Umstrittene Regierungsführung in Afghanistan Frangis Dadfar Spanta, 2019-01-18 Seit 40 Jahren herrscht in Afghanistan Krieg. Bisher war die Frage der Machtverteilung, also die Definition der Hoheitsgebiete der einzelnen Elitefraktionen, nicht klar zu erkennen. Frangis Dadfar Spanta untersucht die unterschiedlichen Konflikt dynamiken, um dann Lösungsschritte für einen Friedensbildungsprozess vorzuschlagen. Anhand der unterschiedlichen Eliten aus Politik, Kultur, Wirtschaft, Medien, Bildung und Religion zeichnet sie die Patronage Klientel Netzwerke nach. Eine Besonderheit der Studie bilden Interviews mit Ashraf Ghani, Hamid Karzai, Abdullah Abdullah, Atta Noor sowie mit zwei Taliban Repräsentanten. Die Untersuchung ist aufgrund ihrer theoretischen und methodischen Herangehensweise sowohl für Politik und Sozialwissenschaftler_innen als auch für Anthropolog_innen lesenswert.

Digenetic Trematodes Rafael Toledo, Bernard Fried, 2019-07-11 Digenetic trematodes constitute a major helminth group that parasitize human and animals and are a major cause of morbidity and mortality. The diseases caused by trematodes have been neglected for years, especially as compared with other parasitic diseases. However, the geographical limits and the populations at risk are currently expanding and changing in relation to factors such as growing international markets, improved transportation systems, and demographic changes. This has led to a growing international interest in trematode infections, although factors such as the difficulties entailed in the diagnosis, the complexity of human and agricultural practices, the lack of assessments of the economic costs, or the limited number of effective drugs are preventing the development of control measures of these diseases in humans and livestock. In depth

studies are needed to clarify the current epidemiology of these helminth infections and to identify new and specific targets for both effective diagnosis and treatments The main goal of the second edition of this book is to present the major trematodes and their corresponding diseases in the framework of modern parasitology considering matters such as the application of novel techniques and analysis of data in the context of host parasite interactions and to show applications of new techniques and concepts for the studies on digenetic trematodes This is an ideal book for parasitologists microbiologists zoologists immunologists professional of public health workers clinicians and graduate and post graduate students
