**Theoretical Nursing** Afaf Ibrahim Meleis, 2011 An additional assumption was that the processes for theory development were new to nursing and hence nurses in graduate programs learned strategies for advancing knowledge from other disciplines This assumption was debunked with the knowledge that nurses were always engaged in knowledge development driven by their experiences in clinical practice Because of these assumptions most of the early writing about theory development was about outlining strategies that should be used rather than strategies that have already been used in the discipline to develop theories Theorists themselves did not uncover or adequately discuss ways by which they developed their theories therefore the tendency was to describe processes that were based on theories developed in other disciplines mainly the physical and social sciences And an implicit assumption was made that there should be a single strategy for theory development some claiming to begin the process from practice and others believing it should be driven by research Provided by publisher

Rocío del Carmen Guillén Velasco, Carlos Christian Compton García Fuentes, 2016-03-08 Contiene una descripción del proceso que siguen las enfermeras en su práctica profesional como servicio a la sociedad, un concepto definido esencial y remunerado especialmente responde a preguntas sobre su esencia, su ser, su saber y su hacer que le permiten tomar decisiones prácticas para la persona, el cuidado, la salud, el entorno y enfermar a como proceso con una elevada responsabilidad social que precisa dos requisitos: la independencia y la libertad Como la práctica profesional no es una isla sino un proceso integrado en la vida cotidiana se describe la filosofía de dicha práctica desde la orientación filosófica positivista y hermenéutica interpretativa y la necesidad de una complementariedad que se traduzca en una práctica de enfermar científica y humana Este contenido pretende que reflexiones sobre los nuevos aportes de la filosofía a la disciplina de enfermar en el marco de los problemas sustantivos de su práctica y de los roles derivados de su hacer concreto que es cuidar la salud de la persona En este sentido el propósito principal del libro es ofrecer una visión propia de enfermar como profesión y como disciplina científica interesada por el cuidado de la vida y que mediante un sistema de creencias le da firmeza ética y bioética necesaria en su quehacer profesional Esto lo consideramos básico porque los valores que le asigne la enfermera a la persona tiene que ver con el conocimiento de la naturaleza humana y la esencia del ser ontológico El libro está integrado por tres unidades En la primera unidad revisamos la naturaleza filosófica de la enfermería a partir de su quehacer profesional y de la lógica del proceso de cuidado aspectos ontológicos epistemológicos antropológicos filosóficos y éticos así como la filosofía de la praxis En la segunda hacemos un recorrido entre las posturas empíricas positivista y empírica hermenéutica hermenéutica en la epistemología del conocimiento en enfermar a el cual a su vez como teoría genera una oposición entre el conocimiento

obtenido en la reflexión y el conocimiento obtenido de la práctica o praxis de enfermería Finalmente en la tercera unidad reflexionamos sobre cómo la sociedad tecnocrática en la que vivimos genera políticas de salud guiadas según la productividad y eficiencia como consecuencia del neoliberalismo que a su vez producen una alienación en el personal de salud por lo que los profesionales de enfermería para estar en consonancia con el cuidado deben estar guiados por una perspectiva humanista que integre la teoría con la práctica la praxis de enfermería y que logren el sentido de la práctica de enfermería trascender desarrollar sus potencialidades buscando hacer de su práctica una praxis constante y buscando siempre apoyado por la técnica y la tecnología la promoción de la vida la dignidad de la persona sustentada en el amor incondicional hacia la persona cuidada
