very real consequences they play a powerful role both in determining which issues receive attention and in shaping public understanding of the virus Ellen Gr nkemeier is a lecturer and researcher in the English Department at Leibniz University of Hanover Germany Her publications include two co edited volumes on postcolonial literatures and cultures *Listening to Africa Anglophone African Literatures and Cultures* 2012 and *Postcolonial Studies across the Disciplines ASNEL Papers* 19 forthcoming **African Arts** ,2009 *American Craft* ,2006 *Communication Arts* ,2005 **Daily Life of Women** Colleen Boyett,H.
