Engaging Isolated Communities in Disaster Preparation and Communication in the Philippines Dennis John Sumaylo, 2023-09-04 This book provides an account of how local government units in the Philippines engage marginalized and geographically isolated communities in taking part in pre disaster communication efforts. The book focuses on communities classified by the government as Geographically Isolated and Disadvantaged Areas (GIDA) on the culturally rich island of Mindanao Philippines. The focus is centered on GIDA communities because they are assumed to receive less information and help in relation to their circumstances. This book accounts for the disaster preparedness communicative conditions of people living in GIDAS and identifies synergies and tensions in the engagement process. As such specific branches of enquiry focus on how information seeking and sharing experiences of GIDA communities inform the current practice of community engagement. In taking this research approach this book deliberately gives voice to these marginalized and often silenced communities. In general the study examines other possibilities or variables in the pre disaster risk communication process that truly engage geographically isolated and socioeconomically disadvantaged communities in disaster risk reduction and management (DRRM). Considering the existing methodologies used to engage local communities in DRRM this book looks at ways in which bottom up and top down
