Possible Worlds in Video Games: From Classic Narrative to Meaningful Actions Antonio José Planells de la Maza,2017-11-21 In current digital games classic fictional worlds are transformed into ludofictional worlds spaces rich in characters and emotions that are especially affected by the intervention of a player In this book we propose a model inspired by the Semantics of Fiction and Possible Worlds which is oriented to the analysis of video games as integrated systems

Contemporary Psychotherapies for a Diverse World Jon Frew,Michael D. Spiegler,2012-05-04 This unique text is the first to provide an introduction to the theory and practice of the major theories of psychotherapy and at the same time illustrate how these approaches are dealing with the ever increasing diversity of today s clients Frew and Spiegler have assembled the leading contemporary authorities on each theory to offer an insider s perspective that includes exposure to the style and language used by adherents of the approach which is not available in any other text The history of each approach and the latest cutting edge theory and practice are integrated with an emphasis on an awareness of the needs of diverse non majority clients creating a comprehensive practical and invaluable text for any

counseling theories course The major psychotherapeutic approaches are presented in roughly the chronological order in which they were developed and each chapter follows the same basic format to ensure consistency throughout the text Along with traditional theories there are chapters on reality therapy feminist therapy and narrative therapy and the chapter on ethics includes multicultural and feminist perspectives Each chapter includes the origin and evolution of the theory theoretical foundations and how the theory is manifested in practice an evaluation of the evidence for the theory s success limitations blind spots and challenges The Author s Journey in which authors describe what lead them to adopt their approach and how their own practice has evolved over time multicultural competencies and their importance in the context of the theory Resources are available online for instructors to supplement the material in the text and include a test bank and PowerPoint lecture slides

Accountability Research Hugo Letiche, Ivo De Loo, Carolyn Cordery, Jean-Luc Moriceau, 2024-07-12 This book discusses auto ethnographies of accountability undertaken in close collaboration by a multinational group of accounting and organization theory researchers over a period of three years The key assumption underlying the book is that accountability is inherently an identity creating process where the study of account making has to be done participatively with radical openness to the one s being researched as well as to their context That openness we call ethnography The values or assumptions inherent to the practices of account and identity making in a specific context are what auto ethnographies seek to describe and identify These values and assumptions warrant critical ethical reflection and this is what the researchers presented here have tried to provide The chapters in this book all are mini studies of relatedness The scale of examination is intimate the reflections provided by the researchers are mainly methodological This book is of interest to accounting and organization theory students and scholars who believe that accountability can fruitfully be studied through auto ethnography The book extends currently existing views on how accountability can be handled and discharged between researchers and their researched when local intimate settings are studied

Within High Fences Penny Hancock, 2005 There was nothing different about that night It was the same as every other night I thought But that night my life started to change I didn t know it then but I know it now It s the night when Nancy meets George But it isn t easy for them to be together There s Nancy s job and her boyfriend And will George have to return to his own country Taken from rear cover

Inequality Larry S. Temkin, 1993-06-24 Equality has long been among the most potent of human ideals and it continues to play a prominent role in political argument Views about equality inform much of the debate about wide ranging issues such as racism sexism obligations to the poor or handicapped relations between developed and developing countries and the justification of competing political economic and ideological systems Temkin begins his illuminating examination with a simple question when is one situation worse than another regarding inequality In exploring this question a new approach to understanding inequality emerges Temkin goes against the common view that inequality is simple and holistic and argues instead that it is complex individualistic and essentially comparative He presents a new way of thinking about equality and inequality that challenges the assumptions of philosophers welfare economists and others and has significant and far reaching implications on a practical as well as a theoretical level

Virtual Society Herman Narula, 2022-10-11 A fascinating provocative case that the metaverse will not merely transform our virtual experience it may actually enrich the quality of our lives Adam Grant

from the visionary co founder of one of today s most innovative technology companies This important book offers a highly persuasive argument that the metaverse a new kind of virtual world marks a profound next stage in this long human quest for fulfillment through creation Chris Anderson head of TED The concept of the metaverse has exploded in the public consciousness but its contours remain elusive Is it merely an immersive virtual reality playground one that Facebook and other platforms will angle to control Is it simply the next generation of massive multiplayer online games Or is it something more revolutionary As pioneering technologist Herman Narula shows the metaverse is the latest manifestation of an ancient human tendency the act of worldbuilding From the Egyptians whose conception of death inspired them to build the pyramids to modern day sports fans whose passion for a game inspires extreme behavior humans have long sought to supplement their day to day lives with a rich diversity of alternative experiences Rooting his vision in history and psychology Narula argues that humans intrinsic need for autonomy accomplishment and connection can best be met in virtual worlds of ideas where users have the chance to create and exchange meaning and value The metaverse is both the growing set of fulfilling digital experiences ranging from advanced gaming to concerts and other entertainment events and even to virtual employment and the empowering framework that allows these spaces to become networks of useful meaning Bloomberg Intelligence recently predicted that the metaverse will become an 800 billion industry by 2024 But its implications argues Narula will lead to far more awe inspiring possibilities than a spigot of cash The arrival of the metaverse marks the beginning of a new age of exploration not outward but inward with the potential to reshape society and open the door to a new understanding of the human species and its capabilities Rigorously researched and passionately argued Virtual Society is a provocative and essential guide for anyone who wants to go beyond superficial headlines to understand the true contours and potential of our virtual future
