psychologists as well as a comprehensive text for graduate students      **Nichtsprachliche Lernstörung** Franz Petermann, Julia Knievel, Lars Tischler, 2010-09-23 Die nichtsprachliche Lernstörung stellt eine Subgruppe von Lernstörungen dar, die in Kanada und den USA in der praktischen Arbeit mit Kindern einen wichtigen Platz eingenommen hat und von der amerikanischen Vereinigung für Lernstörungen LDA als eigenständige Störung behandelt wird. Die nichtsprachliche Lernstörung umfasst eine Bandbreite von verschiedenen Symptomen, die sich primär als visuelle und taktile Schwierigkeiten von Kindern äußern, aber auch Beeinträchtigungen in der Flexibilität des Denkens und der Psychomotorik mit einschließen. Betroffene Kinder werden in deutschen Praxen als diffus auffällig identifiziert, entsprechen aber keiner klassifizierbaren Störung. Das Buch versucht eine Lücke zwischen diesen beobachtbaren, nicht klassifizierbaren Symptomen und wissenschaftlich fundierten Konzeptionen zu schließen. Die nordamerikanische Klassifikation der nichtsprachlichen Lernstörung wird dafür aufgegriffen, kritisch beleuchtet und auf die wesentlichen Aspekte des Syndroms reduziert. Verschiedene Falldarstellungen illustrieren beobachtbare Symptome. Aktuelle Testverfahren und Bausteine aus Trainingsprogrammen werden auf ihre Einsatzmöglichkeiten zur Diagnostik und Behandlung geprüft.      *Handbook of Psychological Assessment* Gerald Goldstein, Michel Hersen, 2000-02-16 The field of psychological assessment has been undergoing rapid change. The second edition of this Handbook, published in 1990, appeared at the beginning of a decade marked by extensive advances in assessment in essentially all of its specialized areas. There are many new tests, new applications of established tests, and new test systems. Major revisions have appeared of established tests, notably the Wechsler intelligence scales. The time seemed right for a third edition, since even over the relatively brief period of ten years, many tests described in the second edition have been replaced and are no longer commonly used. Furthermore, much new research in such areas as neuropsychology, cognitive science, and psychopathology have made major impacts on how many tests and other assessment procedures are used and interpreted. This third edition represents an effort to give the reader an overview of the many new developments in assessment while still maintaining material on basic psychometric concepts in order for it to continue to serve as a comprehensive handbook for the student and professional.      **Comprehensive Handbook of Psychological Assessment, Volume 1** Gerald Goldstein, Sue R. Beers, 2003-09-22 In one volume, the leading researchers in intelligence and neuropsychological assessment interpret the range of issues related to intellectual and neuropsychological tests, including test development and psychometrics, clinical applications, ethical and legal concerns, use with diverse populations, computerization, and the latest research. Clinicians and researchers who use these instruments will find this volume invaluable, as it contains the most comprehensive and up-to-date information available on this important aspect of practice.      **Practitioner's Guide to Evaluating Change with Intellectual Assessment Instruments** Robert J. McCaffrey, Holly James Westervelt, 2013-03-14 While conducting research on intellectual and neuropsychological performance of various patient populations across time, we became aware of the lack of information concerning practice effects associated with many

widely used assessment instruments Although test retest data were available for almost all of these instruments it typically came in the form of correlation coefficients and mean changes in performance between assessments was often absent In a 1995 article McCaffrey Westervelt 1995 we discussed a number of issues relevant to serial neuropsychological and intellectual assessment and concluded that clinical neuropsychological practitioners had few guidelines to assist them in interpreting change in a patient s performance across assessments This volume represents our efforts at reviewing the literature between 1970 and 1998 and extracting the reported information on practice effects The tables include the assessment instrument used information on the subject patient groups the sample size fu gender age intervention interval between the assessments scores at both assessment points and the citation The tables reflect the existing published literature within intellectual assessment and therefore some instruments e g Wechsler tests comprise a majority of the tables whereas others e g Raven s Progressive Matrices Stanford Binet do not The test index is arranged by the name of the test as reported in the specific article We caution readers to refer to the original articles if additional or more specific information is needed
