It describes attitudes and coping techniques among seriously or terminally ill people as well as the care support and environmental conditions that can help them shape the end of life in the best way possible in accordance with their own ideas. The author's aim in the book is to provide support for people in developing an accepting attitude towards the finiteness of life and in clearly articulating to their caregivers what their ideas of a good life are. This is a major work that places all end-of-life issues in a kinder, more serious and more confident light.
