Discrete Event Simulations Aitor Goti, 2010-08-18 Considered by many authors as a technique for modelling stochastic dynamic and discretely evolving systems this technique has gained widespread acceptance among the practitioners who want to represent and improve complex systems Since DES is a technique applied in incredibly different areas this book reflects many different points of view about DES thus all authors

describe how it is understood and applied within their context of work providing an extensive understanding of what DES is. It can be said that the name of the book itself reflects the plurality that these points of view represent. The book embraces a number of topics covering theory, methods and applications to a wide range of sectors and problem areas that have been categorised into five groups. As well as the previously explained variety of points of view concerning DES, there is one additional thing to remark about this book: its richness when talking about actual data or actual data based analysis. When most academic areas are lacking application cases, roughly the half part of the chapters included in this book deal with actual problems or at least are based on actual data. Thus, the editor firmly believes that this book will be interesting for both beginners and practitioners in the area of DES.

This unique text reference provides a comprehensive review of distributed simulation DS from the perspective of Model Driven Engineering MDE, illustrating how MDE affects the overall lifecycle of the simulation development process. Numerous practical case studies are included to demonstrate the utility and applicability of the methodology, many of which are developed from tools available to download from the public domain. Topics and features: Provides a thorough introduction to the fundamental concepts, principles and processes of modeling and simulation MDE and high level architecture. Describes a road map for building a DS system in accordance with the MDE perspective and a technical framework for the development of conceptual models. Presents a focus on federate simulation environment architectures, detailing a practical approach to the design of federations, i.e. simulation member design. Discusses the main activities related to scenario management in DS and explores the process of MDE based implementation, integration and testing. Reviews approaches to simulation evolution and modernization, including architecture driven modernization for simulation modernization. Examines the potential synergies between the agent DS and MDE methodologies, suggesting avenues for future research at the intersection of these three fields. Verhalten erfahrbar und analysierbar Aus Digitalen Zwillingen werden Experimentierbare Digitale Zwillinge EDZ d.h. Digitale Zwillinge zusammengeführt mit Simulationstechnik bzw. betrachtet aus der Perspektive der Simulationstechnik. Der in diesem Buch eingeführte Experimentierbare Digitale Zwilling schließt die Lücke zwischen Model based Systems Engineering und Simulation und hebt das Potenzial moderner Modellierungs- und Co-Simulationsansätze. Er beschreibt Semantik, Struktur, Verhalten und Interaktion seines Realen Zwillings. Seine domänenbergreifende Interaktion mit weiteren Experimentierbaren Digitalen Zwillingen ermöglicht die umfassende Abbildung von Systemen von mechatronischen, cyberphysischen Systemen, seine Vernetzung mit Realen Zwillingen fördert Simulation und Realität symbiotisch zusammen. Dies ist Grundlage für vielfältige EDZ-Methoden zum interdisziplinären domänen-, system-, prozess-, anwendungs- und lebenszyklusbergreifenden Einsatz digitaler Zwillinge.

Fahrzeugnetzwerkarchitekturen für zukünftige Echtzeitsysteme im Automobil Till Steinbach, 2018-09-11. Till Steinbach leistet einen Beitrag zum Design und zur Bewertung neuer Ethernet-basierter Fahrzeugnetzwerkarchitekturen. Er liefert Werkzeuge für die simulationsbasierte Analyse und Beurteilung von Netzwerkarchitekturen und evaluiert anhand konkreter Anwendungen und auf echten Verkehrsdaten aufbauender Szenarien mögliche Netzwerkdesigns und Konfigurationen. Dabei berücksichtigt der Autor auch den Übergang von Legacy-Technologien hin zu einem rein Echtzeit-Ethernet-basierten Fahrzeugnetzwerk. Auf Basis der aus analytischen Modellen sowie Simulationsstudien und einem realen Fahrzeugprototyp gewonnenen Erkenntnisse spricht er Designempfehlungen für die Entwicklung zukünftiger Ethernet-basierter Fahrzeugnetzwerke aus. Die Ergebnisse der Untersuchung führen zu Best Practices für zukünftige Backbone-Netzwerke im Automobil, in denen sich die erreichbaren Kennzahlen unter Einhaltung der Designempfehlungen um ein Vielfaches verbessern lassen.

Die Dissertation von Till Steinbach wurde 2018 von der IAV GmbH Ingenieurgesellschaft Auto und Verkehr Berlin mit dem in der Branche renommierten IAV Talent Award in der Kategorie Excellence ausgezeichnet. Approaches to Enhance the Performance of Simheuristic Methods in the Optimisation of Multi-echelon Logistics Distribution Networks Majsa Ammouriouva, 2021 Management of logistics distribution networks is a challenging task Decision makers rely on logistics assistance systems that recommend actions to optimise the networks These systems can be based on simheuristics to benefit from metaheuristics in exploring possible solutions and on simulation for modelling the networks This book presents three approaches to recommend promising solutions to optimise the networks with fewer simulation runs The first approach utilises information from the network to guide the search of metaheuristics In this approach domain specific information is defined and assigned to actions

The metaheuristic algorithm utilises this domain specific information to find more promising solutions The second approach is reducing the number of possible solutions by grouping actions with respect to their domain specific attributes Here the smaller solution space decreases the number of required simulation runs The last approach looks for equivalent solutions that cause the same changes in the network This approach aims to skip unnecessary evaluations and thus simulation effort
