Pala, 2003-08-02 The Text Speech and Dialogue TSD Conference 2002 it should be noticed is now being held for the fifth time and we are pleased to observe that in its short history it has turned out to be an international forum successfully intertwining the basic fields of NLP It is our strong hope that the conference contributes to a better understanding between researchers from the various areas and promotes more intensive mutual cooperation So far the communication between man and computers has displayed a one way nature humans have to know how the machines work and only then can they understand them The opposite however is still quite far from being real our understanding of how our user friendly computers can understand us humans is not deep enough yet A lot of work has to be done both in the near and distant future Let TSD 2002 be a modest contribution to this goal The conference also serves well in its second purpose to facilitate researchers meeting in the NLP field from Western and Eastern Europe Moreover many participants now come from other parts of the world thus making TSD a real crossroads for researchers in the NLP area This volume contains the proceedings of this conference held in Brno
