**X Saves the World** Jeff Gordinier, 2008-03-27 Read Jeff Gordinier's posts on the Penguin Blog In this simultaneously hilarious and incisive manifesto for a generation that's never had much use for manifestos Gordinier suggests that for the first time since the Smells Like Teen Spirit breakthrough of the early 1990s Gen X has what it takes to rescue American culture from a state of collapse Over the past twenty years the so-called slackers have irrevocably changed countless elements of our culture from the way we watch movies to the way we make sense of a cracked political process to the way the whole world does business

**City at the Cusp** J. Allison Brown, 2009-08-21 To arrive at the pinnacle is a mark of progress But where do we go from here At this point because we can only improve modestly due to diminishing marginal returns things change Mentalities change philosophies change priorities change people change and at the root of these changes we find cultural evidence for the demise of the American economy City at the Cusp looks thoroughly at this sociological issue providing a unique glance at and possible remedies for overcoming this incredibly timely and urgent matter

*Evolution versus Revolution* Melvyn L. Fine, 2015-11-02 Revolutionary and evolutionary theorists have very different views about change Fine writes in favor of evolution He proposes an integrated model of social evolution one that accounts for the complexity inconclusiveness and impediments that characterize social transformations This multi-dimensional approach recognizes that change is always saturated in conflict Major changes are rarely initiated by conscious decisions that are automatically implemented power and morality generally control the direction that significant alterations take Fine explains how the social generalist dilemma places our need for both flexibility and stability in opposition to each other such that non-rational mechanisms are needed to produce a solution He also describes how an inverse force ruledictates that small societies are bound together by strong social forces whereas large ones are secured by weak forces This suggests that social roles are likely to become professionalized over time If social change is in fact analogous to natural rather than artificial selection we may be in the midst of an only partially predictable middle class revolution Indeed the current impasse between liberals and conservatives may be evidence that we are in the consolidation phase of this process Should this be the case a paradigm shift not a classical revolution is in our future

**An All-Consuming Century** Gary Cross, 2000-09-14 The unqualified victory of consumerism in America was not a foregone conclusion The United States has traditionally been the home of the most aggressive and often thoughtful criticism of consumption including Puritanism Prohibition the simplicity movement the 60s hippies and the consumer rights movement But at the dawn of the twenty first century not only has American consumerism

triumphed there isn't even an ism left to challenge it. An All Consuming Century is a rich history of how market goods came to dominate American life over that remarkable hundred years between 1900 and 2000 and why for the first time in history there are no practical limits to consumerism. By 1930 a distinct consumer society had emerged in the United States in which the taste, speed, control, and comfort of goods offered new meanings of freedom, thus laying the groundwork for a full-scale ideology of consumer's democracy after World War II. From the introduction of Henry Ford's Model T so low in price that no man making a good salary will be unable to own one and the innovations in selling that arrived with the department store window displays, self-service, the installment plan, to the development of new arenas for spending: amusement parks, penny arcades, baseball parks, and dance halls, Americans embraced the new culture of commercialism with reservations. However, Gary Cross shows that even the Depression, the counterculture of the 1960s, and the inflation of the 1970s made Americans more materialistic, opening new channels of desire and offering opportunities for more innovative and aggressive marketing. The conservative upsurge of the 1980s and 90s indulged in its own brand of self-aggrandizement by promoting unrestricted markets. The consumerism of today, thriving and largely unchecked, no longer brings families and communities together; instead, it increasingly divides and isolates Americans. Consumer culture has provided affluent societies with peaceful alternatives to tribalism and class war. Cross writes, and it has fueled extraordinary economic growth. The challenge for the future is to find ways to revive the still valid portion of the culture of constraint and control the overpowering success of the all-consuming twentieth century.
