Design Nature And Revolution Toward A Critical Ecology:

Design, Nature, and Revolution Tomás Maldonado, 1972 Design Discourse Victor Margolin, 1989-09-15 The editor has gathered together a body of writing in the emerging field of design studies The contributors argue in different ways for a rethinking of design in the light of its cultural significance and its powerful position in today's society The collection begins with a discussion of the various expressions of opposition to the modernists' purist approach toward design Drawing on postmodernist theory and other critical strategies the writers examine the relations among design technology and social organization to show how design has become a complex and multidisciplinary activity The second section provides examples of new methods of interpreting and analysing design ranging from rhetoric and semiotics to phenomenology demonstrating how meaning is created visually A final section related to design history shifts its emphasis to ideological frameworks such as capitalism and patriarchy that establish boundaries for the production and use of design A Companion to Contemporary Design since 1945 Anne Massey, 2019-02-22 A critical overview of contemporary design and its place within the broader context of art history A Companion to Contemporary Design since 1945 introduces readers to a collection of specially commissioned essays exploring the complex areas of design that emerged through the latter half of the twentieth century design history design methods design studies and more recently design thinking The book delivers a thoughtful overview of all design disciplines and also strives to stimulate interdisciplinary debate and examine unconsidered convergences among design applications in different fields By offering a new perspective on design the articles assembled here present a challenging account of the boundaries between design history and its cognate disciplines especially art history The volume comprises five sections Time Place Space Objects and Audiences that discuss environments for design and how we interact with designed objects and spaces Notable features include 24 new essays reflecting the current state of design history and theory and examining developments on a global basis Contributions by eminent scholars and practitioners from around the globe Enriched throughout with illustrations A Companion to Contemporary Design since 1945 provides a new and thought provoking revision of our conception and understanding of contemporary design that will be essential reading for students at both undergraduate and graduate levels as well as researchers and teachers working in design history theory and practice and in related fields **Introduction to Design Theory** Michalle Gal, Jonathan Ventura, 2023-07-31 Introduction to Design Theory introduces a comprehensive systematic and didactic outline of the discourse of design Designed both as a course book and a source for research this textbook methodically covers the central concepts of design theory definitions of design its historical milestones and its relations to culture industry body ecology language society gender and ideology Demonstrated by a shift towards the importance of the sociocultural context in which products are manufactured and embedded this book showcases design theory as an emerging sub discipline of design unique in its practice based approach and its broad perception of design It offers an in depth understanding of the central concepts such as form and function

theory and practice through a discussion of key case studies and historical examples such as the advent of the view of design in antiquity the introduction of mass production to modernist design or the ideological shifts in design in the mid twentieth century as well as analytical tools for further dissection and learning in practice With a focus on a combination of several theoretical knowledge foundations aesthetics and philosophy critical theories cultural studies design history and design anthropology the reader is enabled to approach design as a central pivot around which contemporary culture revolves reflecting reaffirming or challenging social and cultural structures Aimed towards undergraduate and postgraduate students as well as teachers and scholars from across the design disciplines Introduction to Design Theory invites readers to engage with design from an interdisciplinary perspective departing from the traditional academic compartmentalisation of practice history and philosophy

Reyner Banham Nigel Whiteley, 2003-08-29 An intellectual biography of the cultural critic Reyner Banham Reyner Banham 1922 88 was one of the most influential writers on architecture design and popular culture from the mid 1950s to the late 1980s Trained in mechanical engineering and art history he was convinced that technology was making society not only more exciting but more democratic His combination of academic rigor and pop culture sensibility put him in opposition to both traditionalists and orthodox Modernists but placed him in a unique position to understand the cultural social and political implications of the visual arts in the postwar period His first book Theory and Design in the First Machine Age still in print with The MIT Press after forty years was central to the overhaul of Modernism and it gave Futurism and Expressionism credibility amid the dynamism and change of the 1960s This intellectual biography is the first comprehensive critical examination of Banham's theories and ideas not only on architecture but also on the wide variety of subjects that interested him It covers the full range of his oeuvre and discusses the values enthusiasms and influences that formed his thinking

Art and Pluralism Nigel Whiteley, 2012-08-03 This book examines the writings of Lawrence Alloway 1926 1990 one of the most influential and widely respected art writers of the post War years It provides a close and critical reading of his writings and sets his work in the cultural and political context of the London and New York art worlds of the 1950s to the early 1980s

