Novozhilova,Robert D. Dolan,2022-11-08 Exploring Mathematics with CAS Assistance is designed as a textbook for an innovative mathematics major course in using a computer algebra system CAS to investigate explore and apply mathematical ideas and techniques in problem solving The book is designed modularly with student investigations and projects in number theory geometry algebra single variable calculus and probability The goal is to

provoke an inquiry mindset in students and to arm them with the CAS tools to investigate low entry open ended questions in a variety of mathematical arenas Because of the modular design the individual chapters could also be used selectively to design student projects in a number of upper division mathematics courses These projects could in fact lead into undergraduate research projects The existence of powerful computer algebra systems has changed the way mathematicians perform research this book enables instructors to put some of those new methods and approaches into their undergraduate instruction Prerequisites include a basic working knowledge of discrete mathematics and single variable calculus Programming experience and some basic familiarity with elementary probability and statistics are beneficial but not required The book takes a software agnostic approach and emphasizes algorithmic structure of solution methods by systematically providing their step by step verbal descriptions or suitable pseudocode that can be implemented in any CAS Here is a possible addition to the book description about this new information The code templates for the labs from the book are now available on the github an AI powered developer platform for sharing codes A user can find the Jupyter Notebooks with the labs in the repository https://github.com/LidaUrazhdina/LabTemplates_for_Math_with_CAS Here is a possible addition to the book description about this new information The code templates for the labs from the book are now available on the github an AI powered developer platform for sharing codes A user can find the Jupyter Notebooks with the labs in the repository https://github.com/LidaUrazhdina/LabTemplates_for_Math_with_CAS
