A Brief History of Death W. M. Spellman, 2014-02-15 As humans death its certainty its inevitability consumes us We make it the subject of our literature our art our philosophy and our religion Our feelings and attitudes toward our mortality and its possible afterlives have evolved greatly from the early days of mankind Collecting these views in this topical and instructive book W M Spellman considers death and dying from every angle in the Western tradition exploring how humans understand and come to terms with the end of life Using the work of archaeologists and paleoanthropologists Spellman examines how interpreting physical remains gives us insight into prehistoric perspectives on death He traces how humans have died over the centuries both in the causes of death and in the views of actions that lead to death He spotlights the great philosophical and scientific traditions of the West which did not believe in an afterlife or see the purpose of bereavement while also casting new light on the major religious beliefs that emerged in the ancient world particularly the centuries long development of Christianity He delves into three approaches to the meaning of death the negation of life continuity in another form and agnosticism from both religious and secular scientific perspectives Providing a deeper context for contemporary debates over end of life issues and the tension between longevity and quality of life A Brief History of Death is an illuminating look at the complex ways humans face death and the dying *Zur Erscheinung kommen* Anne Eusterschulte, 2016-09-19 Wenn etwas zur Erscheinung kommt aus dem Verborgenen oder aus latenter Anwesenheit ans Licht tritt und sich zeigt dann geschieht dies keineswegs ausschließ lich im Modus der Visualität sondern es handelt sich in einem umfassenderen Verständnis um ein phänomenales Sinnföligwerden und sinnliches Erfahrbarwerden es eröffnet sich

gleichsam ein Erscheinungsraum. Eine solche Präsenzerfahrung umschließt sinnlich-perzeptive, imaginative und mentale Aspekte. Welche Befunde ergeben sich, wenn wir diese Implikationen eines Zur-Erscheinung-Kommens auf Phänomene der Bildlichkeit gar das künstlerische Bild anlegen? Was heißt es also, dass etwas zur Erscheinung kommt? Und inwiefern lässt sich Bildlichkeit als ein theoretischer Prozess bestimmen? Der vorliegende Band verfolgt das Anliegen, Bildbegriffe und Verständnisse aus dem Kontext historischer, theologischer, philosophischer Traditionen stärker in die gegenwärtigen Bilddebatten einzubeziehen und so das Potential metaphysischer Spekulationen und Grundlegungen in seiner systematischen Relevanz für die aktuelle Diskussion zu erschließen. Die Autorinnen und Autoren widmen sich der Frage des Zur-Erscheinung-Kommens aus unterschiedlichen Perspektiven im Ausgang von konkreten exemplarischen Feldern einer gegenstandsbezogenen Auseinandersetzung. Beiträge, die Bildlichkeit aus der Perspektive einer metaphysischen Philosophietradition betrachten werden mit modernen und zeitgenössischen Themen sowie mit literatur- und kulturwissenschaftlichen Theorien in Bezug gesetzt. In direktem Rekurs auf bildwissenschaftliche Forschungsperspektiven, Befunde und Methoden ist es das Ziel, den Debatten um den Bildbegriff durch eine Fokussierung auf philosophisch-theologische Voraussetzungen eine geistesgeschichtlich breitere Basis zu geben. Der Band eröffnet eine Diskussion, die den Problematisierungszusammenhang syn- wie diachron-prismatisch aufbricht. Denn gerade die Konfrontation von disziplinär miteinander verschränkten Ansätzen aus den Bereichen literarischer und literaturtheoretischer, ästhetischer wie kunsthistorischer, philosophischer, wissenschafts- und kulturgeschichtlicher und nicht zuletzt theologischer Interpretamente verspricht spezifische Denkweisen und ästhetische Konzeptionen einer Philosophie des Erscheinens klarer zu konturieren. Mit Beiträgen von Georg W. Bertram, Olaf Breidbach, Saverio Campanini, Anne Eusterschulte, Thomas Leinkauf, Catherine Newmark, Verena Olejniczak, Lobsien, Peter Schfer, Mirjam Schaub, Wilhelm Schmidt, Biggemann, Wiebke Marie Stock, Ludger Schwarte und Arno Schubbach.

