*Integrierte Entwicklung und Ausführung von Prozessen in dezentralen Organisationen* Felix Härer, 2019-11-25 Smart Modelling for Engineering Systems Margarita N. Favorskaya, Alena V. Favorskaya, Igor B. Petrov, Lakhmi C. Jain, 2021-01-30

This book is a collection of research papers selected for presentation at the International Conference on Smart Computational Methods in Continuum Mechanics 2021 organized by Moscow Institute of Physics and Technology and the Institute for Computer Aided Design of Russian Academy of Sciences The work is presented in two volumes The primary objective of the book is to report the state of the art on smart computational paradigms in continuum mechanics and explore the use of artificial intelligence paradigms such as neural nets and machine learning for improving the performance of the designed engineering systems The book includes up to date smart computational methods which are used to solve problems in continuum mechanics engineering seismic prospecting non destructive testing and so on The main features of the book are the research papers on the application of novel smart methods including neural nets and machine learning computational algorithms smart software systems and high performance computer systems for solving complex engineering problems The case studies pertaining to the real world applications in the above fields are included The book presents a collection of best research papers in English language from some of the world leaders in the field of smart system modelling and design of engineering systems

**Computer and Information Sciences - ISCIS 2005** Pinar Yolum, Tunga Güngör, Fikret Gürgeç, Can Özturan, 2005-11-16 This book constitutes the refereed proceedings of the 20th International Symposium on Computer and Information Sciences ISCIS 2005 held in Istanbul Turkey in October 2005 The 92 revised full papers presented together with 4 invited talks were carefully reviewed and selected from 491 submissions The papers are organized in topical sections on computer networks sensor and satellite networks security and cryptography performance evaluation e commerce and Web services multiagent systems machine learning information retrieval and natural language processing image and speech processing algorithms and database systems as well as theory of computing

**Proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics 2022** Aboul Ella Hassanien, Václav Snášel, Mincong Tang, Tien-Wen Sung, Kuo-Chi Chang, 2022-11-17 This proceedings book constitutes the refereed proceedings of the 8th International Conference on Advanced Intelligent Systems and Informatics AISI 2021 which took place in Cairo Egypt during November 20-22 2022 and is an international interdisciplinary conference that presents a spectrum of scientific research on all aspects of informatics and intelligent systems technologies and applications

**SSL and TLS: Theory and Practice, Third Edition** Rolf Oppliger, 2023-06-30 Now in its Third Edition this completely revised and updated reference provides a thorough and comprehensive introduction into the SSL TLS and DTLS protocols explaining all the details and technical subtleties and showing how the current design helps mitigate the attacks that have made press headlines in the past The book tells the complete story of TLS from its earliest incarnation SSL 1.0 in 1994 all the way up to and including

TLS 1.3 Detailed descriptions of each protocol version give you a full understanding of why the protocol looked like it did and why it now looks like it does You will get a clear detailed introduction to TLS 1.3 and understand the broader context of how TLS works with firewall and network middleboxes as well the key topic of public infrastructures and their role in securing TLS You will also find similar details on DTLS a close sibling of TLS that is designed to operate over UDP instead of TCP The book helps you fully understand the rationale behind the design of the SSL/TLS and DTLS protocols and all of its extensions It also gives you an in depth and accessible breakdown of the many vulnerabilities in earlier versions of TLS thereby more fully equipping you to properly configure and use the protocols in the field and protect against specific network based attacks With its thorough discussion of widely deployed network security technology coupled with its practical applications you can utilize today this is a must have book for network security practitioners and software/web application developers at all levels

**Software Engineering for Multi-Agent Systems III** Ricardo Choren, Alessandro Garcia, Carlos Lucena, Alexander Romanovsky, 2011-03-30 This book presents a coherent and well balanced survey of recent advances in software engineering approaches to the design and analysis of realistic large scale multi agent systems MAS The chapters included are devoted to various techniques and methods used to cope with the complexity of real world MAS The power of agent based software engineering is illustrated using examples that are representative of successful applications The 16 thoroughly reviewed and revised full papers are organized in topical sections on agent methodologies and processes requirements engineering and software architectures modeling languages and dependability and coordination Most of the papers were initially presented at the 3rd International Workshop on Software Engineering for Large Scale Multi agent Systems SELMAS 2004 held in Edinburgh UK in May 2004 in association with ICSE 2004 Other papers were invited to complete coverage of all relevant aspects

