EHR Governance Paula Scariati, 2023-04-28 Organizations spend large amounts of money to purchase, deploy and optimize their Electronic Health Records (EHRs). They are not plug n play systems so a commitment to an ongoing improvement cycle is necessary. When done well, this responds to the people, the process, and the technology. When not done well, complete failure of the system could result in costing the organization thousands of dollars. Based on the foundational premise that EHR governance done right speeds up change and leads to a positive user experience, this book draws upon more than a decade of work with government, academic, and nonprofit organizations using Epic, Allscripts, McKesson, Meditech, and Cerner. Designed to be practical and pragmatic, it outlines a strategic process that can scale to small and large organizations alike. It begins with how to articulate a clear vision to organizational leaders so they can champion strong EHR governance both theoretically and financially. It then walks through each step required for leading successful change, calling out critical lessons learned to help the reader avoid pitfalls and achieve measurable improvement more rapidly. It concludes with a commitment to ongoing growth and refinement through benchmarked metrics, innovation, and out of the box thinking.

The New Advantage Howard J. Morgan, Joelle K. Jay, 2016-03-28 Offering both a male and female perspective on the dilemmas women face in business, this book provides the benefits of high level executive coaching to all women who want to take control of their careers and achieve their aspirations for corporate leadership. Despite efforts to increase diversity within Fortune 500 companies and larger numbers of highly motivated and educated women in the workforce, women remain vastly underrepresented at the highest levels of corporate leadership. Only about 15 percent of women hold senior executive positions and about 17 percent are represented on corporate boards worldwide; only 3.4 percent of CEOs are women. These statistics are in spite of the fact that many companies are actively seeking to take advantage of the financial boost that gender balance at the corporate level brings. Companies that have women in leadership roles are showing higher performance in various measures of profitability such as revenues, assets, and stockholder value. How can qualified women leaders overcome the myriad longstanding hurdles of the corporate environment and reach the top? Coauthored by executive

coaches to some of corporate America's most notable leaders this practical research and experience based guide identifies the various barriers that block women from reaching positions of corporate leadership and offers readers specific strategies and approaches that they can utilize to advance themselves into the positions they want and apply their talents and abilities at the very top The chapters address very specific challenges for women in the business world such as strengthening and leveraging their closest connections including those with their mentors and their sponsors understanding how performance means more than doing their jobs well garnering positive attention and recognition for their efforts and results and getting honest practical feedback that will serve to advance their careers

Leadership is a most demanding undertaking How do some people make it seem so simple so natural and instinctive In the age old debate as to whether leaders are born or made Thomas contends that the answer is both Great leaders throughout history were born with certain capabilities Preparation honed those capabilities Then that ability and preparation were combined with a will to lead When circumstances demanded the great leaders of history pulled these attributes together to create results that drove the course of history While leaders are present in every aspect of human undertaking we chose to illustrate each of the components of leadership through the most dramatic and demanding of all human undertakings war and the preparations for war Wartime leaders are leaders writ with a darker pen Wartime challenges are because of the life and death nature of the affair more monumental and exacting In the selection of individuals to illustrate each point we chose wartime leaders as well as those who guided their subordinates and organizations in preparation for combat Further we chose American leaders with a distinct and obvious bias towards the navy and Marine Corps Multiple reasons led us to our approach for Leadership Embodied First a biography is perhaps the most effective method for imparting leadership lessons Simple listings of prescriptive traits or descriptive qualities are patronizing and frequently boring Second our biographical examples are familiar to most or at least they should be Finally all of these historical selections have dramatically shaped today's institutions practices and customs within the naval services These are not marginal figures with marginal influence The individuals included and their respective leadership attributes should be required reading for any student of leadership Each has a particular lesson for midshipmen on their journey to becoming a navy or Marine Corps officer This book does not promise to be a panacea There is no short cut Leadership does not follow a prescribed path We study examples to inspire us to become better to be strong when it is easy to give in and to know others have gone before us and faced insurmountable odds Leadership as an ill defined social science crosses boundaries with several disciplines including sociology psychology philosophy and history We have selected a method that combines the psychological profile of effective leaders and the historical context of the impact their leadership brought to organizations and events Our hope for this book is that these case studies illustrate the basic elements in themselves the very essence of leadership It is through inherent talent arduous preparation and practical experience that we become capable leaders The reader brings the first to the table then we offer a small token in the second pursuit and circumstances enable the third **Mastering Corporate Life** Kathrin Anne Meier, 2023-01-10
