The Science of Basic L-Rod Dowsing Richard Warburton, 2025-02-07 Dowsing has been a known practice for at least 500 years with some evidence suggesting it may have been used for millennia Historically dowsers used a forked Y shaped stick following the movement toward the presence of water minerals or other objects located beneath the ground Today the most common tool used is a wire bent into the shape of an L leading to the term L rod dowsing Only a few of dowsing s many forms appear to have a clear physical basis such that some physical phenomenon in the environment causes a physiological response in the body Despite the many studies performed in the past none have resulted in a comprehensive testable explanation for how dowsing works This book reviews and critiques some of the common explanations for L rod field dowsing describes an investigation into various aspects of L rod dowsing and proposes a mechanism which explains the physical observations Building on the prior scientific studies it presents a theory based on well known scientific principles for the physical component of dowsing

Synthetic Aperture Radar Image Processing Algorithms for Nonlinear Oceanic Turbulence and Front Modeling Maged Marghany, 2024-07-09 Synthetic Aperture Radar Image Processing Algorithms for Nonlinear Oceanic Turbulence and Front Modelling is both a research and practice based reference that bridges the gap between the remote sensing field and the dynamic oceanography exploration field In this perspective the book explicates how to apply techniques in synthetic aperture radar and quantum interferometry synthetic aperture radar QInSAR for oceanic turbulence and front simulation and modelling The book includes detailed algorithms to enable readers to better understand and implement the practices covered in their own work and apply QInSAR to their own research This multidisciplinary reference is useful for researchers and academics in dynamic oceanography and modelling remote sensing and aquatic science as well as geographers geophysicists and environmental engineers Details the potential of synthetic aperture radar in imaging ocean surface dynamical features Includes detailed algorithms and methods allowing readers to develop their own computer algorithms Covers the latest applications of quantum image processing
