Designing a resilient service today requires a unified effort across front office and back office functions and technical and business perspectives. You'll learn how to make IT a full partner in the ongoing conversations you have with your customers. Take a unique customer-centered approach to the entire service delivery lifecycle. Apply this perspective across development, operations, QA, design, project management, and marketing. Implement a specific quality assurance methodology that unifies those disciplines. Use the methodology to achieve true resilience, not just stability.
