stakeholders on software development projects This is achieved by utilizing Home Care Systems HCS as an exemplar for Dynamically Adaptive Systems DAS illustrating how AMs can be extended to better suit the desirable characteristics for an evolutionary Requirements Engineering RE approach to be developed The findings from multiple studies both academic and industry based inform the development of a novel evolutionary framework called OpenXP to improve the facilitation of agile requirements elicitation in complex business domains OpenXP provides the Agile Business Analyst with a practical solution to the strategic consolidation of multiple diverse viewpoints in developing a representative perspective of the overall project goal Specifically this novel approach introduces a more participatory elicitation process extending hands on support for prioritization decision making and the provision of an informative workspace including upper level business context needed for developing user stories The OpenXP framework is a three phased solution consisting of nine specific steps linked with four broader facets Each facet is then responsible for implementing one or more strategic functions that comprise Stakeholder Coordination Business and IT Alignment Effective Communication Adaptability Integration on agile software projects **Data Analysis In Astronomy: Proceedings Of The Fifth Workshop** Michael J B Duff,Andre Heck,Livio Scarsi,Vito Di Gesu,Maria Concetta Maccarone,H U Zimmermann,1998-01-02 This proceedings volume focuses on new methods of image and signal analysis in a wide range of energies from radio to gamma ray astronomy and advanced methodologies regarding problems and solutions in information fusion and retrieval statistical pattern recognition vision and advances in computing technology A special section is devoted to the BeppoSAX mission Satellite per Astronomia X launched on April 30 1996 inside a program of the Italian Space Agency ASI and the Netherlands Agency for Aerospace Programs NIVR   Advances in Data Mining.
