## **Domestic Violence And Psychology A Critical Perspective:**

Domestic Violence and Psychology Paula Nicolson, 2019-01-29 Despite changes to laws and policies across most western democracies intended to combat violence to women intimate partner violence and abuse IPVA remains discouragingly commonplace Domestic Violence and Psychology Critical Perspectives on Intimate Partner Violence and Abuse showcases women's harrowing stories of living with and leaving violent partners offering a psychological perspective on domestic violence and developing a theoretical framework for examining the context intentions and experiences in the lives of people who experience abuse and abuse themselves Nicolson provides an analysis of survivors' real life stories and thoughts about IPVA The attitudes of the general public and health and social care professionals are also presented and discussed The theoretical perspective employs three levels of evidence the material context discursive explanations and intrapsychic emotional Domestic Violence and Psychology is divided into three parts accordingly engaging qualitative data from interviews and quantitative data from surveys to illustrate these theoretical perspectives Although many pro feminist sociologists and activists firmly believe that any attempt to explain domestic violence potentially condones it this book takes up the challenge to make a compelling case demonstrating how we need to widen understanding of the psychology of survivors and their intimate relationships if we are to defeat IPVA The new edition has been updated to include the latest developments in IPVA research and practice and in particular examines the impact of a violent and abusive family life on all members including children This is essential reading for students academics and professionals interested in domestic abuse as well as professionals and practitioners including psychologists social workers the police prison officers probation staff policy makers and charity workers

*Domestic Violence and Psychology* Paula Nicolson, 2010-12-14 This book rethinks the way psychological knowledge of domestic violence has typically been constructed It puts forward a psychological perspective which is both critical of the traditional woman blaming stance as well as being at odds with the feminist position that men are wholly to blame for domestic abuse and that violence in intimate relationships is caused by gender power relations It is rather argued that to neglect the emotions experiences and psychological explanations for domestic violence is to fail those who suffer and thwart attempts to prevent future abuse Paula Nicolson suggests that domestic violence needs to be discussed and understood on several levels material contexts including resources such as support networks as well as the physical impact of violence the discursive as a social problem or gendered analysis and the emotional level which can be both conscious and unconscious Drawing on the work of scholars including Giddens Foucault Klein and Winnicott and using interview and survey data to illustrate its arguments Domestic Violence and Psychology develops a theoretical framework for examining the context intentions and experiences in the lives of women in abusive relationships the men who abuse and the children who suffer in the abusive family As such this book will be of great interest to those studying social and clinical psychology social work cultural studies sociology and women's studies