Happiness by Design Justus Nieland, 2020-02-18 A cultural history of modern lifestyle viewed through film and multimedia experiments of midcentury designers Charles and Ray Eames For the designers Charles and Ray Eames happiness was both a technical and ideological problem central to the future of liberal democracy Being happy demanded new things but also a vanguard life in media that the Eameses modeled as they brought film into their design practice Midcentury modernism is often considered institutionalized but Happiness by Design casts Eames era designers as innovative media artists technophilic humanists change managers and neglected film theorists Happiness by Design offers a fresh cultural history of midcentury modernism through the film and multimedia experiments of Charles and Ray Eames and their peers Will Burtin Lszl Moholy Nagy and Gyrgy Kepes among others at a moment when designers enjoyed a new cultural prestige Justus Nieland traces how as representatives of the American Century's exuberant material

culture Cold War designers engaged in creative activities that spanned disciplines and blended art and technoscience while reckoning with the environmental reach of media at the dawn of the information age Eames era modernism Nieland shows fueled novel techniques of culture administration spawning new partnerships between cultural and educational institutions corporations and the state From the studio showroom floor or classroom to the stages of world fairs and international conferences the midcentury multimedia experiments of Charles and Ray Eames and their circle became key to a liberal democratic lifestyle and also anticipated the look and feel of our networked present *Design and Politics* Katarina Serulus, 2018-10-08 The unique position of design in the political context of postwar Belgium In the postwar era design became important as a marker of modernity and progress at world fairs and international exhibitions and in the global markets The Belgian state took a special interest in this vanguard phenomenon of industrial design as a vital political and economic strategic tool in the context of the Cold War and the creation of the European community This book describes the unique position that design occupied in the political context of postwar Belgium as it analyses the public promotion of design between 1950 and 1986 It traces this process from the first government backed manifestations and institutions in the 1950s through the 1960s and 1970s until design lost its privileged position as a state backed institution a process which culminated in the closure of the Brussels Design Centre in 1986 in the midst of the Belgian federalisation process A key figure in this history is the policymaker Josine des Cressonnières who played a leading role in the national and international design community and succeeded in connecting very different political worlds through the medium of design *The Authority of Everyday Objects* Paul Betts, 2004-06-09 From the Werkbund to the Bauhaus to Braun from furniture to automobiles to consumer appliances twentieth century industrial design is closely associated with Germany In this pathbreaking study Paul Betts brings to light the crucial role that design played in building a progressive West German industrial culture atop the charred remains of the past The Authority of Everyday Objects details how the postwar period gave rise to a new design culture comprising a sprawling network of diverse interest groups including the state and industry architects and designers consumer groups and museums as well as publicists and women's organizations who all identified industrial design as a vital means of economic recovery social reform and even moral regeneration These cultural battles took on heightened importance precisely because the stakes were nothing less than the very shape and significance of West German domestic modernity Betts tells the rich and far reaching story of how and why commodity aesthetics became a focal point for fashioning a certain West German cultural identity This book is situated at the very crossroads of German industry and aesthetics Cold War politics and international modernism institutional life and visual culture **Design and Systems** Arne Collen, Wojciech W. Gasparski, Praxiology starts from the point of view of effectiveness It has three components analysis of concepts involving purposive actions critique of modes of action from the viewpoint of efficiency and normative advisory aspects in recommendations for increasing human efficiency The third volume of this series aims to make more visible to the

