A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems, Christina H. Rasmussen, 2018-08-08
Christiane Brems in collaboration with new coauthor Christina Rasmussen introduces prospective and practicing clinicians to theories and principles of applied clinical work with children ages three to twelve years. The authors take an integrated approach to understanding children and their families using a biopsychosociocultural model for conceptualization and treatment planning. Their methods are practical and compassionate as well as contextually grounded and individually tailored. Chapters follow the logical development of clinicians mirroring the natural flow of work with children. Coverage ranges from the importance of a beginning practitioner's introspection and of ethical and legal issues to a variety of intervention techniques and strategies and finally termination. Case studies showcase individualized and mindful treatment for each child with whom a clinician works. Outstanding Features of the Fourth Edition: Essential attention to how clinicians' self-awareness can lead to positive therapeutic relationships with children and their families. Thorough discussions of the biopsychosociocultural model for conceptualization and treatment planning. Emphasis on intensive assessment prior to treatment planning to address the needs of each child and family. A compelling practical exploration of mindfulness intervention with children. The authors' methodology addresses the profound effects of the larger environment and culture on children. By adopting the authors' integrated approach, clinicians are better able to understand important and complicated aspects of a child's and family's life. From there, compassionate, thoughtful, and relevant intervention ensues.

Developmental Psychopathology, Maladaptation and Psychopathology Dante Cicchetti, 2016-02-29
A comprehensive reference on external contributing factors in psychopathology. *Developmental Psychopathology* is a four-volume compendium of the most complete and current research on every aspect of the field. Volume Three, *Risk, Disorder, and Adaptation*, explores the everyday effects and behaviors of those with behavioral, mental, or neurological disorders and the disorder's real-world impact on their well-being. Now in its third edition, this comprehensive reference has been fully updated to better reflect the current state of the field and detail the latest findings in causation, intervention, contextual factors, and the risks associated with atypical development. Contributions from expert researchers and clinicians explore the effects of abuse and traumatic stress, memory, development, emotion, regulation, impulsivity, and more, with chapters specifically targeted toward autism, schizophrenia, narcissism, antisocial behavior, bipolar disorder, and borderline personality disorder. Advances in developmental psychopathology have burgeoned since the 2006 publication of the second edition, and keeping up on the latest findings in multiple avenues of investigation can be burdensome to the busy professional. This series solves the problem by collecting the information into one place with a logical organization designed for easy reference. Learn how childhood experiences contribute to psychopathology. Explore the relationship between atypical development and substance abuse. Consider the impact or absence of other developmental traits. Understand the full risk potential of any behavioral or mental disorder. The complexity of a field as diverse as developmental psychopathology deepens with each emerging theory.

especially with consideration of the multiple external factors that have major effects on a person's mental and emotional development. *Developmental Psychopathology Volume Three: Risk, Disorder, and Adaptation* compiles the latest information into a cohesive, broad-reaching reference with the most recent findings. *Vom Leben und Sterben im Alter* Andreas Kruse, 2021-04-28. This book is concerned with people who are approaching the end of their lives as well as with the personal and professional caregivers who accompany them during this last stage. It describes attitudes and coping techniques among seriously or terminally ill people as well as the care support and environmental conditions that can help them shape the end of life in the best way possible in accordance with their own ideas. The author's aim in the book is to provide support for people in developing an accepting attitude towards the finiteness of life and in clearly articulating to their caregivers what their ideas of a good life are. This is a major work that places all end-of-life issues in a kinder, more serious and more confident light. Well worth reading for everyone in relation to their own life and for doctors, nurses, pastoral caregivers, counselors, and all those voluntarily involved in providing humane care for seriously ill, very elderly, and dying people. A book that is a wonderful read. Dr. Matthias Mettner, Director of Studies for Palliative Care and Organizational Ethics, Interdisciplinary Continuing Education, Switzerland, and Program Director of the Health and Medicine Forum, Zurich.

The Development of Criminal and Antisocial Behavior Julien Morizot, Lila Kazemian, 2014-12-02. This edited book summarizes the current state of knowledge on the development of criminal and antisocial behavior over the life course. It focuses mainly on the developmental perspective, which has had a paradigmatic influence on current theoretical and empirical works in criminology. With a multidisciplinary perspective, the book reviews the fundamental concepts of developmental criminology, the risk factors and developmental processes related to the most salient personal factors: genetics, personality, and environmental factors; family, peers, school domains; explaining the development of criminal and antisocial behavior; the developmental issues related to a number of special themes: women's criminality, street gangs, and the applied and policy implications of research in developmental criminology. In each chapter, prominent researchers from different disciplines, such as criminology and psychology, summarize the state of knowledge on a specific topic, identify the shortcomings of past research, offer recommendations for future research needs.

Life Span Human Development Carol K. Sigelman, Linda De George, Kimberley Cunial, Elizabeth A. Rider, 2018-09-01. The third edition of *Life Span Human Development* helps students gain a deeper understanding of the many interacting forces affecting development from infancy, childhood, adolescence, and adulthood. It includes local, multicultural, and indigenous issues and perspectives, local research in development, regionally relevant statistical information, and National guidelines on health. Taking a unique, integrated, topical, and chronological approach, each chapter focuses on a domain of development, such as physical growth, cognition, or personality, and traces developmental trends and influences in that domain from infancy to old age. Within each chapter, you will find sections on four life stages: infancy, childhood, adolescence, and adulthood. This distinctive organization enables students to comprehend
