Mareis, Matthias Held, Gesche Joost, 2014-03-15 Das Interesse an einer gleichberechtigten Teilhabe im Design hat von den 1960er Jahren bis in die Gegenwart zu einer Reihe produktiver Gestaltungspraktiken und Theorien geführt. Heute stellt sich jedoch die Frage, ob das Leitbild der partizipatorischen Gestaltung nicht auf einem idealisierenden Verständnis von Demokratie und sozialer Beteiligung gründet. Der Band unternimmt eine kritische Bestandsaufnahme der partizipatorischen Gestaltung ihrer Entwicklung und der gegenwärtigen Theoriebildung. Die Beiträge von Gilbert Cockton, Pelle Ehn, Jesko Fezer, Richard Herriott, Claudia Mareis und Elizabeth Sanders prüfen den Stellenwert von Partizipation in der praxisbasierten Designforschung und fragen kurzum: Wer gestaltet die Gestaltung? **Creating Your Signature Online Course** Kimberly A. Hall, 2023-12-01 Creating Your Signature Online Course guides educators through the development of engaging, efficient, aesthetically pleasing, and narrative-rich online learning spaces. Despite the availability of numerous visual and textual communication tools and user-friendly learning management systems, instructors and support staff need concrete strategies for designing digital and online higher education courses that emphasize the appeal and relevance of the subject, reflect the instructor's presence, and inspire students. Grounded in research and theory from psychology, instructional design, user and learner experience, design, graphic arts, and storytelling, this book accessibly and practically showcases how teachers can leverage effective multimedia resources alongside their own expertise to meet students' needs. These fresh insights into instructional goals, learner identity, tonal qualities, narrative aesthetics, student feedback, and more reveal how charismatic virtual course designs can empower learners and tap into their mindsets and literacies. *The International Handbook of Collaborative Learning* Cindy Hmelo-Silver, Clark Chinn, Carol Chan, Angela O'Donnell, 2013-03-05 Collaborative learning has become an increasingly important part of education, but the research supporting it is distributed across a wide variety of fields, including social cognitive, developmental, and educational psychology, instructional design, the learning sciences, educational technology, socio-cultural studies, and computer-supported collaborative learning. The goal of this book is to integrate theory and research across these diverse fields of study and thereby to forward our understanding of collaborative learning and its instructional applications. The book is structured into the following 4 sections: 1 Theoretical Foundations, 2 Research Methodologies, 3 Instructional Approaches and Issues, and 4 Technology. Key features include the following: Comprehensive and Global. This is the first book to provide a comprehensive review of the widely scattered research on collaborative learning, including the contributions of many international authors. Cross-disciplinary. The field of collaborative learning is highly interdisciplinary, drawing scholars from psychology, computer science, mathematics, education, science, education, and educational technology. Within psychology, the book brings together perspectives from cognitive, social, and developmental psychology, as well as from the cross-disciplinary field of the learning sciences. Chapter Structure. To ensure consistency across the book, authors have organized their chapters around integrative themes and issues. Each chapter author summarizes the accumulated literature related to their chapter topic and identifies the strengths and weaknesses of the

supporting evidence Strong Methodology Each chapter within the extensive methodology section describes a specific methodology its underlying assumptions and provide examples of its application This book is appropriate for researchers and graduate level instructors in educational psychology learning sciences cognitive psychology social psychology computer science educational technology teacher education and the academic libraries serving them It is also appropriate as a graduate level textbook in collaborative learning computer supported collaborative learning cognition and instruction educational technology and learning sciences HVAC Systems Design Handbook, Fifth Edition Roger W.