English readership the importance of design throughout the many disciplines professions and arenas of human endeavor Design is a pervasive part of our daily lives to such an extent that it goes largely unnoticed It has become a near invisible aspect of our civilized existence But when we stop for a moment to study an artifact activity group and institution or any entity or life process we can begin to see and imagine the design the designing and the human designers who contributed to it Design and Systems represents a set of contributions made to the methodological study of design Chapters and contributors include Toward Metamedicine by Kazem Sadegh Zadeh Design Engineering Methodologies in English and German Language Regions and Influences of Culture by Wolfgang E Eder Systems Methodology and Design by Gerald Nadler Problem Forming Problem Finding and Problem Solving in Design by Herbert A Simon and Design A Journey to the Future by Bela H Banathy Design and Systems continues the trend of original research done in a little known but important area It will be an enlightening read for sociologists philosophers and scholars interested in the study of design Drifting by Intention Peter Gall Krogh, Ilpo Koskinen, 2020-03-11 Constructive design research is an exploratory endeavor building exemplars arguments and evidence In this monograph it is shown how acts of designing builds relevance and articulates knowledge in combination Using design acts to build new knowledge invite reframing of questions and new perceptions to build up Respecting the emergence of new knowledge in the process invite change of cause and action The authors term for this change is drifting designers drift and they drift intentionally knowing what they do The book details how drifting is a methodic practice of its own and provides examples of how and where it happens This volume explores how to do it effectively and how it depends on the concept of knowledge The authors identify four epistemic traditions in constructive design research By introducing a Knowledge Relevance model they clarify how design experiments create knowledge and what kinds of challenges and contributions designers face when drifting Along the lines of experimental design work the authors identify five main ways in which constructive experiments drift Only one of them borrows its practices from experimental science others build on precedents including arts and craft practices As the book reveals constructive design research builds on a rich body of research that finds its origins in some of the most important intellectual movements of 20th century This background further expands constructive design research from a scientific model towards a more welcoming understanding of research and knowledge This monograph provides novel actionable models for steering and navigating processes of constructive design research It helps skill the design researcher in participating in the general language games of research and helps the design researcher build research relations beyond the discipline **Designology** Wojciech W. Gasparski, Tufan Orel, 2018-02-06 The more complex a human action is the greater the need to formulate a plan of action devise a method of implementation and evaluate its execution Such preparation is called design or planning and can be defined as a conceptual preparation for action Design and planning by themselves are so complex and important that they need informed preparation which calls for systematic designological studies This volume brings together original

contributions of researchers and practitioners in design theory design research and design studies Its main purpose is to highlight the possibilities of the discipline of designology Doing and thinking or thinking and doing whatever the order are intertwined That is why praxiology the science of action defines design as a conceptual preparation of action Included here are contributions from Jack Brzezinski Eduardo Corte Real Nigel Cross Michel Faucheux Joelle Forest Wojciech W Gasparski Ioannes B Kapelouzios Thorbjørn Mann Tom Maver Tarkko Oksala Tufan Orel Sevil Saryldz and Ladislav Tondl Designology is the latest volume in Transaction s highly regarded Praxiology series *After Taste* Kent Kleinman, Joanna Merwood-Salisbury, Lois Weinthal, 2012-08-10 What is taste This well curated collection documents new theories and emerging critical practices in the field of interior design It investigates taste a concept central to the formation of the discipline in the eighteenth century that was repudiated by architects in the early twentieth century but which continues to play an important role in interior design today Essays by historians and critics are complemented by interviews with practitioners on the margins of normative practice and portfolios of the work of contemporary designers *"Science, Technology, and Utopias "* Christine Filippone, 2017-07-05 The rise of proxy wars the Space Race and cybernetics during the Cold War marked science and technology as vital sites of social and political power Women artists historically excluded from these domains responded critically while simultaneously redeploying the products of Technological Society into works that promoted ideals of progress and alternative concepts of human community In this innovative book author Christine Filippone offers the first focused examination of the conceptual use of science and technology by women artists during and just after the women s movement She argues that artists Alice Aycock Agnes Denes Martha Rosler and Carolee Schneemann used science and technology to mount a critique on Cold War American society as they saw it conservative and constricting Motivated by the contemporary American Women s Movement these artists transformed science and technology into new modes of artmaking that transgressed modernist heroic painterly styles and subverted the traditional economic structures of the gallery the museum and the dealer At the same time the artists also embraced these domains of knowledge and practice as expressions of hope for a better future Many found inspiration in the scientific theory of open systems which investigated problems of wholeness dynamic interaction and organization enabling consideration of the porous boundaries between human bodies and their social political and nonhuman environments Filippone also establishes that the theory of open systems not only informed feminist art but also continued to influence women artists practice of reclamation and ecological art through the twenty first century *Decision Making and Change in Human Affairs* H. Jungermann, G. De Zeeuw, 2012-12-06 It is only just recently that people have the tools to judge how well they are doing when making decisions These tools were conceptualized in the seventeenth century Since then many people have worked to sharpen the concepts and to explore how these can be applied further The problems of decision making and the theory developed correspondingly have drawn the interest of mathematicians psychologists statisticians economists philosophers organizational experts

sociologists not only for their general relevance but also for a more intrinsic fascination There are quite a few institutionalized activities to disseminate results and stimulate research in decision making For about a decade now a European organizational structure centered mainly around the psychological interest in decision making There have been conferences in Hamburg Amsterdam Uxbridge Rome and Darmstadt Conference papers have been partly published The organization has thus stabilized and its relatively long history makes it interesting to see what kind of developments occurred within the area of interest