Earth-Honoring Faith Larry L. Rasmussen, 2015. Larry L. Rasmussen offers a dramatic new way of thinking about human society, ethics, and the health of our planet. Rejecting the modern ethical assumption that morality applies to human society alone, *Earth Honoring Faith* argues that we must derive a system of ethics and morality that accounts for the wellbeing of all creation on Earth.

Religion und Gesundheit Albrecht Classen, 2011. Die neu gegründete Reihe *Paracelsus Studien* bietet ein wissenschaftliches Forum für interdisziplinäre Forschungen, die sich Kultur und wissenschaftshistorischen Modellen eines ganzheitlichen Weltbildes widmen und den Dialog zwischen den Disziplinen anregen. Der frühneuzeitliche Alchemist, Mystiker, Theologe und Philosoph Paracelsus (1493–1541) dient hierfür als Leitfigur und Vorbild. Als eröffnender Sammelband fokussiert *Mystik und Natur* Epochen und Persönlichkeiten der Geistesgeschichte von der Spätantike bis in die Gegenwart, die sich der Integration von Spiritualität und Wissenschaft widmeten. Hildegard von Bingen, Jakob Böhme, Emanuel Swedenborg, Josef Goerres und Johann Wolfgang von Goethe stehen ebenso im Mittelpunkt der Untersuchungen wie gegenwärtige ganzheitliche Ansätze und ihre historischen Bezüge.

The Oxford Handbook of Descartes and Cartesianism Steven Nadler, Tad M.

Schmaltz, Delphine Antoine-Mahut, 2019-05-02 The Oxford Handbook of Descartes and Cartesianism comprises fifty specially written chapters on Ren Descartes 1596 1650 and Cartesianism the dominant paradigm for philosophy and science in the seventeenth century written by an international group of leading scholars of early modern philosophy The first part focuses on the various aspects of Descartes s biography including his background intellectual contexts writings and correspondence and philosophy with chapters on his epistemology method metaphysics physics mathematics moral philosophy political thought medical thought and aesthetics The chapters of the second part are devoted to the defense development and modification of Descartes s ideas by later generations of Cartesian philosophers in France the Netherlands Italy and elsewhere The third and final part considers the opposition to Cartesian philosophy by other philosophers as well as by civil ecclesiastic and academic authorities This handbook provides an extensive overview of Cartesianism its doctrines its legacies and its fortunes in the period based on the latest research **Flat Earths and Fake Footnotes** Derrick

Peterson, 2021-02-17 We are all haunted by histories They shape our presuppositions and ballast our judgments In terms of science and religion this means most of us walk about haunted by rumors of a long war However there is no such thing as the history of the conflict of science and Christianity and this is a book about it In the last half of the twentieth century a sea change in the history of science and religion occurred revealing not only that the perception of protracted warfare between religion and science was a curious set of mythologies that had been combined together into a sort of supermyth in need of debunking It was also seen that this collective mythology arose in the nineteenth and twentieth centuries by historians involved in many sides of the debates over Darwin s discoveries and from there latched onto the public imagination at large Flat Earths and Fake Footnotes takes the reader on a journey showing how these myths were constructed collected together and eventually debunked Join us for a story of flat earths and fake footnotes to uncover the strange tale of how the conflict of science and Christianity was written into history Religion, Magic, and Science in Early Modern Europe and America

