

### Fuel Filter (1984-on XV1000 and XV1100)

Fuel filter replacement is described in Chapter Six.

### Fuel and Vacuum Line Inspection

Inspect the condition of the fuel line and vacuum line for cracks or deterioration; replace if necessary. Make sure the hose clamps are in place and holding securely.

### Exhaust System

Check for leakage at all fittings. Do not forget the crossover pipe connections. Tighten all bolts and nuts; replace any gaskets as necessary. Removal and installation procedures are described in Chapter Six.

### Air Cleaner Removal/Installation

A clogged air cleaner can decrease the efficiency and life of the engine. Never run the bike without the air cleaner installed; even minute particles of dust can cause severe internal engine wear.

The service intervals specified in Table 1 should be followed with general use. However, the air cleaner should be serviced more often if the bike is ridden in dusty areas.

#### 1981-1983

1. Remove the left-hand side cover.
2. Remove the bolts securing the air filter housing to the frame (Figure 65). Remove the 2 housing bolt rods.
3. Remove the air filter housing (Figure 66).
4. Disassemble the air filter cover (A, Figure 67).
5. Remove the air filter (Figure 68).
6. Tap the element lightly to remove most of the dirt and dust then apply compressed air to the inside surface of the element.
7. Inspect the element and make sure it is in good condition. Replace if necessary.
8. Clean the inside of the air box with a shop rag and cleaning solvent. Remove any foreign matter that may have passed through a broken cleaner element.
9. Assemble the air filter housing assembly. When installing the air filter housing make sure that the rubber foam gasket (B, Figure 67) seats properly against the frame.
10. Install all parts previously removed.

#### 1984-on

1. The air filter housing is shown in Figure 69. Remove the air housing attaching bolts and disconnect the air filter hose at the frame.