The Ruins of Capitalism and Possibilism Vando Borghi, 2025-08-27 This book explores two themes in connection with contemporary capitalism infrastructural capitalism as the most advanced phase of a modernity of which the workman or homo faber is the embodiment who exists within an infrastructure whose logic of connectivity is aimed at value extraction and a landscape of ruins in the form of symbolic misery the Anthropocene and a process of refeudalisation that the homo faber has been piling up around himself as a result In response to this dynamic the author elaborates a social cultural and political project a design hope of both material and immaterial dimensions that adopts the perspective of possibilism an outlook that eschews ever greater social and environmental costs in the name of future development but seeks a logic of reproduction based on a real politics of care in the form of generalised social action *The Ruins of Capitalism and Possibilism* will therefore appeal to scholars of social and political theory with interests in critiques of capitalism and alternative futures

Imagining the Present Richard Kalina, 2012-11-12 Bringing together twenty nine of Lawrence Alloway's most influential essays in one volume this fascinating collection provides valuable perspectives on the art and visual culture of the second half of the twentieth century Lawrence Alloway ranks among the most important critics of his time and his contributions to the spirited and contentious dialogue of his era make for fascinating reading These twenty nine provocative essays from 1956 to 1980 from the man who invented the term pop art bring art film iconography cybernetics and culture together for analysis and investigation and do indeed examine the context content and role of the critic in art and visual culture Featuring a critical commentary by Richard Kalina and preface by series editor Saul Ostrow *Imagining the Present* will be an enthralling read for all art and visual culture students

The Politics of Curiosity Enrico Campo, Yves Citton, 2024-04-26 Through a variety of studies in the emerging field of attentional studies this book examines and seeks alternatives to the current attention economy Bringing together the work of leading scholars of critical attention studies to reflect on issues such as technopolitics sociopolitics and the politics of distraction it offers a new and multidisciplinary conceptualization of attention that emphasizes the connections between attention and curiosity distraction decoloniality and care Above all *The Politics of Curiosity* asks us to consider the nature and ambivalence of the curious forms of politics that might be taking shape in the shadow of our current attention economy The attention economy has become a household name we all know our attention is

being harvested commodified and packaged to be sold to advertisers by capitalist platforms We all complain about it some of us dream of disconnection others call to fight back By focusing on attentional deficits and by reducing attention to being focused however the common view may miss wider stakes and more promising opportunities This collective volume provides a new frame of analysis based on three displacements First it relocates attentional issues within a triangulation that explores a continuum between attention distraction and curiosity Second it invites us to investigate into the mental infrastructures that socially condition our perceptions and understandings of the world Third it points towards emancipatory politics of curiosity to provide alternatives to the attention economy Contributions range from pedagogy to media theory via digital studies epistemology sociology political philosophy literary history aesthetics film and dance studies They gather some of the leading scholars who shaped the study of attention questioned the values of distraction and explored the potentials of curiosity over the recent years They extend across nine countries four continents and seven languages to provide a multicultural approach to these debates Together they help us understand how our current mental infrastructures have taken shape under specific regimes of power and authority in a world dominated by capital colonialism and patriarchy But they also sketch what can be done to redeploy them around imperatives of respect and care from a better awareness of our mental biases online behaviors and bodily movements to our collective capacity to restructure classroom interactions to launch alternative digital platforms to build democratic movements The first platform for discussion of the politics of attention and curiosity and an essential point of reference for future debate this book will appeal to scholars of sociology politics and psychology

Relearning from Las Vegas Aron Vinegar, Michael J. Golec, 2009 Evaluates for the first time one of the foundational works in architecture criticism Immediately on its publication in 1972 *Learning from Las Vegas* by Robert Venturi Denise Scott Brown and Steven Izenour was hailed as a transformative work in the history and theory of architecture liberating those in architecture who were trying to find a way out of the straitjacket of architectural orthodoxies Resonating far beyond the professional and institutional boundaries of the field the book contributed to a thorough rethinking of modernism and was subsequently taken up as an early manifestation and progenitor of postmodernism
