

Y-DNA Haplogroup R-U152 in Britain: Proposed Link to the 5th Century Migration of the Angle and Jute Tribes from Jutland and Fyn, Denmark (Hypothesis B)

David K. Farrer

Introduction

This present work is a result of a single observation. A geographical pattern had emerged in the author's [database](#) and [map](#) representing men of British ancestry with the Y-chromosome marker S28 / U152. The place of birth of their earliest known ancestor tended to cluster along the eastern coastal areas of England inland to the Midlands, some around the area immediately north of Wales (as well as Anglesey), but none along the south coast or the southwest in general. Also in Scotland the distribution included the Northern Isles and along the east coast, with none on the west coast. Furthermore, despite very heavy sampling, no one with a native Irish surname and documented ancestry to Ireland has yet tested positive for R-U152. As the new data continued to "fit the mold" it occurred that this was not random, and so an interpretation in keeping with known historical events might be found, since the clustering suggested a relatively recent immigration to Britain rather than events associated with distant pre-historical times. When the author drew a line around the outside perimeter of the ancestral homes of those who tested U152 positive, it was clear that this was very similar to the boundaries of the Danelaw which separated the territories of the Danish Viking immigrants and the Saxon lands in the south and west. At a later date it became apparent that this was virtually the same boundary relating to the lands settled by the Angles three hundred years earlier. Hence, there was an apparent overlap between all three distributions – R-U152, the Danelaw, and the Angle Kingdoms.

Based on the above database, the regions where R-U152 was observed on the Continent appeared to mirror the known distribution of the Hallstatt and La Tene Celts. This includes locations from Spain to Ukraine with a "hotspot" in Switzerland (see a [related study](#) by the present author), and hence a search was initiated for a Celtic group that could explain the R-U152 in for example Orkney and East Anglia. A group that "matched the criteria" was quickly located.

The Cimbri tribe resided on the Jutland Peninsula (and surrounds). They are well documented in that region between about 100 BC and 500 AD. The Cimbri were Celtic – speaking, and many of the most dramatic Celtic finds (e.g., the Gundestrup Cauldron) have been discovered in their homeland around Limfjord, or further south in Jutland (e.g., the Gallehus horns). The "Celticity" of Jutland and Fyn is reflected in the fact that even in the Pre-Roman Iron Age, *There are suggestions of direct links between the North and the western Celtic world in burial ritual. The burial of dismantled carts with the dead at Husbj in Schleswig, at Kargbeck in Denmark and Langa in Fyn is closely paralleled in the Rhine*

The Tower of Babel: Confirmed Michael Talley,2016-05-22 The story of the Tower of Babel and of the confounding of the languages is more than just a myth invented by someone trying to explain the existence of multiple languages It is an actual historical event mentioned in the histories of multiple nations Critics have often rejected the story because of its connection to the Old Testament while ignoring other ancient documents from other cultures where the same story is told often in connection with the flood The chapter before the one where this event is described in Genesis contains a listing of the descendants of Noah in a document known as the Table of Nations In this book those nations will be traced through history using ancient sources whenever possible This information will be combined with the history of man as

His passion for history and genealogy led him to meticulously document his ancestral lineage, culminating in this comprehensive work. Professor Declercq's interdisciplinary approach and dedication to rigorous research have earned him a reputation for excellence in the scientific community and among genealogical enthusiasts. He is also the author of several philosophical novels published under a pseudonym.

Autobiography of an Old School South African Son Peter Boshoff, 2022-02-15 The author sets out the life and history of his 4 grand parents with their family ties illustrated by photos. This is followed by his autobiography about his humble but proud beginnings with a full life but not without its complications. Despite having a medical career, he was not afraid to get his hands dirty and always did everything himself with DIY skills that he learned from his father. He preferred rural environments, having been brought up on a smallholding, he later acquired his own. When he came to England, he chose a country town away from all the hustle and bustle. Read all about his full, interesting and conflicted life in this book.
