Lang, Celeste Montoya, 2019-07-27 A long and ongoing challenge for social justice movements has been how to address difference. Traditional strategies have often emphasized universalizing messages and common identities as means of facilitating collective action. Feminist movements, gay liberation movements, racial justice movements, and even labour movements have all focused predominantly on respective singular dimensions of oppression. Each has called on diverse groups of people to mobilize but without necessarily acknowledging or grappling with other relevant dimensions of identity and oppression. While focusing on commonality can be an effective means of mobilization, universalist messages can also obscure difference and can serve to exclude and marginalize groups in already precarious positions. Scholars and activists, particularly those located at the intersection of these movements, have long advocated for more inclusive approaches that acknowledge the significance and complexity of different social locations with mixed success. *Gendered Mobilizations and Intersectional Challenges* provides a much needed intersectional analysis of social movements in Europe and North America. With an emphasis on gendered mobilization, it looks at movements traditionally understood and/or classified as singularly gendered as well as those organized around other dimensions of identity and oppression or at the intersection of multiple dimensions.

Non-State Challenges in a Re-Ordered World Stefano Ruzza, Anja Jakobi, Charles Geisler, 2015-10-14

There is a sprawling scholarship on violence, crime, and corrupt state rule, yet few have interpreted these challenges as transformative at the global scale and as a potential source of alternative non-state legitimacy. This volume challenges Westphalian conservatism in a provocative yet plausible manner, shedding light on the ubiquity and diversity of unfolding non-state agendas and their effect on the imagined state community. Focusing on civil war, parties, warlords, commercial providers of security, multinational companies, and criminal organizations, the book directs attention to theoretical questions and policy challenges arising from non-state armed expansion. To accomplish this, the contributors present a range of case studies and comparisons within three thematic sections: the first takes stock of how, when, and in what measure state and state system legitimacy are challenged by non-state violent or criminal activity; the second addresses the nature, effectiveness, and side effects of different state-mandated reactions to non-state activities; and the third focuses on the recombination of state and non-state actors contributing to processes of socio-political transformation. This volume provides a current analysis of different armed and violent actors encroaching on the state's monopoly of violence. It seeks to spark debate about global political change and will be of interest to students and scholars of global governance, global security, and international relations.

Transcending Racial Barriers Michael O. Emerson, George A. Yancey, 2011 Despite recent progress against racial inequalities American society continues to produce attitudes and outcomes that reinforce the racial divide In Transcending Racial Barriers Michael Emerson and George Yancey offer a fresh perspective on how to combat racial division They document the historical move from white supremacy to institutional racism then look at modern efforts to overcome the racialized nature of our society The authors argue that both conservative and progressive approaches have failed as they continually fall victim to forces of ethnocentrism and group interest They then explore group interest and possible ways to account for the perspectives of both majority and minority group members They look to multiracial congregations multiracial families the military and sports teams all situations in which group interests have been overcome before In each context they find the development of a core set of values that binds together different racial groups along with the flexibility to express racially based cultural uniqueness that does not conflict