**Computing Handbook, Third Edition** Teofilo Gonzalez, Jorge Diaz-Herrera, Allen Tucker, 2014-05-07 Computing Handbook Third Edition Computer Science and Software Engineering mirrors the modern taxonomy of computer science and software engineering as described by the Association for Computing Machinery ACM and the IEEE Computer Society IEEE CS Written by established leading experts and influential young researchers the first volume of this popular handbook examines the elements involved in designing and implementing software new areas in which computers are being used and ways to solve computing problems The book also explores our current understanding of software engineering and its effect on the practice of software development and the education of software professionals Like the second volume this first volume describes what occurs in research laboratories educational institutions and public and private organizations to advance the effective development and use of computers and computing in today's world Research level survey articles provide deep insights into the computing discipline enabling readers to understand the principles and practices that drive computing education research and development in the twenty first century

**Research Awards Index ,      Research Grants Index**

National Institutes of Health (U.S.). Division of Research Grants, 1971      *Building Microservices* Sam Newman, 2021-07-24

Distributed systems have become more fine grained as organizations shift from code heavy monolithic applications to smaller self contained microservices But developing these systems brings its own set of problems With lots of examples and practical advice this expanded second edition takes a holistic view of the topics system architects and administrators must consider when building managing and evolving microservices architectures Author Sam Newman provides you with a firm grounding in the concepts while diving into the latest solutions for modeling integrating testing deploying and monitoring your own autonomous services Through real world examples you ll learn how organizations worldwide are getting the most out of these architectures Microservices technologies are moving quickly This book brings you up to speed Get new information on user interfaces container orchestration and serverless Use microservices to align system design with your organization s goals Explore options for integrating a service with the rest of your system Take an incremental approach when splitting monolithic codebases Deploy individual microservices through continuous integration Examine the complexities of testing and monitoring distributed services Manage security with expanded content around user to service and service to service models Understand the challenges of scaling microservices architectures

*Securing AI Model Weights* Sella Nevo,Dan Lahav,Ajay Karpur,Yogev Bar-On,Henry-Alexander Bradley,Jeff Alstott,2024-05-30 As frontier artificial intelligence AI models that is models that match or exceed the capabilities of the most advanced models at the time of their development become more capable protecting them from theft and misuse will become more important The authors of this report explore what it would take to protect model weights the learnable parameters that encode the core intelligence of an AI from theft by a variety of potential attackers

Cyber-Physical Systems Alla G. Kravets,Alexander A. Bolshakov,Maxim V. Shcherbakov,2021-04-13 This book offers ideas to help improve digital technologies and increase their efficiency during implementation and application for researchers and practitioners The outstanding position of the book among others is that it dwells with cyber physical systems progress and proposes ideas and finding around digital tools and technologies and their application A distinguished contribution is in presenting results on Digital Twins development and application enhancing approaches of communication and information transferring between cyber physical systems connected within the Internet of things platforms computer linguistic as a part of cyber physical systems intelligent cybersecurity and computer vision systems The target audience of this book also includes practitioners and experts as well as state authorities and representatives of manufacturing and industry who are interested in creating and implementing of cyber physical systems in framework of digitalization projects

Current Topics in Artificial Intelligence Ricardo Conejo,Maite Urretavizcaya,José-Luis Pérez-de-la-Cruz,2004-06-16 This book constitutes the thoroughly refereed joint post proceedings of the 10th Conference of the Spanish Association for Artificial Intelligence CAEPIA 2003 and the 5th Conference on Technology Transfer TTIA 2003 held in San Sebastian Spain in November 2003 The 66 revised full papers presented together with one invited paper were carefully selected during two rounds of reviewing and improvement from an initial total of 214

submissions The papers span the entire spectrum of artificial intelligence and advanced applications in various fields
