

Moving Average(MA): Use Cases

Trend Identification Price Above Long Term MA Uptrend

- Trend identification is to use MA to smooth out price fluctuations and reveal the underlying trend.
- Moving averages can be used to identify long-term trends by using a longer time period.
- 50-day, 100-day and 200-day moving averages are the most common MA.

MA Crossover Short Term MA Crosses Long Term MA Trend Reversal

- When the short-term MA crosses above the long-term MA, it is known as a "golden cross" and is considered a bullish signal.
- A golden cross suggests a long-term bull market going forward, while a death cross suggests a long-term bear market.

Support / Resistance Price Respects MA Strong Trend

MA Provides Support on the uptrend

- A moving average can act as a support level for the price of an asset when it is rising.
- When the price falls to the moving average, it may bounce off or be captured by it.

Price Crossover Price Crosses Long term MA Trend Reversal

- A price crossover occurs when the price of an asset crosses above or below a moving average.
- Crossovers can be used to identify potential trend changes or confirm existing trends.

strategy as it is in this book How To Make Money Trading With Charts Ashwani Gujral, Prasanna Khemariya, 2015-12-16

How Much Is Enough? Monte Carlo Simulations of an Oil Stabilization Fund for Nigeria Mr. Ulrich Bartsch, 2006-06-01 In oil dependent countries a major issue is how to stabilize fiscal spending when government revenue fluctuates along with the international price of oil A stabilization fund would allow the government to pull through an oil price trough and absorb windfall revenue when prices are high This paper focuses on two key issues First the paper proposes to base government spending on moving averages of past oil prices that are shown to behave nearly as a random walk Second it uses Monte Carlo simulations of a fiscal policy model to look at the probability that a given level of assets in the stabilization fund is exhausted over a certain number of years The simulations show that with a fiscal policy based on moving averages over three to five years a stabilization fund of about 75 percent of 2004 oil revenue would be adequate which in Nigeria would equate to US 16 18 billion *The Compleat Day Trader II* Jake Bernstein, 1998-07-22 The Compleat Day Trader II picks up where the Compleat Day Trader left off Bernstein provides new trading strategies and techniques soecifically designed for the new breed of intuitive traders who create their own system customized for their own trading styles and areas of effectiveness The Compleat Day Trader II includes the most up to date strategies and systems for seizing hold of day trading success including A separate chapter detailing each system and method Indicator formulas and system codes The psychology of day trading
