mammalian cell death and in bacterial radio and thermosensitivity In bacteria lipid peroxidation is not essential for radiation induced cell death One of the key points of the conference was the paradoxical nature of the radiobiology of eicosanoids On the one hand eicosanoids are mediators of damage on the other they are radioprotective agents It is clear from the literature and from the data presented at the conference that both of these properties may also be observed as a consequence of radiotherapy Some studies indicate that nonsteroidal anti inflammatory drugs may minimize or prevent certain radiation induced damage but other studies show no positive effect