Allison P. Coudert, 2011-10-17 This fascinating study looks at how the seemingly incompatible forces of science magic and religion came together in the 15th 16th and 17th centuries to form the foundations of modern culture As Religion Magic and Science in Early Modern Europe and America makes clear the early modern period was one of stark contrasts witch burnings and the brilliant mathematical physics of Isaac Newton John Locke s plea for tolerance and the palpable lack of it the richness of intellectual and artistic life and the poverty of material existence for all but a tiny percentage of the population Yet for all the poverty insecurity and superstition the period produced a stunning galaxy of writers artists philosophers and scientists This book looks at the conditions that fomented the emergence of such outstanding talent innovation and invention in the period 1450 to 1800 It examines the interaction between religion magic and science during that time the impossibility of clearly differentiating between the three and the impact of these forces on the geniuses who laid the foundation for modern science and culture **Rest in Pieces** Bess Lovejoy, 2016-10-06 In the long run we re all dead But for some of the

most influential figures in history death marked the start of a new adventure The famous deceased have been stolen burned sold pickled frozen stuffed impersonated and even filed away in a lawyer s office Their fingers teeth toes arms legs skulls hearts lungs and nether regions have embarked on voyages that criss cross the globe and stretch the imagination Counterfeiters tried to steal Lincoln s corpse Einstein s brain went on a cross country road trip And after Lord Horatio Nelson perished at Trafalgar his sailors submerged him in brandy which they drank From Mozart to Hitler Rest in Pieces connects the lives of the famous dead to the hilarious and horrifying adventures of their corpses and traces the evolution of cultural attitudes towards death

The Author's Effects Nicola J. Watson,2020 A fascinating account of the emergence of the writer s house museum over the course of the nineteenth century in Britain Europe and North America It considers the museum as a cultural form and asks why it appeared and how it has constructed authorial afterlife for readers individually and collectively

Descartes Steven Nadler,2023-04-19 A critical biography of Ren Descartes whose first principle I think therefore I am reshaped modern philosophy Often called the father of modern philosophy Ren Descartes set the intellectual agenda for seventeenth century philosophy mathematics natural science and beyond In this critical biography based on compelling new research Steven Nadler follows Descartes from his early education in France to the Dutch Republic where he lived most of his adult life to his final months as a tutor to Queen Christina of Sweden Along the way Nadler shows how Descartes renewed philosophy by transforming fundamental assumptions about the cosmos natural world and human nature as well as how his work continues to generate new insights into many of the metaphysical and epistemological problems that engage philosophers today

A History and Philosophy of Expertise Jamie Carlin Watson,2021-11-18 In this comprehensive tour of the long history and philosophy of expertise from ancient Greece to the 20th century Jamie Carlin Watson tackles the question of expertise and why we can be skeptical of what experts say making a valuable contribution to contemporary philosophical debates on authority testimony disagreement and trust His review sketches out the ancient origins of the concept discussing its early association with cunning skill and authority and covering the sort of training that ancient thinkers believed was required for expertise Watson looks at the evolution of the expert in the middle ages into a type of genius or innate talent moving to the role of psychological research in 16th century Germany the influence of Darwin the impact of behaviorism and its interest to computer scientists and its transformation into the largely cognitive concept psychologists study today

Religion and Science: A Beautiful Friendship? Robert W. Fuller,1900 Although grievances leap to mind when we consider making peace with an old foe ultimate success depends on identifying not where each side is wrong but where each is right Seeing some good in others doesn t mean blinding ourselves to what s wrong and harping on the latter is no way to make peace Current attacks on religion are ignoring the fact that it got some very big things right However religion must acknowledge that its spokesmen have repeatedly failed to distinguish between its great discoveries and its mistakes Not only have some religious leaders ignored compelling evidence but they like the leaders of secular

institutions have all too often failed to live up to the standards of behavior they espouse Paradoxically science makes even more mistakes than religion but it saves itself by being quicker to recognize and correct them Niels Bohr the father of atomic physics ascribed his breakthroughs to making my mistakes faster than others The difference between science and religion is not that one has babies in its bath water and the other doesn't The difference is that science drains its dirty bath water faster leaving its gleaming babies for all to admire Science gives us reason to think we can vanquish famine disease and poverty Religion heralds peace on Earth goodwill toward men Neither of these venerable institutions can deliver on its promise without help from the other but together there is reason to hope that they can **The Great Perhaps** Burton F. Porter, 2015-04-16

