Designing Large Scale LANS Kevin Dooley, 2001-11-21 This unique book offers a vendor neutral approach for designing large local area networks according to business or organizational needs rather than from a product perspective Author and independent network design consultant Kevin Dooley outlines top down network design for building a technological infrastructure to fit your organization's requirements a process far more effective and cost efficient than fitting the organization to the parameters of a shrink wrapped proprietary solution Dooley argues that the design of a network is largely independent of the products used Whether you use a Cisco or Juniper router the same security issues and protocols apply The questions he addresses in this book are need specific Do I use a router or a switch Should I route between switched areas or switch between routed areas Designing Large Scale LANs covers everything from security bandwidth and scalability to network reliability which includes backup redundancy and points of failure Specific technologies are analyzed in detail network topologies routing and switching strategies wireless virtual LANs firewalls and gateways security Internet protocols bandwidth and multicast services The book also discusses proprietary technologies that are ubiquitous such as Cisco's IOS and Novell's IPX This complete guide to top down network design will help you choose the right network solutions If you're designing large scale networks and need expert advice and guidance look no further than Designing Large

Scale LANs **ROUTING INFORMATION PROTOCOL** Mulayam Singh,2020-05-15 RIP stands for Routing Information Protocol that is an old distance vector routing protocol It permits the usage of maximum 15 routers for hop count as it is distance vector RIP has 2 versions First syncs with full updates every 30 seconds by using doing broadcast Few updates and brought about are performed by using 2nd version by the usage of multicast If we evaluate different routing protocols like OSPF EIGRP and IS IS RIP is quite slow protocol Because of this RIP is now not used generally by using networking administrations however its understanding is very important if your beginner in the networking field In this lesson we will study basic and advance topics of Routing Information Protocols
