Maffeo,2015-12-16 This unique reference presents 59 biographies of people who were key to the sea services being reasonably prepared to fight the Japanese Empire when the Second World War broke out and whose advanced work proved crucial These intelligence pioneers invented techniques procedures and equipment from scratch not only allowing the United States to hold its own in the Pacific despite the loss of most of its Fleet at Pearl Harbor but also laying the foundation of today s intelligence methods and agencies One hundred years ago in what was clearly an unsophisticated pre information era naval intelligence and foreign intelligence in general existed in rudimentary forms almost incomprehensible to us today Founded in 1882 the U S Office of Naval Intelligence ONI the modern world s oldest continuously operating intelligence

agency functioned for at least its first forty years with low manning small budgets low priority and no prestige The navy s early steps into communications intelligence COMINT which included activities such as radio interception radio traffic analysis and cryptology came with the 1916 establishment of the Code and Signals Section within the navy s Division of Communications and with the 1924 creation of the Research Desk as part of the Section Like ONI this COMINT organization suffered from low budgets manning priority and prestige The dictionary focuses on these pioneers many of whom went on even after World War II to important positions in the Navy the State Department the Armed Forces Security Agency the National Security Agency and the Central Intelligence Agency It reveals the work and innovations of well and lesser known individuals who created the foundations of today s intelligence apparatus and analysis *Soldiers, Bombs and Rifles* Paola Lo Cascio, Antoni Segura i Mas, Alberto Pellegrini, 2014-10-16 This volume is the result of an academic initiative organized by the Center for International Historical Studies of the University of Barcelona CEHI UB in April 2012 with the purpose of bringing Military History to the center of the attention of university and historiographical debate This choice is based on the idea that too often Military History is considered a technical discipline only intended for experts On the contrary we think that on the one hand this research field constitutes an unavoidable tool for the interpretation of the historical processes of contemporaneity and that on the other Military History is among the most interesting research fields because of its intrinsic interdisciplinarity On the basis of these considerations the congress and the resulting book propose the analysis of some of the main war processes of the twentieth century from a perspective that could situate them in the wider background defined by the conflicts themselves The book gathers the contributions of Professors Fortunato Minniti University of Roma Tre Rome Giuseppe Conti University La Sapienza Rome Joan Villarroya University of Barcelona Allan R Millett University of New Orleans and Antoni Segura i Mas University of Barcelona respectively about World War I war intelligence the Spanish Civil War World War II and the asymmetric conflicts ranging from the Cold War to more recent examples **Encyclopedia of**