God created man in his own image but did man perhaps return the compliment The question of God's existence has been a pivotal issue for every civilization Those with faith in God want assurance that their belief is justified and atheists want confirmation that God is nowhere to be found When we reflect on religion we want to know the reasons for belief in God or whether belief is only a comforting delusion In an age of science will religion persist or will it be edged out of our consciousness and become a historical curiosity Burton Porter approaches the notion of God in an open yet critical way examining the argumentation used by centuries of human society to support or reject the existence of God With minimum assumptions and maximum objectivity Porter debates whether the religious view does in fact diagram reality He examines the roles that God and religion have played in the ethics art and actions of many diverse cultures to conclude that at the very least the consideration of the existence of a higher power is fundamental to us all *Neglected Perspectives on Science and Religion* Wayne Viney, William Douglas Woody, 2017-04-07

This book explores historical and contemporary relations between science and religion providing new perspectives on familiar topics *Political Readings of Descartes in Continental Thought* Alon Segev, 2019-08-22

Descartes philosophy plays a special role in the works of both renowned and marginal writers in the Continental Tradition particularly in their views on society and politics This is the first book length study to consider political responses to Descartes in 19th and 20th century European thinkers Alon Segev shows how on the one hand Continental authors utilize Descartes philosophy to advance the core ideas of Enlightenment and to combat the movements and systems of Capitalism Materialism Absolutism Fascism Nazism and Neo Paganism however on the other hand Segev also demonstrates that Continental authors have also discerned in Descartes philosophy the main source of all these maladies of modernity These opposing views are examined as they are unfolded in known and forgotten texts by authors such as Vico Sorel Nietzsche Husserl and Heidegger and by lesser known figures such as Baader Borkenau and B hm By exploring celebrated and overlooked texts and authors Alon Segev both details the Cartesian influence on the touchstone thinkers of political modernity and also fills a wide historical gap in the research providing a significant contribution to the discussion about the crises of the contemporary social and political world In short this book enables us through Descartes to assess the advantages and shortcomings of modern society *Beyond Belief* Philip Stewart, 2014-09-24

How and why does faith so

often fade away Where does it go and what do you hold on to when it is gone Between the believer and the unbeliever lies a sort of communicational void a cultural gap usually marked by silence or alternatively by rage This extended essay draws on history literature and theology as well as personal experience in an attempt to give some kind of account of the demise of belief in terms that a believer can perhaps understand and in the process to cover some of the principal reasons why the arguments usually put forward to buttress faith prove to be without force In the end faith can enrich a persons life only at the expense of the illusions on which it is based

Science and Religion Rogene A. Buchholz, 2023-02-15 Science and religion are two different worldviews that involve different methods of attaining truth one based on evidence using a scientific method to examine the natural world and the other based on belief in certain religious precepts often involving a supernatural dimension based on a holy book in some cases and on the authority of religious leaders This book examines the nature of religion and the role it plays in society along with unresolved problems that have existed for some time The nature of science is then discussed along with the scientific method and problems with science that have not been resolved The origins of science and religion are then examined and the relationship of these two worldviews and the relationship of science to the supernatural Finally the future of religion is examined along with its ongoing relationship to science The real battle between science and religion involves the question of who gets to decide the truth about the world we live in and our status as human beings in this world The answer to that question is not obvious but has enormous implications for human life on a planet that is under stress and may not be able to support human life for much longer as our actions have consequences that are now becoming all too apparent

Cranioklepty Colin Dickey, 2010-10-09 Presents a history of cranioklepty the desire to possess the skulls of the brilliant and famous for study for sale or for display and includes the after death stories of such notables as Haydn Beethoven and Thomas Browne
