moderne Design in den Blick zu nehmen Zwischen Alltagskultur und Design Avantgarden bewegen sich vielfältige interdisziplinäre Strömungen deren theoretische Modelle in Kontextualisierungen und Analysen der Designwissenschaft zusammenlaufen Hier zeigt sich bereits eine geisteswissenschaftliche Durchdringung und Akzeptanz des Designs als epidemisches Gegenstück zur freien Kunst wobei diese Meta-Perspektive letztlich eine Forschung über Design darstellt Design als konkrete Praxis begriffen artikuliert sich jedoch als Relation von Problem Entwurf und Prototyp so dass ein handlungstheoretisches Modell einer Forschung durch Design angesetzt werden kann Designforschung steht damit im Kontrast zur Designwissenschaft denn sie agiert dynamisch empirisch und operativ und bindet zwar Theoriemodelle und konkrete Werkzeuge lässt diese aber innerhalb konkreter Gestaltungsweisen zu pragmatischen Erkenntnissen werden Der Band adressiert konkrete Designfelder arbeitet Aspekte der konkreten und empirischen Designforschung heraus und nimmt gleichzeitig eine Verortung innerhalb der medientheoretischen Bezugsfelder vor Denn Forschung durch Design geschieht immer durch Medien Werke Instrumente und ästhetische Zeichen und Zustände hindurch

Making Design Theory Johan Redstrom, 2017-09-01 A new approach to theory development for practice driven research proposing that theory is something made in and through design Tendencies toward academization of traditionally practice based fields have forced design to articulate itself as an academic discipline in theoretical terms In this book Johan Redstrom offers a new approach to theory development in design research one that is driven by practice experimentation and making Redstrom does not theorize from the outside but explores the idea that just as design research engages in the making of many different kinds of things theory might well be one of those things it is making Redstrom proposes that we consider theory not as stable and constant but as something unfolding something acted as much as articulated inherently fluid and transitional Redstrom describes three ways in which theory in particular formulating basic definitions is made through design the use of combinations of fluid terms to articulate issues the definition of more complex concepts through practice and combining sets of definitions made through design into programs These are the building blocks for creating conceptual structures to support design Design seems to thrive on the complexities arising from dichotomies form and function freedom and method art and science With his idea of transitional theory Redstrom departs from the traditional academic imperative to pick a side theory or practice art or science Doing so he opens up something like a design space for theory development within design research

Designing with Society Scott Boylston, 2019-05-28 This book explores an emerging design culture that rigorously applies systems thinking to the practice of design as a form of facilitating change on an increasingly crowded planet Designers conversant in topics such as living systems cultural competence social justice and power asymmetries can contribute their creative skills to the world of social innovation to help address the complex social challenges of the 21st century By establishing a foundation built on the capabilities approach to human development designers have an opportunity to transcend previous disciplinary constraints and redefine our understanding of design agency With an emphasis on developing an adaptability to dynamic

situations the cultivation of diversity and an insistence on human dignity this book weaves together theories and practices from diverse fields of thought and action to provide designers with a concrete yet flexible set of actionable design principles And with the aim of equipping designers with the ability to drive long term sustainable change it proposes a new set of design competences that emphasize a deeper mindfulness of our interdependence with each other and with our life giving natural systems It s a call to action to use design and design thinking as a tool to transform our collective worldviews toward an appreciation for what we all hold in common a hope and a belief that our future is a place where all of humankind will flourish

Advancements in the Philosophy of Design Pieter E. Vermaas,Stéphane Vial,2018-03-02 This volume presents 25 essays on the philosophy of design With contributions originating from philosophy and design research and from product design to architecture it gives a rich spectrum of state of the art research and brings together studies on philosophical topics in which design plays a key role and design research to which philosophy contributes Coverage zooms in on specific and more well known design disciplines but also includes less studied disciplines such as graphic design interior architecture and exhibition design In addition contributors take up traditional philosophical issues such as epistemology politics phenomenology and philosophy of science Some essays cover philosophical issues that emerge in design for instance what design can do in addressing societal problems while other essays analyze main stream philosophical issues in which design is part of the argument as for instance abduction and aesthetics Readers will discover new research with insightful analyses of design research design thinking and the specificity of design Overall this comprehensive overview of an emerging topic in philosophy will be of great interest to researchers and students

Design for a Better World Donald A. Norman,2023-03-21 How human behavior brought our world to the brink and how human behavior can save us The world is a mess Our dire predicament from collapsing social structures to the climate crisis has been millennia in the making and can be traced back to the erroneous belief that the earth s resources are infinite The key to change says Don Norman is human behavior covered in the book s three major themes meaning sustainability and humanity centeredness Emphasize quality of life not monetary rewards restructure how we live to better protect the environment and focus on all of humanity Design for a Better World presents an eye opening diagnosis of where we ve gone wrong and a clear prescription for making things better Norman proposes a new way of thinking one that recognizes our place in a complex global system where even simple behaviors affect the entire world He identifies the economic metrics that contribute to the harmful effects of commerce and manufacturing and proposes a recalibration of what we consider important in life His experience as both a scientist and business executive gives him the perspective to show how to make these changes while maintaining a thriving economy Let the change begin with this book before it s too late

Design Strategy Nancy C. Roberts,2023-11-14 A new approach to addressing the contemporary world s most difficult challenges such as climate change and poverty Conflicts over the problem and the solution plague the modern world and land problem solvers in what has been called wicked problem territory a social space

with high levels of conflict over problems and solutions In Design Strategy Nancy C Roberts proposes design as a strategy of problem solving to close the gap between an existing state and a desired state Utilizing this approach designers and change agents are better able to minimize self defeating conflicts over problems and solutions break the logjam of opposition and avoid the traps that lock problem solvers into a never ending cycle of conflict Design as a field continues to grow and evolve but Design Strategy focuses on three levels of design where wicked problems tend to lurk strategic design of private and public organizations systemic design of networked and overlapping economic technical political and social subsystems and regenerative design of life giving realignment between humanity and nature Within this framework Roberts presents refreshingly interdisciplinary case studies that integrate theory and practice across diverse fields to guide professionals in any domain from business and nonprofit organizations to educational and healthcare systems and finally offers hope that humanity can tackle the existential challenges we face in the twenty first century

Designing with the Body Kristina Hook,2024-03-12 Interaction design that entails a qualitative shift from a symbolic language oriented stance to an experiential stance that encompasses the entire design and use cycle With the rise of ubiquitous technology data

driven design and the Internet of Things our interactions and interfaces with technology are about to change dramatically incorporating such emerging technologies as shape changing interfaces wearables and movement tracking apps A successful interactive tool will allow the user to engage in a smooth embodied interaction creating an intimate correspondence between users actions and system response And yet as Kristina H k points out current design methods emphasize symbolic language oriented and predominantly visual interactions In *Designing with the Body* H k proposes a qualitative shift in interaction design to an experiential felt aesthetic stance that encompasses the entire design and use cycle H k calls this new approach soma design it is a process that reincorporates body and movement into a design regime that has long privileged language and logic Soma design offers an alternative to the aggressive rapid design processes that dominate commercial interaction design it allows and requires a slow thoughtful process that takes into account fundamental human values She argues that this new approach will yield better products and create healthier more sustainable companies H k outlines the theory underlying soma design and describes motivations methods and tools She offers examples of soma design encounters and an account of her own design process She concludes with A Soma Design Manifesto which challenges interaction designers to restart their field to focus on bodies and perception rather than reasoning and intellect
