

124 D For about two weeks. And have you had
 125 anything since then?
 126 P I've had a sour stomach.
 127 P I'm on a diet now
 128 and I don't dare go off because I end up with a sour
 129 stomach.

130 D Hm hm
 131 Now, what does it mean to have a sour
 132 stomach? What is a sour stomach? A heartburn like a
 133 heartburn or something.

134 D Does it hurt here?
 135 P Yeah. It li- I think-
 136 I think it like, if you take a needle and stick you right

137 D Hm hm
 138 P there's a pain right here ... and then it goes from here on this

139 D Hm hm
 140 P = side to
 141 D Hm hm Does it go into the back?
 142 P It's all up here. No. It's
 143 all right up here in front.

144 D Yeah. And when do you get that?
 145 P
 146 Well when I eat something wrong.

149 P Well probably
 150 an hour maybe less.

151 D About an hour?
 152 P Maybe less.

153 P I've
 154 cheated and I've been drinking which I shouldn't have done.

155 D
 156 Does drinking make it worse?
 157 P (...) Ho ho uh ooh Yes.
 158 Especially the carbonation and the alcohol.

159 D Hm hm

Doctor-Patient Interaction Walburga von Raffler-Engel, 1989-01-01

This volume covers many of the ways of speaking that create problems between doctor and patient. The questions under consideration in the present book are the following: How is the doctor-patient interaction structured in a particular culture? What takes place during the process? What causes misunderstandings, lack of cooperation and even total non-compliance? What is the outcome of the interaction and how does the patient benefit from it? Finally, and this is the ultimate purpose of this book, how can the interaction be improved so that an optimum outcome is assured for the patient with maximum satisfaction to the physician.

Researching Language and Health Zsófia Demjén, Sarah Atkins, Elena Semino, 2023-07-10. Researching Language and Health explores key topics in illness and healthcare contexts through multiple linguistic lenses. This book highlights key themes, guides readers through the design stages of research and the ethical considerations specific to linguistic health research, and brings methods and methodologies to life by demonstrating how these can be applied to specific issues in context. Covering a wide range of health conditions, healthcare contexts, and data types with an emphasis on those most accessible to students and new researchers, the authors foreground the so what of research and the impact that linguistic studies can have. Both a guide to key elements of the research process and a holistic view of research projects that have been successful, insightful, and impactful in different contexts, this is an essential text for advanced students and researchers in healthcare communication and applied linguistics.

Medical Technologies and the Life World Sonia Olin Lauritzen, Lars-Christer Hyden, 2007-01-24. Although the use of new health technologies in healthcare and medicine is generally seen as beneficial, there has been little analysis of the impact of such technologies on people's lives and understandings of health and illness. This ground-breaking book explores how new technologies not only provide hope for cure and well-being but also introduce new ethical dilemmas and raise questions about the natural body. Focusing on the ways new health technologies intervene into our lives and affect our ideas about normalcy, the body, and identity, Medical Technologies and the Life World explores how new health technologies are understood by lay people and patients, how the outcomes of these technologies are communicated in various clinical settings, how these technologies can alter our notions of health and illness, and create new illness. Written by authors with differing backgrounds in phenomenology, social psychology, social anthropology, communication studies, and the nursing sciences, this sensational text is essential reading for students and academics of medical sociology, health and allied studies, and anyone with an interest in new health technologies.

Exploring Discourse in Context and in Action Christopher N. Candlin, Jonathan Crichton, Stephen H.

Moore, 2017-03-30. This book combines an authoritative examination of the field of discourse-based research with practical guidance on research design and development. The book is not prescriptive but instead invites expansive, innovative thinking about what discourse is, why it matters to people at particular sites, and how it can be investigated. The authors identify a set of questions that they argue are crucial for understanding discourse. Part I of the book explores the implications of these

questions providing a comprehensive survey of relevant scholars theories concepts and methodologies Part II addresses these implications setting out a multi perspectival approach to resourcing and integrating micro and macro perspectives in the description interpretation and explanation of data Part III offers wide ranging resources to support further reflection and future research Ultimately this book offers a new research approach for students researchers and practitioners in Applied Linguistics to encourage and support research that can be truly impactful through its relevance to social and professional practice

The Gerontological Prism: Developing Interdisciplinary Bridges Jeffrey Michael Clair, Richard Allman, 2018-10-26 The Gerontological Prism promotes disciplinary cooperation in aging research and practice To some extent each chapter explores a unified objective that of generating a disciplinary blind gerontology The fundamental assumption throughout this book is that the aging individual and society can be enhanced by an understanding of the correlates of basic social behavioral demographic economic political ethical and biomedical processes involving aging Each author touches on issues that have both social psychological and practical policy significance They aim toward sensitizing the reader to the possibilities of a properly informed interdisciplinary approach to gerontology

Narrative Research in Health and Illness Brian Hurwitz, Trisha Greenhalgh, Vieda Skultans, 2008-04-15 This comprehensive book celebrates the coming of age of narrative in health care It uses narrative to go beyond the patient s story and address social cultural ethical psychological organizational and linguistic issues This book has been written to help health professionals and social scientists to use narrative more effectively in their everyday work and writing The book is split into three comprehensive sections Narratives Counter narratives and Meta narratives

Diagnostic Controversy Carolyn Smith-Morris, 2015-08-20 This collection is dedicated to the diagnostic moment and its unrivaled influence on encompassment and exclusion in health care Diagnosis is seen as both an expression and a vehicle of biomedical hegemony yet it is also a necessary and speculative tool for the identification of and response to suffering in any healing system Social scientific studies of medicalization and the production of medical knowledge have revealed tremendous controversy within and factitiousness at the outer parameters of

diagnosable conditions Yet the ethnographically rich and theoretically complex history of such studies has not yet congealed into a coherent structural critique of the process and broader implications of diagnosis This volume meets that challenge directing attention to three distinctive realms of diagnostic conflict in the role of diagnosis to grant access to care in processes of medicalization and resistance and in the transforming and transformative position of diagnosis for 21st century global health Smith Morris s framework repositions diagnosis as central to critical global health inquiry The collected authors question specific diagnoses e g Lyme disease Parkinson s andropause psychosis as well as the structural and epistemological factors behind a disease s naming and experience

Research Interviewing Elliot George MISHLER, Elliot George Mishler, 2009-06-30 Interviews hold a prominent place among the various research methods in the social and behavioral sciences This book presents a powerful critique of current views and techniques and proposes a new approach to interviewing At the heart of Elliot Mishler s argument is the notion that an interview is a type of discourse a speech event it is a joint product shaped and organized by asking and answering questions This view may seem self evident yet it does not guide most interview research In the mainstream tradition the discourse is suppressed Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech questions and the interviewer s behavior are standardized so that all respondents will receive the same stimulus respondents social and personal contexts of meaning are ignored While many researchers now recognize that context must be taken into account the question of how to do so effectively has not been resolved This important book illustrates how to implement practical alternatives to standard interviewing methods Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews Mishler shows how interviews can be analyzed and interpreted as narrative accounts He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice The respondents themselves he believes should be granted a more extensive role as participants and collaborators in the research process The book is an elegant work of synthesis clearly and persuasively written and supported by concrete examples of both standard interviewing and alternative methods It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool

The Sociology of Healthcare Sarah Earle, Gayle Letherby, 2008-03-28 A comprehensive collection of classic and contemporary readings in the sociology of health The Sociology of Healthcare will stimulate debate reflexive practice and critical thinking in applied sociology and is aimed at the teaching and learning needs of both lecturers and students
