Differential Equations and Boundary Value Problems 6e Introduction to Differential Equations Using Sage David Joyner, Marshall Hampton, 2012-08-15 David Joyner and Marshall Hampton's lucid textbook explains differential equations using the free and open source mathematical software Sage. Since its release in 2005 Sage has acquired a substantial following among mathematicians but its first user was Joyner who is credited with helping famed mathematician William Stein turn the program into a usable and popular choice. Introduction to Differential Equations Using Sage extends Stein's work by creating a classroom tool that allows both differential equations and Sage to be taught concurrently. It's a creative and forward thinking approach to math instruction. Topics include First Order Differential Equations Incorporation of Newtonian Mechanics Second Order Differential Equations The Annihilator Method Using Linear Algebra with Differential Equations Nonlinear Systems Partial Differential Equations Romeo and Juliet *Differential Equations and Fundamentals of Differential Equations with Boundary Value Problems* R.
