Penhaker, Jaroslav Majernik, 2012-09-06 Biomedical engineering is currently relatively wide scientific area which has been
constantly bringing innovations with an objective to support and improve all areas of medicine such as therapy diagnostics
and rehabilitation It holds a strong position also in natural and biological sciences In the terms of application biomedical
engineering is present at almost all technical universities where some of them are targeted for the research and development
in this area The presented book brings chosen outputs and results of research and development tasks often supported by
important world or European framework programs or grant agencies The knowledge and findings from the area of
biomaterials bioelectronics bioinformatics biomedical devices and tools or computer support in the processes of diagnostics
and therapy are defined in a way that they bring both basic information to a reader and also specific outputs with a possible
further use in research and development **Measuring Strategies in Tactile Coordinate Metrology** Robert

Roithmeier, 2014-10-24 Today there is hardly any workpiece whose form parameters cannot be measured by means of
coordinate measuring machines The universal use of these machines allows a wide range of application of this technology
which however increases inevitably the complexity of its handling The numerous options of the machine specific operating
software on the one hand and the various theoretical considerations regarding a target oriented treatment of measuring jobs
on the other hand result in the fact that the measuring results obtained from the same coordinate measuring machine on the
same workpiece under similar conditions may differ In Order to increase the comparability of measuring results it is
necessary to provide the operators of coordinate measuring machines in addition to a well founded AUKOM training with
procedure options for planning performing evaluating and documenting measurements This book by the ZEISS Metrology
Academy makes a contribution towards achieving these targets **December 2023 - Surplus Record Machinery &**
