**The Behaviour and Design of Steel Structures to EC3, Fourth Edition** N.S. Trahair, M.A. Bradford, David Nethercot, Leroy Gardner, 2007-11-21 The fully revised fourth edition of this successful textbook fills a void which will arise when British designers start using the European steel code EC3 instead of the current steel code BS5950 The principal feature of the forth edition is the discussion of the behaviour of steel structures and the criteria used in design

according to the British version of EC3 Thus it serves to bridge the gap which too often occurs when attention is concentrated on methods of analysis and the sizing of structural components Because emphasis is placed on the development of an understanding of behaviour many analytical details are either omitted in favour of more descriptive explanations or are relegated to appendices The many worked examples both illustrate the behaviour of steel structures and exemplify details of the design process The Behaviour and Design of Steel Structures to EC3 is a key text for senior undergraduate and graduate students and an essential reference tool for practising structural engineers in the UK and other countries

**Structural Steelwork** Dennis Lam, Thien Cheong Ang, Sing-Ping Chiew, 2018-10-08 Completely revised and updated this fourth edition of Structural Steelwork Design to Limit State Theory describes the design theory and code requirements for common structures connections elements and frames It provides a comprehensive introduction to structural steelwork design with detailed explanations of the principles underlying steel design See what's in the Fourth Edition All chapters updated and rearranged to comply with Eurocode 3 Compliant with the other Eurocodes Coverage of both UK and Singapore National Annexes Illustrated with fully worked examples and practice problems The fourth edition of an established and popular text the book provides guidance for students of structural and civil engineering and is also sufficiently informative for practising engineers and architects who need an introduction to the Eurocodes
