

Structure of Poem

There are two basic kinds of structure, formal and thematic.

Formal structure is the way the poem goes together in terms of its component parts: stanza's, paragraphs or relation between the parts.

Thematic structure, known in respect to fiction as 'plot', is the way the argument or presentation of the material of the poem is developed. For instance a poem might state a problem in eight lines, an answer to the problem in the next six; of the eight lines stating the problem, four might provide a concrete example, four a reflection on what the example implies.
