descriptions But if we see these forces as vibrations in a higher dimensional space their field equations suddenly fit together like pieces in a jigsaw puzzle perfectly snug in an elegant astonishingly simple form This may thus be our leading candidate for the Theory of Everything If so it would be the crowning achievement of 2 000 years of scientific investigation into matter and its forces Already the theory has inspired several thousand research papers and has been the focus of over 200 international conferences Michio Kaku is one of the leading pioneers in superstring theory and has been at the forefront of this revolution in modern physics With Hyperspace he has produced a book for general readers which conveys the vitality of the field and the excitement as scientists grapple with the meaning of space and time It is an exhilarating look at physics today and an eye opening glimpse into the ultimate nature of the universe Annual Report on the Noxious, Beneficial and Other Insects of the State of Missouri Missouri.
