In Praise of Walking Shane O'Mara, 2019-08-01 Informative and persuasive enough to rouse the most ardent couch potato New Scientist Walking upright on two feet is a uniquely human skill It defines us as a species It enabled us to walk out of Africa and to spread as far as Alaska and Australia It freed our hands and freed our minds We put one foot in front of the other without thinking yet how many of us know how we do that or appreciate the advantages it gives us In this hymn to walking neuroscientist Shane O Mara invites us to marvel at the benefits it confers on our bodies and minds and urges us to appreciate and exercise our miraculous ability Will leave you itching to go out for a good old fashioned stroll Mail on Sunday A Sunday Independent Book of the Week

Selbstheilungskräfte und Arzneimittelwirkungen Hans-Harald Sedlacek, 2016-07-11 Der Wille zur Gesundung die Einsicht und das Wissen um die eigenen Kräfte für eine Heilung und das Vertrauen in die Wirkung der Arzneimittelbehandlung bestimmen das Ausmaß des Erfolges einer jeder rztlichen Behandlung Die Auswirkungen dieses Willens und die Mechanismen der Selbstheilung sind erst teilweise verstanden ber kognitive und emotionale Prozesse werden Hormone Peptide und Mediatoren ausgeschüttet welche mit unterschiedlichen Mechanismen alle Körpersysteme und Organe in unterschiedlicher Weise beeinflussen Von besonderer Bedeutung sind die Auswirkungen auf das autonome Nervensystem auf die Immunantwort das Hormonsystem und auf die unterschiedlichen Organfunktionen Die Selbstheilungskräfte greifen bei den unterschiedlichsten Erkrankungen und können unterstützt werden durch eine bestmögliche Ernährung durch Schlaf und durch regelmäßige Körperbewegungen Doch auch hier sind die Mechanismen und das Ausmaß nicht vollkommen verstanden sind in vielen Bereichen die Annahmen und Lehrmeinungen widersprüchlich Selbstheilungskräfte können eine Arzneimittelbehandlung unterstützen Denn deren Wirkung wird verstärkt durch das Vertrauen in den Heilerfolg nachweisbar durch den Placeboeffekt fassbar in Placebo kontrollierten klinischen Studien der wissenschaftlich orientierten Evidenz basierten Medizin Andererseits können ngste vor Nebenwirkungen einer Arzneimittelbehandlung Nebenwirkungen verursachen oder verstärken der Nocebo Effekt und hierdurch deren

therapeutische Wirkung beeinträchtigen. Jenseits dieser wissenschaftlich orientierten Medizin haben sich zahlreiche komplementäre und alternative Behandlungsverfahren entwickelt, welche sich häufig beziehen auf persönliche individuelle Erfahrungen oder Entdeckungen ihrer Begründer. Sie erheben den Anspruch auf eine individualspezifische Wirkung, wollen lindern und heilen in Ergänzung zur Evidenzbasierten Medizin und trotzen deren Kritik. Das Verbindende zwischen diesen alternativen Behandlungsverfahren und der wissenschaftlich orientierten Medizin ist das Vertrauen des Patienten in deren Heilwirkungen. Sind die Selbstheilungskräfte, welche durch dieses Vertrauen aktiviert werden, Behauptungen über Heilwirkungen über diesen Placeboeffekt hinaus, sind für jede Therapieform in klinischen Studien wissenschaftlich zu beweisen, gerade auch um den Gefahren der Täuschung und Selbsttäuschung zu entgehen und um das Vertrauen des Patienten nicht zu missbrauchen.

Sold Out Alex Molnar, Faith Boninger, 2015-08-07. If you strip away the rosy language of school business partnership win-win situation giving back to the community and the like, what you see when you look at corporate marketing activities in the schools is an example after example of the exploitation of children for financial gain. Over the long run the financial benefit marketing in schools delivers to corporations rests on the ability of advertising to brand students and thereby help insure that they will be customers for life. This process of branding involves inculcating the value of consumption as the primary mechanism for achieving happiness, demonstrating success and finding fulfillment. Along the way branding children just like branding cattle inflicts pain. Yet school districts desperate for funding sources often eagerly welcome marketers and seem not to recognize the threats that marketing brings to children's well-being and to the integrity of the education they receive. Given that all ads in school pose some threat to children, it is past time for considering whether marketing activities belong in school. Schools should be ad-free zones.
